PHASE I ENVIRONMENTAL SITE ASSESSMENT

LITTLE ROCK PORT SUPERSITE - ~965 ACRES LITTLE ROCK, ARKANSAS 72206

ECCI Project Number: 4446-3024

July 2024

Prepared for: LITTLE ROCK PORT AUTHORITY

We declare to the best of our professional knowledge and belief, we meet the definition of *environmental professionals* as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the *subject property*. We have developed and performed all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision according to a system designed to assure that qualified personnel properly gather and evaluate the information submitted. The information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information (Regulation 32.607).

1.0 Executive Summary

ECCI has performed a Phase I Environmental Site Assessment (ESA) for the Little Rock Port Authority. This Phase I ESA was performed on a ~965 acres located south of Thibault Road and both east and west of Frazier Pike. This Phase I ESA was performed in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527 - 21, *"Environmental Site Assessments: Phase I Environmental Site Assessment,"* hereinafter referred to as the Standard. Any exceptions to, or deletions from, the Standard are discussed in Section 9.0 of this report. This report will serve to summarize the work performed by ECCI professionals as part of this project.

The purpose of this Phase I ESA on multiple parcels of commercial real estate is to investigate the presence of the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)(42 U.S.C. §9601) and petroleum products. This report is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice.

While use of this Phase I ESA is intended to constitute all appropriate inquiries, it is not intended that its use be limited to that purpose. This report is intended primarily as an approach to conducting an inquiry designed to identify recognized environmental conditions (RECs) in connection with a property. This practice is intended to reflect a commercially prudent and reasonable inquiry.

The subject property is located on the south side of Thibault Road in Pulaski County, southeast of the city of Little Rock, Arkansas and is comprised of approximately ~965 acres. During the course of this project, ECCI performed a site reconnaissance, reviewed federal, state, and local records, and interviewed persons familiar with the property to ascertain historical use of the property and surrounding areas. ECCI did not observe any recognized environmental condition, controlled environmental conditions or historical recognized environmental conditions. Information on the findings and conclusions can be found in Table 1.1 below. Further descriptions and a summary of the site characteristics can be found in section 6.0.

FINDINGS	SUMMARY
	The property is primarily agricultural land, and also
	includes undeveloped property, residential property, a
	commercial topsoil/dirt mining area, and a Federal
Little Rock Port Authority	Aviation Administration VORTAC facility.
Supersite	OPINION AND CONCLUSION:
	ECCI did not observe any recognized environmental
	condition, controlled environmental conditions, or
	historical recognized environmental conditions.

Table 1.1 – Summary of Findings, Opinion and Conclusions

ECCI assumes that information provided by persons interviewed for this project is correct. The investigation is limited to visually observable environmental conditions present on the property at the time of the site inspection. Whenever possible, adjoining properties were visually inspected. This report and all work performed in conjunction with this report is for the exclusive use of the Little Rock Port Authority and their agents or assigns. Other entities or individuals may only rely on this report with the express written consent of the Little Rock Port Authority and ECCI.

2.0 Introduction

2.1 Purpose of the Phase I Environmental Site Assessment

ECCI was authorized by the Little Rock Port Authority to perform a Phase I ESA on the ~965-acre property located on the south side of Thibault Road in Pulaski County southeast of the city Little Rock, Arkansas. The subject property includes a variety of land uses, primarily agricultural land, some undeveloped property, residential property, a commercial topsoil/dirt mining area, and a Federal Aviation Administration VORTAC facility.

The purpose of this Phase I ESA is to identify and describe past uses of the property which involved hazardous substances or petroleum products and existing or potential recognized environmental conditions, controlled recognized environmental condition, or historical recognized environmental conditions (as defined by ASTM Practice E 1527-13) in connection with the Property. A Recognized Environmental Condition (REC) is defined in the Standard as (1) "the presence of hazardous substances or petroleum products in, or at the subject property due to a release to the environment, (2) the likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." A controlled recognized environmental condition is defined as a "recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls." A historical recognized environmental condition is defined as a "previous release of hazardous substances or petroleum products affecting the subject property that has been that has addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by a regulatory authority or authorities without

subjecting the subject property to any controls." A *de minimis* condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. *De minimis* conditions are not Recognized Environmental Conditions.

2.2 Detailed Scope of Services

The Standard identifies four (4) component parts of a Phase I ESA. The components are site reconnaissance, records review, interviews, and evaluation and report preparation. The scope of work developed for this project as defined by the four (4) components is as follows:

2.2.1 Site Reconnaissance

Mr. Jimmy Rogers with ECCI conducted a site visit on the subject property located in Little Rock, Arkansas on May 28, 2024. The purpose of the visit was to visually and physically observe the property and any structures located on the subject property. During the visit, the environmental professional noted information about the general conditions and site setting of the subject property. The objective of the site visit was to obtain information to identify and describe past uses of the property which involved hazardous substances or petroleum products and to identify potential RECs associated with the property.

2.2.2 Records Review

A review of reasonably ascertainable federal and state records was performed to help identify RECs in connection with the property. ECCI obtains federal and state records from Environmental Data Resources (EDR) in Southport, Connecticut. Standard environmental record sources reviewed included:

- National Priorities List (NPL);
- CERCLIS List;
- CERCLIS NFRAP Site List;
- RCRA CORRACTS;

- RCRA Transportation, Storage, and Disposal Facilities;
- RCRA Generators List;
- Federal institutional control/engineering control registries;
- Federal ERNS List;
- State and tribal lists of hazardous waste sites identified for investigation or remediation;
- Emergency Response Notification System List;
- State Remedial Action Site List;
- State and Tribal Landfill List;
- State and Tribal Voluntary Cleanup Sites;
- State and Tribal Brownfields Sites;
- State and Tribal Registered and Leaking Storage Tank Lists;
- Local Brownfields Lists;
- Local Lists of Landfills/SWDS; and
- Registered Storage Tanks.

ECCI also reviewed the current United States Geological Survey (USGS)

7.5 Minute Topographic Maps. This is a standard source for information regarding the physical setting of the property. Historical use information was obtained by reviewing available standard historical sources, which included aerial photographs. Sanborn Fire Insurance Maps and City Directories were accessed for review through EDR.

2.2.3 Interviews

In order to obtain information about current and historical use of the property and to attempt to identify any recognized environmental conditions, ECCI interviewed the following personnel.

Table 2.1 - Interviews

	Name and Number	Duration of Occupancy
User / Current Owner	Bryan Day	N/A
Representative of select	501-519-1950	
parcels		
Resident / Current Owner	Ricky Thomas	12 years
of select parcels	501-680-2593	
Resident / Current Owner	Randy Thomas	25 years
of select parcels	501-748-3650	
Resident / Former Owner	Rosie Bartholomew	unknown
of select parcels	501-266-9882	

Introduction

Information from these interviews is summarized in Section 7.0 of this report.

2.2.4 Evaluation and Report Preparation

The final report for this project was prepared by Environmental Professionals and reviewed for technical quality by an Environmental Professional as defined by the Standard. The report includes all documentation to support the analysis, opinions, and conclusions found herein. The documentation is of sufficient detail to reconstruct all research at a later date, if necessary, as required by the Standard.

2.3 Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM Standard Practice ASTM E 1527-21 to ensure that methodologies used constitute appropriate inquiry into the prior uses of the property consistent with good commercial and customary practice in order to identify and analyze environmental conditions that constitute existing, past, or potential environmental risks associated with a property. Performance, in accord with these standards is intended to reduce, but not eliminate uncertainty with respect to the potential for RECs associated with a property. This report is designed to satisfy the requirements for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability as defined in 42 USC 9601(35) B. ECCI assumes that information provided by persons interviewed for this project is correct.

2.4 Limitations and Exceptions

The information presented and conclusions made in this report are based upon the site inspection, interviews and records review performed by ECCI. The assessment is limited to visually observable environmental conditions present on the properties at the time of the site inspection. Specific assessments of the following potential environmental conditions are <u>excluded</u> from this project: asbestos, lead-based paint,

6

potential radon gas hazards, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents and mold.

2.5 Special Terms and Conditions

The scope of work provided by ECCI and approved by the client contained no special terms and conditions to the investigation.

2.6 User Reliance

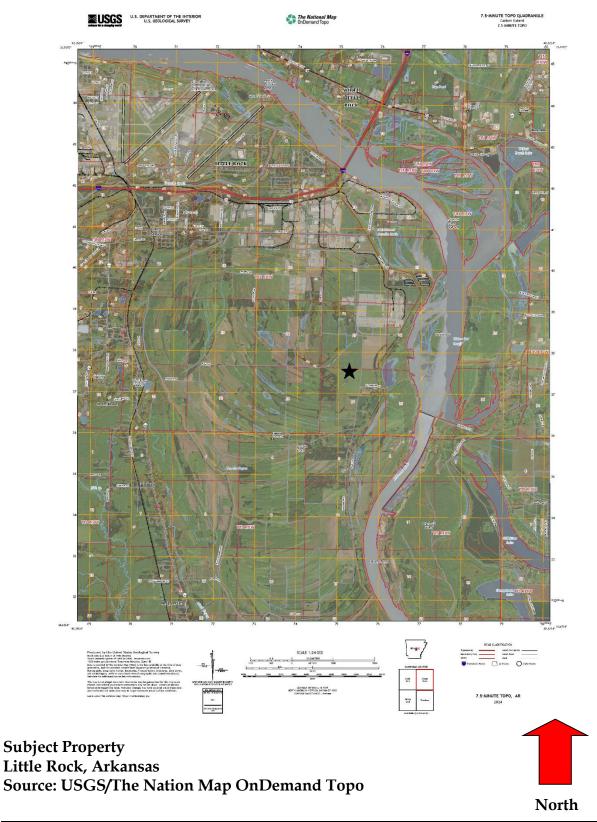

The report may be distributed and relied upon by Little Rock Port Authority and their successors and assigns. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by ECCI.

3.0 Site Description

3.1 Location and Legal Description

The subject property is located on the south side of Thibault Road in Little Rock, Arkansas. The property is comprised of approximately 965 acres and is currently being used for a variety of land uses, i.e., primarily agricultural land, some undeveloped property, residential property, a commercial topsoil/dirt mining area, and a Federal Aviation Administration VORTAC facility.

A legal description was not provided. The general location of the property is depicted in Figure 3-1, Topo Map with Aerial overlay of Site Location & Surrounding Properties, and the site layout can be seen in Figure 3-2, Aerial Photograph with site boundary.

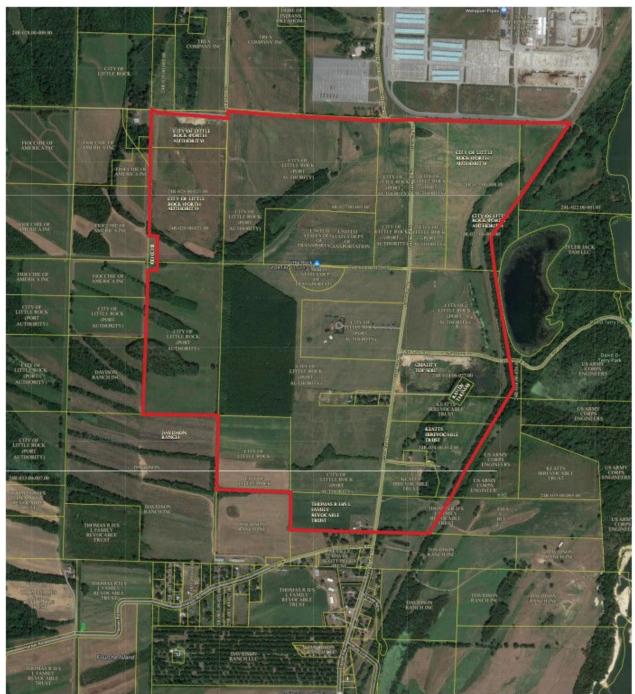

Figure 3-2 – Aerial Photograph with Site Boundary

Subject Property Little Rock, Arkansas Source: Little Rock Port Authority

3.2 Site and Vicinity General Characteristics

This 965-acre subject property is located in Pulaski County southeast of the city of Little Rock, Arkansas. The property lies just south of The Little Rock Port Authority. The Port Authority houses several active industrial manufacturing and industrial properties. In addition to the Little Rock Port Authority itself, the vicinity of the subject property can be generally described as primarily containing agricultural and undeveloped land, along with relatively few residential and commercial properties, as well as the recreational and commercial opportunities provided by the Arkansas River.

3.3 Current Use of the Property

The subject property, consisting of multiple parcels and totaling ~ 965 acres, currently has several uses. The majority of the acreage within the subject property is active agricultural land (both cattle pasture and cropland). A tract of undeveloped forest land lies near the central portion of the project area. Remaining undeveloped forested areas, scattered throughout the subject property, are primarily associated with wetlands and/or drainageways. Several residential properties, including both inhabited and abandoned properties, are located within the subject property. One former (now abandoned) commercial topsoil/dirt mining area is located near the northwest portion of the subject property. One commercial topsoil/dirt mining area is located in the east central portion of the subject property (although one piece of earth moving equipment and one pump were observed onsite, earth-moving work in the area appears to have recently ceased.) Finally, a Federal Aviation Administration VORTAC facility is located near the central portion of the subject property.

3.4 Descriptions of Structures, Roads, Other Improvements on the Site

A Federal Aviation Administration VORTAC facility is located near the central portion of the subject property. The VORTAC facility is a single structure consisting of a building topped with a transmitter. The facility transmits two radio signals, a reference signal and a variable signal, that aid in aviation navigation. Several single-family residential homes, along with various outbuildings, shops, and several semi-trailers (used for residential storage) are present within the subject property. Access was not provided to the majority of the residential properties. Access to outbuildings was provided at the western most homesite on Young Road and the homesite just west of Frazier Pike at the southern subject property boundary.

The property lies immediately south of Thibault Road. A portion of Frazier Pike, located in the eastern half of the subject property and extending north/south, bisects the subject property. The western extent of West Damsite Road begins within the subject property, at its intersection with Frazier Pike, and extends to the east, exiting the subject property at the river levee. Young Road, a residential access gravel road, extends west from Frazier Pike and is entirely located within the subject property. A relatively newly built (less than one year old), unnamed, gated, asphalt road extends south from Thibault Road along the northern portion of the western subject property boundary. In addition to these roadways, a number of farm roads and driveways (of earthen and/or gravel construction) exist within the project area.

Multiple fences and utilities also exist onsite.

Photographs of the subject property are included in Appendix B.

3.5 Site Utilities

Utilities are available in the area.

3.6 Current Use of the Adjoining Properties

Industrial (Welspun Pipes) and agricultural properties are located north of the subject property. A residential area and agricultural property are located to the south of the subject property. Agricultural and undeveloped properties are located west of the subject property. The eastern boundary of the subject property is the Arkansas River levee. Beyond the levee is agricultural and undeveloped property as well as the Arkansas River, including the Lock and Dam #6 (Terry Dam) and the David Terry recreational Park.

4.0 User Provided Information

4.1 Title Records

The User did not provide ECCI with a commitment for title insurance for the subject property in this Phase I ESA.

4.2 Environmental Liens or Activity and Use Limitations

No records of environmental liens or activity and use limitations were identified as being associated with the property or were provided to ECCI by the user.

4.3 Specialized Knowledge

The user did not provide ECCI with any information related to specialized knowledge of the subject property.

4.4 Relationship of the Purchase Price

The User indicated that the purchase price is fair market value for the subject property.

4.5 Commonly Known or Reasonably Ascertainable Information

The User stated knowledge of past property uses which include residential and farming activities. The User indicated that they do not have any additional commonly known or reasonably ascertainable information about the subject property that is material to recognized environmental conditions in connection with the subject property.

4.6 Owner, Property Manager, and Occupant Information

Much of the property is currently owned by the City of Little Rock Port Authority. The User indicated that the length of ownership is unknown but previous property owners include families with the surnames of Thomas, Selz, and Tyler. Based on interview information members of the Thomas family have occupied the property for more than 50 years. Additional owners of select parcels, based on parcel information provided by the User, include The United States Department of Transportation (the VORTAC facility), Thomas R H/S I. Family Revocable Trust, Keatts Irrevocable Trust, Randy Thomas, and Quality Topsoil. Based on interview information from the User tree parcels near the center of the subject property were formerly owned by Ms. Rosie Bartholomew (who still resides at the property) but has recently been acquired by the City of Little Rock Port Authority.

4.7 Reason for Performing Phase I

ESAs are generally requested to qualify for a landowner liability protection under CERCLA. These protections include the following:

- **Bona Fide Prospective Purchase Liability Protection** a person may qualify as a bona fide prospective purchaser if, among other requirements, such person made "all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices." Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase. The facility must have been purchased after April 11, 2002.
- **Contiguous Property Owner Liability Protection** a person may qualify for the contiguous property owner liability protection if, among other requirements, such person owns real property that is contiguous to, and that is or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such a person conducted all appropriate inquiries at the time of acquisition of the property and did not know or have reason to know that the property was or could be contaminated by a release or threatened release from the contiguous property. The all appropriate inquiries must not result in knowledge of contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the contiguous property owner liability protection.
- Innocent Land Owner Defense a person may qualify as one of three types of innocent landowners: (i) a person who "did not know and had no reason to know" that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who "acquired the facility by inheritance or bequest." To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the innocent landowner defense.

This Phase I ESA and report was prepared by ECCI at the request of Little Rock Port Authority to qualify as a bona fide prospective purchaser for liability protection.

5.0 Records Review

5.1 Standard Environmental Record Sources

ECCI obtains information regarding federal environmental databases from EDR in Southport, Connecticut. These databases contain site-specific information regarding a variety of potential environmental concerns including hazardous waste activities, the operation of aboveground and underground storage tanks, remediation investigations performed by the EPA, and other items. During this search, numerous databases are reviewed to identify sites which are in close proximity to the property and which may present a potential environmental risk to the property. The databases searched are detailed in the EDR Area/Corridor Map Report that presents information identifying any facilities found in the ASTM search radius, including the subject property. For this Phase I ESA, the EDR Area/Corridor Report identified three sites located within the subject property and no additional sites within the 1-mile radius of the subject property boundary. Information for the three identified sites is included in Table 5.1.

A copy of the EDR Area/Corridor Report detailing all databases searched is included in Appendix C.

The sites identified in the EDR Area/Corridor Map database report within the ASTM search distances from the subject property are summarized in Table 5.1 below.

Map and Zip Code Identified Sites	Database Information
Arkansas Best Topsoil	1. FINDS – This site is listed as a large quantity
	generator of hazardous waste. Large quantity
FINDS, ECHO	generators, generate more than 1,000
	kilograms of hazardous waste 1 kg of acutely
	hazardous waste per month. No violations
	were reported.
Little Rock AR VTAC	1. PERMITS - This facility is listed as an active
	facility with a regulated storage tank listed.
PERMITS	

Table 5.1 - Sites Identified in Records Review

Map and Zip Code Identified Sites	Database Information
Quality Topsoil & Dirt Pit	 FINDS – The site has an NPDES permit. No violations are listed by ERD.
FINDS, ECHO	 ECHO – This site has an active industrial stormwater permit. During the past three years, the three-year compliance history reports no violations. No enforcement actions have been reported in the past 10 years.

5.2 Agency File Review/Other Available Records

ECCI conducted a review of the Arkansas Department of Energy and Environment, Division of Environmental Quality (DEQ) permit database for information related to the Arkansas Best Topsoil record. A complaint was filed with DEQ regarding the presence of a topsoil pit in 2003. In 2004 the site was issued with a mining-non-coal permit for topsoil/dirt. The site has a status of released.

ECCI conducted a review of the (DEQ) permit database for information related to the Little Rock AR VTAC record. The site is listed as having an underground regulated storage tank. No leaks are noted. The tank, listed as a gasoline take of steel construction, is listed as permanently out of use as of 1994. A stormwater discharge permit was originally issued for the site in 2007 and the site has an active industrial stormwater permit valid until 6/30/2024. The site has had an open-cut mining permit that recently (May 29, 2024) expired.

ECCI conducted a review of the (DEQ) permit database for information related to the Quality Topsoil & Dirt Pit record. A stormwater discharge permit was originally issued for the site in 2007 and the site has an active industrial stormwater permit valid until 6/30/2024. The site has had an open-cut mining permit that recently (May 29, 2024) expired.

5.3 Fire Department

ECCI did not interview the Little Rock Fire Department to see if they have been to the subject property for any fires or chemical releases. The subject property has been used historically primarily for agricultural and residential uses.

5.4 Health Department

ECCI did not contact the Pulaski Health Unit of the Arkansas Department of Health regarding any responses the department has had at the property.

5.5 Specialized Information, Prior Reports and Other Documentation

ECCI did not use any specialized information, prior reports or other documentation in the preparation of this report.

5.6 Physical Setting Source(s)

The ASTM Standard requires that the USGS Topographic Map for the facility be reviewed as standard practice. The target property address is located in the Sweet Home Arkansas Quadrangle. The map is shown as Figure 3-1 of this report. The property is located at roughly 240 feet above mean sea level.

5.6.1 Surface Water Characteristics

The site investigation and review of the USGS topographic maps found that the property gradient is primarily to the west, although portions of the property gradient are to the east.

5.6.2 Groundwater and Soil Characteristics

Groundwater flow direction and velocity is determined by using sitespecific geologic and soil strata data. Other information, such as geologic age identification, rock stratigraphic unit, and soil characteristic data is also used to determine groundwater characteristics. General groundwater flow for the site is not reported. Due to the proximity to the Arkansas River, it is assumed that groundwater flow is either generally toward the east to the Arkansas River or to the west/south to Fouche Bayou; however, with the results of a hydrologic evaluation, the dept and direction of groundwater flow cannot be determined.

The subject property is located in the Mississippi Embayment physiographic region of Arkansas. Geology in the area of the subject property is primarily Quaternary aged Alluvium (Haley, Boyd R., 1993).

According to the Natural Resources Conservation Service's (NRCS) Web Soil Survey (2019), there are six soil map units (in addition to areas mapped as *Levees* and *Pits, borrow*) occurring within the subject property. The map units are Keo silt loam, 0 to 1 percent slopes, rarely flooded; Moreland silty clay; Norwood silty clay loam; Perry clay, 0 to 1 percent slopes, rarely flooded; Rilla silt loam, 0 to 1 percent slopes; and Rilla silt loam, 3 to 5 percent slopes. The Soil Conservation Service (SCS) describes the Keo soil series as well-drained, level soils found on natural levees. The Keo silt loam is a non-hydric soil with hydric inclusions. The SCS describes the Moreland silty clay as somewhat poorly drained, level soil found on floodplains along the Arkansas River. The Moreland silty clay is a nonhydric soil with hydric inclusions. The SCS describes the Norwood silty clay loam map unit as well drained, level soils found along the Arkansas River. The Norwood silty clay loam is a non-hydric soil with hydric inclusions. The SCS describes the Perry soil series as poorly-drained, level soils found on bottomlands. The Perry clay is a hydric soil with both hydric and non-hydric inclusions. The SCS describes the Rilla silt loam map units as well-drained, level and gently sloping soils found on natural levees. Both the Rilla silt loam, 0 to 1 percent slopes map unit and the Rilla silt loam, 3 to 5 percent slopes map unit are non-hydric soils with hydric inclusions.

5.6.3 Flood Zone Map

ECCI reviewed the Federal Emergency Management Agency (FEMA) floodplain maps for the subject property. FEMA maps the majority of the subject property as shaded and hatched Zone X. This shaded and hatched Zone X is a

20

designation for areas with reduced flood risk due to levee protection. Portions of the northern half of the subject property are mapped as Zone X. Zone X is a designation for areas of minimal flood hazard that are outside the 0.2 percent annula0chance flood. Various portions of the subject property, located along the eastern and western boundaries, are mapped as Zone AE floodplain. Zone AE is a special flood hazard area with base flood elevations or depths determined. The subject property is depicted on the FEMA Flood Plain Panels 05119C0490G and 05119C0495G. The National Wetland Inventory depicts several wetland features within the subject property. A Section 404 delineation report of the subject property was previously prepared and is available under separate cover.

5.7 Historical Use Information on the Property

The subject property is located in Pulaski County southeast of the city of Little Rock, Arkansas. Based upon resources reviewed the property was primarily in agricultural use since prior to 1937 (earliest available aerial photograph). The 1937 and subsequent aerial photographs show various structures that appear to be agricultural related and residential housing structures scattered throughout the subject property. For this report, ECCI utilized historical topographic maps, aerial photos, and other information from EDR and DEQ.

5.7.1 Aerial Photographs

Historical aerial photos dating back to 1937 depict the character of the site and surrounding areas. Copies of the aerial photographs received from EDR are included in Appendix D. A brief description of each aerial photograph is presented in Table 5.2 below.

Year	Description
	The subject property is depicted as being primarily in agricultural use, with various
	structures that appear to be agricultural related and residential housing structures
1937, 1940	scattered throughout the subject property. Surrounding properties to the north, west,
and 1943	and south are similar to the subject property. The area to the east includes a mix of
	agricultural, undeveloped, and aquatic land. Primarily roadways within and
	surrounding the property remain generally similar throughout his period.
1949, 1955,	The subject property and surrounding areas are still primarily being used as indicated
1960, 1970,	above. The VORTAC appears to have been installed between 1943 and 1949.
1974, and	
1983	
	The subject property and surrounding areas are still primarily being used as indicated
1994 and	above. A new home site near the central portion of the subject property was developed
2001	between 1983 and 1994. There are more residential structures on the properties to the
	south.
	The majority subject property and surrounding areas are still primarily being used as
2006, 2010,	indicated above. Dirt removal activities in the northwest and east-central portions of
2015, and	the subject property were initiated between 2001 and 2006. Additionally, by 2006, an
2019	industrial facility has been developed on an adjacent property to the northeast of the
	subject property, with industrial facility operations expanding through the years.

5.7.2 Topographic Map

Historical topographic maps dated back to 1891 were available and were reviewed for this Phase I ESA. Copies of the topographic maps produced by the USGS were received from EDR. These maps can be found in Appendix D. A brief description of these maps is presented in Table 5.3 below.

Table 5.3 - Topographic Map Description

Year	Description
1891 and 1893	These maps are the Little Rock 30-minute maps. EDR has tried to locate the subject property on these maps. Several roadways and aquatic resources are depicted within and surrounding the subject property on both maps. The subject property and surrounding properties appear vacant.
1935, 1945, and 1946	This is the Sweet Home 7.5-minute map. The subject property and Fraizer Pike are visible. Additional other travelways (farm roads) and aquatic features are illustrated. There are a number of structures noted within the subject property and on adjacent properties. Named structures include Zion Wheel Church, Antioch Church, and Browns Store. The subject and surrounding properties are depicted mostly as undeveloped/vacant.

Year	Description
1954	These maps are the Sweet Home 7.5-minute maps and are similar to previous years, with a few changes in depicted structures. Additionally, the two churches and the store are no longer noted. However, radio towers are noted in the northeastern portion of the subject property and Browns Gin is named near the southern subject property boundary.
1961	These maps are the Sweet Home 7.5-minute maps and are similar to previous years, with a few changes in depicted structures, Browns Gin no longer noted, and additional radio towers are noted in the northeastern portion and central portions of the of the subject property.
1970	These maps are the Sweet Home 7.5-minute maps and are similar to previous years, with a few changes in depicted structures, the radio towers in the northeast are no longer noted, with the only radio tower depicted is one near the central proton of the subject property. Additionally, David D Terry Public Use Area is noted to the east of the subject property.
1986, 1994	These maps are the Sweet Home 7.5-minute maps and are similar to previous years, with a few changes in depicted structures, the radio tower depicted near the central proton of the subject property is no longer named and in the same area the Air Navigation Tower is now depicted.
2014, 2017 and 2020	This is the Sweet Home 7.5-minute map. These maps do not depict structures, only roads, water, and contours.

5.7.3 Sanborn Fire Insurance Maps

Fire Insurance Maps were produced for urban areas since the late 1800s and were utilized for determining fire hazards. When available, these maps are reviewed for further documentation concerning the historical use of the Property and surrounding area. Sanborn fire insurance maps were unavailable for the subject property. A copy of the Sanborn Fire Insurance Map report from EDR is presented in Appendix D.

5.8 City Directories

City Directories are a screening tool designed to evaluate potential liability on a target property resulting from past activities at their facility and nearby sites. The City Directory Report includes a search of available city directory data at varying intervals. The City Directories Report on Fraizer Pike listed the Radah Madhva Temple, Welspun Pipes, Inc., Welspun Tulular, LLC, WPCM Purchase, Oneal Steel, Delta Plastics of the South, Ring Container Technologies, J&M Foods, Quality Top Soil & Farms, Best Foods, Unilever Best Foods , Hormel Foods, Skippy Peanut butter, Hickinbotham Flight Department, Omni Air Express, Omni Air Charter, Sky Travel Avionics, Inc., C&S Restaurant, C&C Restaurant, Petes Grocery, College Station Clinic, Jefferson Comprehensive Care System, Pulaski County Health Units, Pilgrim Rest Baptist Church No 4, Wheatland Tube, Co, Vinal Building Products, Inc., Wes Pak, Inc., Beaver Creek Farms, Inc., Phelps Pecan Pharmacy, Riverside Transport and Repair, Inc., Clarke American, TCBY Flight Division, College Station Barber Shop, Dog House Liquor, Big E Restaurant, Comprehensive Child Development Program, Hospitality Engraving, Harris All Weather Construction, H&H Trailer Repair Inc., Common Cents Flight Training, Little Rock College Station, Clarke Checks, Overnite Transport, Dobbins Used Cars, CLB Barber Shop, Freddies Café, Southern Transport, Omega Tube & Conduit, CPC Internation, Little Rock Mud DG, and residential listings in the surrounding area. The City Directors Report on Thibault Road listed Arkana Motor Express, Inc., AAA Cooper Transportation, Balcones Fuel Technology, Balcones Resources, Inc., Balcones Recycling, Green Rock, Griffin Industries, MackVolvo Truck Parts, Natural State Recycling, National By Products, Inc., Pinnacle Records Management, Darling Ingredients, Fleetpride, Tri-State Truck Center, Inc., Tristate Mack, Inc., Tristate Thermo Kings, Inc., Herman Binz & Sons Irons Works, Center Arkansas Deli, Yourga Trucking, Quality Truck & Trailer Repair, Energy Arkansas, Truck Transport, Southern Gulf Trucking, Inc., National Lease, Fixed Assets Lease, Griffin Building, and residential listings in the surrounding area. The City Directories Report on Damsite Road had no listings. A copy of the City Directory Report for that property is presented in Appendix D.

5.9 Historical Use Information on Adjoining Properties

It appears that the subject property was used primarily for agricultural purposes since at least 1937. The immediately adjacent properties include agriculture, residential, undeveloped, and industrial areas. The industrial area is to the north, with an industrial facility development beginning adjacent to the subject property in the early 2000s.

6.0 Site Reconnaissance

6.1 Methodology and Limiting Conditions

Archival research, interviews, and visual site inspections were used to obtain the necessary information for preparation of this Phase I ESA. During the visual inspection, ECCI personnel used information gathered from the archival research to identify possible recognized environmental conditions. Features inspected included: structures, ditches, drains, soils, and vegetation. The visual inspection also observed adjoining properties to identify potential sources of contamination that might have migrated or could migrate onto the subject property.

6.2 General Site Setting

On May 28, 2024 Jimmy Rogers visited the subject property located in Little Rock, Arkansas. The purpose of the site visit was to visually and physically observe the property and any structures located on the subject property. During the site reconnaissance, ECCI observed the current condition of the property. The observed conditions are described below.

The subject property currently exists primarily as agricultural land with some undeveloped land, residential property, and a commercial topsoil facility. The property to the north includes agricultural land and an industrial facility. The property to the east includes agricultural land, undeveloped land, thence the Arkansas River. The property to the south includes agricultural land and residential property. The property to the west includes agricultural land and undeveloped land. There are roadways within and adjacent to the subject property. There are utility easements including electrical and water within the subject property.

The observations and findings are further noted below. Photographs of the subject property are included in Appendix B.

6.3 Site Reconnaissance Observations

Table 6.1 identifies potential environmental concerns noted during the site

reconnaissance. Discussion of these items is presented in the following sections.

Description	Observation		Additional
	Yes	No	Information
Hazardous Substances/Petroleum Products		Х	
Storage Tanks (AST and UST)/Boilers	Х		6.3.1
Odors		X	
Pools of Liquid	Х		6.3.2
Drums	Х		6.3.3
Landfills		X	
Unidentified Substances Containers	Х		6.3.4
Potential PCB Equipment		Х	6.3.5
Pits, Ponds, Lagoons, and Surface	x	(2)	
Impoundments			6.3.6
Stained Concrete, Soil or Pavement		X	
Stressed Vegetation		X	
Solid Waste	Х		6.3.7
Wastewater		X

Septic Systems		Х	
Trenches and Sumps		Х	
Drains and Pipes		Х	
Hydraulic Equipment	Х		6.3.8
Other		Х	

Table 6.1 - Site Reconnaissance Observations

6.3.1 Storage Tanks (AST and UST) / Boilers

A mobile pump with a fuel tank was observed adjacent to an inundated excavated area at the Quality Top Soil property. Liquid propane tanks were observed at the VORTAC and a residential property near the southern portion of the subject property. No spills or staining were observed around the tanks. The observed tanks are not a REC.

6.3.2 Pools of Liquid

No standing water was noted on the subject property other than ponds, excavated areas, stream channels, ditches, and wetlands.

6.3.3 Drums

No drums with potential hazardous contents were noted on the subject property. Several 55-gallon drums (of various construction and having previously contained various [including a VP Racing Fuels drum] and unknown substances, were noted); these drums are empty of original contents and are used as residential burn/trash barrels. The observed drums are not RECs.

6.3.4 Unidentified Substances Containers

Several unidentified substance containers were noted during the site reconnaissance at residential properties. The observed containers were <5 gallons and are considered for household use. The observed unidentified substance containers are not RECs.

6.3.5 Potential PCB Equipment

Several electrical transformers were observed onsite. These transformers appear to be newer (post 1979) construction and therefore are anticipated to not contain PCBs. No leaking or soil staining was observed at transformer locations. No other potential PCB containing equipment was observed.

6.3.6 Pits, Ponds, Lagoons, and Surface Impoundments

Two man-made ponds were observed within the project area. The Quality Top Soil property and former top soil excavation area have excavated pits that are inundated. These ponds and excavated pits are not RECs.

6.3.7 Solid Waste

Solid waste was noted along roadsides, in a farm ditch, at a former agricultural equipment area, at the Quality Top Soil property, and at residential properties within the project area. Waste along roadsides include discarded items such as single use plastic food and beverage containers. One area along a roadside had roofing construction waste including wood and shingles. Waste in the farm ditch included discarded trash items and tires. Waste at the former agricultural equipment area (a dilapidated storage shed) included tires. Waste at the Quality Top Soil property included building construction waste such as concrete, tiles, rebar, and miscellaneous debris as well as concrete fill material and discarded/damaged piping. Waste at residential properties included various household trash. The observed waste is not a REC.

6.3.8 Hydraulic Equipment

A single piece of hydraulic equipment, a tracked Caterpillar dozer, was observed at the Quality Top Soil Site. No leaks or spills from the equipment were observed. This equipment is not a REC.

7.0 Interviews

The purpose of the interviews conducted during the development of the ESA is primarily to support information obtained during this project.

7.1 Interview with Historical Owner's Representative, Site Manager, Occupant

For this Phase I ESA, ECCI interviewed Mr. Bryan Day, owner representative of select parcels within the property and User for the purposes of this report. The information provided by Mr. Day was used throughout this report. This site User completed the Phase I questionnaire contained within Appendix D.

For this Phase I ESA, ECCI interviewed Ms. Rosie Bartholomew, resident and former owner of select parcels within the property. Ms. Bartholomew denied access to parcels of land where she resides. Ms. Bartolomew stated that there are no known hazardous substances on the property. Ms. Bartholomew was provided but did not return a Phase I questionnaire.

For this Phase I ESA, ECCI interviewed Mr. and Mrs. Ricky Thomas, residents and owners of select parcels within the property. The Thomases provided access to structures outside the house and stated that there are no known hazardous substances on the property. Additionally, The Thomas family has a long-term association with the property and knows of no historic site activities likely to result in a REC. Ricky Thomas completed a Phase I questionnaire contained within Appendix D. Additionally, Mr. Randy Thomas, associated with the same property was interviewed and knows of no historic site activities likely to result in a REC. Mr. Randy Thomas also completed a Phase 1 questionnaire contained within Appendix D.

7.2 Interviews with Local Government Officials

ECCI did not contact the Little Rock Fire Department to determine if they have responded to any fires or spills onsite. ECCI did not contact the local health department officials.

7.3 Interviews with Local Utilities

The local utilities were not contacted by ECCI for this property.

8.0 Findings, Opinions, and Conclusions

This ESA has been performed in accordance with ASTM "*Phase I Environmental Site Assessment Standards*" (ASTM E1527-13) on the Little Rock Port Authority Supersite, 965- acre tract consisting of multiple parcels, located south of Thibault Road and both east and west of Fraizer Pike in Little Rock, Arkansas. Any exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

During the course of this project, ECCI performed a site reconnaissance, reviewed federal, state, and local records, and interviewed persons familiar with the property to ascertain historical use of the property and surrounding areas. ECCI did not observe any recognized environmental condition, controlled environmental conditions or historical recognized environmental conditions. ECCI did encounter storage tanks, drums, unknown substance containers, pits, solid waste, and hydraulic equipment within select areas of the subject property (see Section 6.3). Tanks, drums, and unknown substance containers were observed to be in good condition with no leaks/spills observed and/or of a small size, i.e., <5 gallons and considered for household use. Pits are excavated from topsoil removal operations. Solid waste does not appear to be hazardous waste. Hydraulic equipment appears to be in good conditions with no leaks/spills observed. Based on site observations of these encountered features, none appear to be RECs. Information on the findings and conclusions can be found in Table 8.1 below. Further descriptions and a summary of the site characteristics can be found in section 6.0.

FINDINGS	SUMMARY	
Little Rock Port Authority Supersite	The property is primarily agricultural land, and also	
	includes undeveloped property, residential property, a	
	commercial topsoil/dirt mining area, and a Federal	
	Aviation Administration VORTAC facility.	
	OPINION AND CONCLUSION:	
_	ECCI did not observe any recognized environmental	
	condition, controlled environmental conditions, or	
	historical recognized environmental conditions.	

8.1 Data Gaps

Data gaps were encountered for multiple years. ECCI has no reason to suspect that site land use was significantly different during the missing years, from that already described, that would have contributed to knowledge of any RECs.

Owner/Operator Questionnaires were not available for owner/operators of all parcels within the subject property. Owner/Operator questionnaires were not available from the following:

- Little Rock Port Authority (as owner of select parcels and User for the purposes of this report Mr. Bryan Day, Executive Director of the Little Rock Port Authority provided a User Questionnaire but did not complete an Owner/Operator questionnaire for the Little Rock Port Authority parcels.)
- Farmer operating production at fields owned by the City of Little Rock Port Authority
- Quality Top Soil
- Keatts Irrevocable Trust
- Selz
- Tyler
- Ms. Rosie Bartholomew (A questionnaire was left with Mr. Bartholomew but was not returned. Mr. Bartholomew was interviewed via a phone call but would not allow access to the property.)

Note: Mr. Bryan Day completed a questionnaire on behalf of the Selz, Tyler, and Bartholmew properties.

Property access was not provided to the Bartholomew and Keatts parcels. The exterior of the VORTAC was observed but access inside the structure was not provided. No attempts were made to access the interior of homes.

8.2 Additional Investigation

ECCI was also asked to prepare a Section 404 delineation report addendum as well as a Threatened & Endangered Species evaluation. Those documents have been provided to the Little Rock Port Authority under separate cover.

9.0 Deviations

This Phase I ESA was performed in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527 -21, "*Environmental Site Assessments: Phase I Environmental Site Assessment*".

10.0 Additional Services

ECCI was not contracted to perform any additional investigation or services regarding the subject property.

11.0 References

The following people, documents, maps or other publications may have been utilized specifically in the preparation of this Phase I ESA Report or generally in the development of the report format. References to specific documents are also provided in appropriate sections of the report.

Persons Contacted:

- Mr. Bryan Day, User/Owner Representative, 501-519-1950
- Ms. Rosie Bartholomew, Occupant, 501-266-9882
- Ricky Thomas, Owner, 501-680-2593
- Randy Thomas, Owner, 501-748-3650

12.0 Environmental Professional Statement

Mr. Jimmy Rogers and Mr. Jeremy Stehle have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all of the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

We declare that, to the best of our knowledge, we meet the definition of environmental *professional* as defined in §312.10 of 40 CFR Part 312. Résumés for these individuals may be found in Appendix A

APPENDIX A Qualifications of Environmental Professionals

Jimmy Rogers

Senior Environmental Scientist

EDUCATION

University of Central Arkansas, BS Environmental Science – Emphasis in Biology 2004

TRAINING/CERTIFICATIONS OSHA24-Hour HAZWOPER Trained Licensed Drone Pilot

PROFESSIONAL HISTORY

ECCI, March 2024 to Present FTN Associates, May 2005 to March 2024

EXPERIENCE

Mr. Rogers has over 19 years of experience as an environmental consultant. Based in central Arkansas and having worked in all surrounding states, Jimmy is experienced in all phases of environmental and ecological studies including project planning, field surveys, data analysis and report preparation. Jimmy has extensive field project experience with stream, wetland, bottomland hardwood, and upland habitats throughout Arkansas; experience directing sub-contractors and sub-consultants (e.g., survey, geotechnical, analytical, archeological, equipment operators, etc.); experience obtaining local, state, and federal environmental permits; experience developing, in whole or in part, a variety of NEPA documents including Categorical Exclusions, Environmental Information Documents, Environmental Assessments, and Environmental Impact Statements; experience preparing and delivering presentations on scientific and regulatory topics to various groups (e.g., Arkansas Environmental Federation, Arkansas Independent Producers and Royality Owners, Arkansas Floodplain Management Association, industrial client groups, etc.).

Mr. Rogers brings many years of biological, Section 404, and NEPA project experience to ECCI. As a respected expert among the environmental community in Arkansas, Jimmy has the experience and years of relationships to successfully navigate specialized areas of environmental approvals/permitting. Jimmy's Clients enjoy excellent communication and a track-record of providing Clients with high quality results within budgets and schedules,

Specialty Skill Areas

- National Environmental Policy Act documentation
- Phase 1 Environmental Site Assessments
- Section 404 Wetlands and Other Waters delineations/permitting
- Water Quality Assessments
- Threatened & Endangered Species evaluations

AFFILIATIONS: Arkansas Environmental Federation-Water Committee Chair

JEREMY STEHLE Sr. Environmental Scientist

EDUCATION

University of Arkansas at Little Rock, Little Rock, Arkansas Wildlife Management/Fisheries Emphasis in Fisheries and Water Quality Graduated May 2009

PROFFESIONAL HISTORY

ECCI, Environmental Scientist, Little Rock, AR, 2010 - Present Arkansas Game and Fish Commission, June 2009 to March 2010

EXPERIENCE

Mr. Stehle serves as a professional environmental scientist for ECCI projects including stormwater management, oil spill control, mining water management, Clean Air Act, Clean Water Act facility compliance systems, provided fiberglass reinforced plastics (FRP) plant equipment on-site inspections and field evaluation of property to identify environmental related issues or assure such issues, are not encountered.

While gaining an understanding of complex regulatory requirements, he has succeeded in providing quality professional environmental compliance assistance to industrial and private facility owners. He has developed on-site Clean Air Act and Clean Water Act compliance assurance procedures and recordkeeping systems to demonstrate immediate and continuous compliance with facility permits and related regulations.

Mr. Stehle serves as lead field evaluator to assess secondary containment system characteristics, and develop workable compliance related recordkeeping and plans. He has served in the lead role on over 30 individual Clean Water Act Oil Spill Control and Countermeasures Plans.

In addition, Mr. Stehle has served as field investigator for multiple individual Environmental Site Assessments (ASTM Phase I ESA's). He has completed record reviews and evaluated known or recognized environmental conditions. He has prepared mining permit applications, evaluated closure and post closure costs and financial assurance mechanisms, and coordinated public notices and communication with regulatory agencies.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/29/2024 Date Data Arrived at EDR: 03/01/2024 Date Made Active in Reports: 03/27/2024 Number of Days to Update: 26 Source: EPA Telephone: N/A Last EDR Contact: 05/01/2024 Next Scheduled EDR Contact: 07/08/2024 Data Release Frequency: Quarterly

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/29/2024 Date Data Arrived at EDR: 03/01/2024 Date Made Active in Reports: 03/27/2024 Number of Days to Update: 26 Source: EPA Telephone: N/A Last EDR Contact: 05/01/2024 Next Scheduled EDR Contact: 07/08/2024 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/29/2024 Date Data Arrived at EDR: 03/01/2024 Date Made Active in Reports: 03/27/2024 Number of Days to Update: 26 Source: EPA Telephone: N/A Last EDR Contact: 05/01/2024 Next Scheduled EDR Contact: 07/08/2024 Data Release Frequency: Quarterly

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023 Date Data Arrived at EDR: 12/20/2023 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 35 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 03/26/2024 Next Scheduled EDR Contact: 07/08/2024 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/22/2024 Date Data Arrived at EDR: 05/01/2024 Date Made Active in Reports: 05/24/2024 Number of Days to Update: 23 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 05/01/2024 Next Scheduled EDR Contact: 07/22/2024 Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/22/2024 Date Data Arrived at EDR: 05/01/2024 Date Made Active in Reports: 05/24/2024 Number of Days to Update: 23 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 05/01/2024 Next Scheduled EDR Contact: 07/22/2024 Data Release Frequency: Quarterly

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/04/2023	Source: EPA
Date Data Arrived at EDR: 12/06/2023	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 03/19/2024 Next Scheduled EDR Contact: 07/01/2024 Data Release Frequency: Quarterly

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 03/19/2024 Next Scheduled EDR Contact: 07/01/2024 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 03/19/2024 Next Scheduled EDR Contact: 07/01/2024 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 04/29/2024 Next Scheduled EDR Contact: 08/12/2024 Data Release Frequency: No Update Planned

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 05/02/2024 Next Scheduled EDR Contact: 08/12/2024 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2020 Date Data Arrived at EDR: 06/14/2022 Date Made Active in Reports: 03/24/2023 Number of Days to Update: 283 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 03/14/2024 Next Scheduled EDR Contact: 06/24/2024 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2022 Date Data Arrived at EDR: 11/13/2023 Date Made Active in Reports: 02/07/2024 Number of Days to Update: 86 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 05/16/2024 Next Scheduled EDR Contact: 08/26/2024 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

RGA LF: Recovered Government Archive Solid Waste Facilities List

The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Arkansas.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/16/2014 Number of Days to Update: 199 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

RGA LUST: Recovered Government Archive Leaking Underground Storage Tank

The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Arkansas.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/04/2014 Number of Days to Update: 187 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by ECCI were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities.EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk,Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

. .

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Certified Sanborn® Map Report

6 Armstrong Road, 4th floor Shelton, CT 06484 Toll Free: 800.352.0050 www.edrnet.com

O5/28/24Site Name:Client Name:Little Rock Port Authority - SupECCIFrazier Pike13000 Cantrell RoadLittle Rock, AR 72206Little Rock, AR 72223EDR Inquiry # 7663914.3Contact: Jimmy Rogers

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ECCI were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results: Certification # A53C-4E87-9229

PO # 4446-3024

Project 4446-3024

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results Certification #: A53C-4E87-9229

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

University Publications of America

EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

ECCI (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Note: User shall complete this	questionnaire.			

PLEASE RESPOND IN GOOD FAITH TO THE EXTENT OF YOUR ACTUAL KNOWLEDGE.

ASTM & HISTORICAL INFORMATION

1. Who was the pr	evious owne	r of the property and	how long did	they own the prope	erty?
UNKNOWN ON	LENGTH	OF OWNERSHIP	, But '	"E"- THOMAS	"C"-SELZ,
JACK THER	"">"-"	READ RAND	1 THON	45, "A"-121	CKY THEMS
/			,	/	

2. Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Note 1: In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and Activity Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place a the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

4. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

5. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

- 6. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:
 - a. Do you know the past uses of the property? Yes No

If yes, please describe: on FARMING SIDENTIAL

b. Do you know of specific chemicals that are present or once were present at the property?
 Yes No

If yes, pléase describe:

c. Do you know of spills or other chemical releases that have taken place at the property? Yes

If yes, please describe:_____

	d.	d. Do you know of any environmental cleanups that have taken place at the property? Yes					
		No[X] If yes, please describe:D					
7.	Based	I on your knowledge and experience related to the property, are there any obvious indicators					
	that p	oint to the presence or likely presence of releases at the property? M					
	in character -

Phase I Owner/Operator Questionnaire

Description of Site - Address

THOMAS - FRAZIER PIKE

ECCI Job Number:

Note: IF OCCUPANT IS DIFFERENT THAN OWNER, THEN BOTH THE MAJOR OCCUPANTS AND THE OWNER MUST COMPLETE SEPARATE QUESTIONNAIRES.

PLEASE RESPOND IN GOOD FAITH TO THE EXTENT OF YOUR ACTUAL KNOWLEDGE.

- 62	QUESTION	OWNER,	OCCUPANT	RESPONSE	COMMENTS
1.	<u>Current Use</u> – Is the property or any adjoining property used for an industrial use? If yes, please explain:	Yes	No	Unknown	Further inquiry would be needed if the industrial use concerned the manufacture of paints, oils, solvents, and other chemicals, but not if the use concerned the storage of inert goods in containers.
2.	Past Use – To the best of your knowledge, has the property or any adjoining property been used for an industrial use in the past? If yes, please explain:	Yes	No	Unknown	Are there any indications present on the property that would cause one to suspect an industrial use may once has existed on the site? Old buildings, pipes, containers, or other debris are indicators of previous industrial use of the site.
3.	<u>Current Use</u> – Is the property or any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, and disposal, processing or recycling facility? If yes, please explain:	Yes	No	Unknown	Gasoline stations, motor vehicle repair facilities, dry cleaners, photo developing laboratories, commercial printing facilities, junkyards or landfills, and waste treatment storage, disposal, processing, or recycling facilities all involve the use of hazardous substances or petroleum products and therefore require further inquiry concerning the possible release of such substances.
4.	Past Use – To the best of your knowledge, has the property or any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility? If yes, please explain:	Yes	NO	Unknown	Gasoline stations, , motor vehicle repair facilities, dry cleaners, photo developing laboratories, commercial printing facilities, junkyards or landfills, and waste treatment storage, disposal, processing, or recycling facilities all involve the use of hazardous substances or petroleum products and therefore require further inquiry concerning the possible release of such substances.

	QUESTION	OWNER/	OCCUPANT	RESPONSE	COMMENTS
5.	Are there currently, or to be best of your knowledge have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints or other chemicals in individual containers of greater than 5 gallons in volume of 50 gallons in the aggregate, stored on or used at the property or at the facility?	Yes		Unknown	If the answer to this question is "yes," list the items and the location(s) where they are stored. If unfamiliar with the contents of any container located on the site, the question must be answered "yes" until the materials are identified.
lf ar	nswer to Question #5 is yes, complete the follow				
	Item	3	itorage Loca	luon	Evidence of Leakage? Yes or No
6.	Are there currently, or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallons) or sacks of chemicals located on the property or at the facility?	Yes	No	Unknown	Chemicals are frequently stored in 55- gallon drums and dry chemicals are often stored in 20-pound sacks.
lf ar	nswer to Question #6 is yes, complete the follow				
	Item	S	itorage Loca	ition	Evidence of Leakage? Yes or No
7.	Has fill dirt been brought onto the property that originated from a contaminated site or that is of an unknown origin? If yes, please explain:	Yes	No	Unknown	If any structures have been demolished on the property, investigate whether the structures were demolished in place and fill dirt compacted over them because such demolition debris may contain asbestos or hazardous substances.
8.	Are there currently, or to the best of your knowledge have there been previously, any pits, ponds or lagoons located on the property in connection with waste treatment or waste disposal? If yes, please explain:	Yes	No	Unknown	The presence of pits, ponds, or lagoons, together with waste treatment or waste disposal may indicate contaminated property.
9.	Is there currently, or to the best of your knowledge, has there been previously, any stained soil on the property? If yes, please explain:	Yes	No	Unknown	Stained soils are frequently associated with contamination and often are an indication of either current or previous leakage associated with piping and liquid storage containers.
10.	Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (aboveground or underground) located on the property? If yes, please explain:	Yes	No	Unknown	Tanks are often used to store heating fuels, chemicals, and petroleum products.
11.	Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property? If yes, please explain:	Yes	No	Unknown	Vent or fill pipes often signal the current or previous existence of underground storage tanks. Additionally, consider the presence of any asphalt or concrete patching that would indicate the possibility of previous underground storage tank removal.
12.	Are there currently, or to the best of your knowledge have there been previously, any flooring, drains or walls located within the facility that are stained by substances other than water or are emitting foul odors? If yes, please explain:	Yes	No	Unknown	Stains (other than water stains) or foul odors may indicate leaks of hazardous substances. Floor drains located within a building adjacent to hazardous substance storage areas or connected to an onsite disposal system (e.g., septic system) present a potential source of subsurface discharge of contaminants.

	QUESTION	OWNER/	OCCUPANT	RESPONSE	COMMENTS
13.	If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water systems or has the well been designated as contaminated by any government environmental/health agency? If yes, please explain:	Yes	No	Unknown	If the system is private, it probably has been tested for contamination or evidence that it is free from contamination, and the results of any such tests should be produced by the owner or occupant of the well.
14.	Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property? If yes, please explain:	Yes	(No)	Unknown	If the answer to this question is "yes," further inquiry is needed.
15.	Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property or any facility located on the property? If yes, please explain:	Yes	No	Unknown	Consider whether any environmental professionals familiar with hazardous substances or petroleum products have observed or determined the contamin- ation existed on the property.
16.	Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property. If yes, please explain:	Yes	No	Unknown	As part of further inquiry, copies of reasonably ascertainable prior environmental site assessments of the property or any portion therefore should be obtained and examined to determine whether further action or inquiry is necessary in connection with any environmental problems raised by a prior environmental site assessment.
17.	Does the owner or occupant of the property know if any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property? If yes, please explain:	Yes	No	Unknown	This question is to be answered by the owner or occupant based upon their respective actual knowledge and review of reasonably ascertainable records in their possession.
18.	Does the property discharge wastewater on or adjacent to the property into a sanitary sewer system? If yes, please explain:	Yes	(No	Unknown	The owner and occupant should be asked where the drain traps lead and the purpose of drainage pipes at the facility. Wastewater does not include a reference to domestic sewage or stormwater. Oil/water separators are most often found outside a building under a manhole and require routine servicing to remove oil. Oil/water separators are usually in restaurants, repair garages, and service stations.
19.	To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the property? If yes, please explain:	Yes	No	Únknown	Past waste disposal practices should be examined because these may have resulted in hazardous substances or petroleum products being released on the property. Does the property evidence any mounds or depressions that suggest a disposal site?

20.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs? If yes, please explain:	Yes	No	Unknown	Transformers, elevators and auto lifts are often run by hydraulically controlled systems containing PCBs. If inspection or maintenance records indicate that no releases have occurred or that regular, scheduled maintenance has taken place and the machinery does not appear to be damaged or leaking, no further inquiry is required.
-----	--	-----	----	---------	---

You will most likely be contacted to meet with an ECCI employee in order to complete a site assessment. At the time of ECCI's site visit, it would most helpful if you could supply information on the following (if applicable):

	QUESTION	OWNER/	OCCUPANT	RESPONSE	COMMENTS
1.	<u>Current Use</u> – Is the property or any adjoining property used for an industrial use? If yes, please explain:	Yes	No	Unknown	Further inquiry would be needed if the industrial use concerned the manufacture of paints, oils, solvents, and other chemicals, but not if the use concerned the storage of inert goods in containers.
2.	Past Use – To the best of your knowledge, has the property or any adjoining property been used for an industrial use in the past? If yes, please explain:	Yes	89	Unknown	Are there any indications present on the property that would cause one to suspect an industrial use may once has existed on the site? Old buildings, pipes, containers, or other debris are indicators of previous industrial use of the site.
3.	<u>Current Use</u> – Is the property or any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, and disposal, processing or recycling facility? If yes, please explain:	Yes	We	Unknown	Gasoline stations, motor vehicle repair facilities, dry cleaners, photo developing laboratories, commercial printing facilities, junkyards or landfills, and waste treatment storage, disposal, processing, or recycling facilities all involve the use of hazardous substances or petroleum products and therefore require further inquiry concerning the possible release of such substances.
4.	Past Use – To the best of your knowledge, has the property or any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility? If yes, please explain:	Yes	No	Unknown	Gasoline stations, , motor vehicle repair facilities, dry cleaners, photo developing laboratories, commercial printing facilities, junkyards or landfills, and waste treatment storage, disposal, processing, or recycling facilities all involve the use of hazardous substances or petroleum products and therefore require further inquiry concerning the possible release of such substances.

	QUESTION	OWNER/	OCCUPANT	RESPONSE	COMMENTS
5.	Are there currently, or to be best of your knowledge have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints or other chemicals in individual containers of greater than 5 gallons in volume of 50 gallons in the aggregate, stored on or used at the property or at the facility?	Yes	NO	Unknown	If the answer to this question is "yes," list the items and the location(s) where they are stored. If unfamiliar with the contents of any container located on the site, the question must be answered "yes" until the materials are identified.
lt ar	nswer to Question #5 is yes, complete the follow Item	and the second se	itorage Loca	ation	Evidence of Leakage? Yes or No
6.	Are there currently, or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallons) or sacks of chemicals located on the property or at the facility?	Yes	No	Unknown	Chemicals are frequently stored in 55- gallon drums and dry chemicals are often stored in 20-pound sacks.
lf ar	nswer to Question #6 is yes, complete the follow		•		
	Item	5	torage Loca	ation	Evidence of Leakage? Yes or No
7.	Has fill dirt been brought onto the property that originated from a contaminated site or that is of an unknown origin? If yes, please explain:	Yes	\$6	Unknown	If any structures have been demolished on the property, investigate whether the structures were demolished in place and fill dirt compacted over them because such demolition debris may contain asbestos or hazardous substances.
8.	Are there currently, or to the best of your knowledge have there been previously, any pits, ponds or lagoons located on the property in connection with waste treatment or waste disposal? If yes, please explain:	Yes	NO	Unknown	The presence of pits, ponds, or lagoons, together with waste treatment or waste disposal may indicate contaminated property.
9.	Is there currently, or to the best of your knowledge, has there been previously, any stained soil on the property? If yes, please explain:	Yes	No	Unknown	Stained soils are frequently associated with contamination and often are an indication of either current or previous leakage associated with piping and liquid storage containers.
10.	Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (aboveground or underground) located on the property? If yes, please explain:	Yes	30	Unknown	Tanks are often used to store heating fuels, chemicals, and petroleum products.
11.	Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property? If yes, please explain:	Yes	No	Unknown	Vent or fill pipes often signal the current or previous existence of underground storage tanks. Additionally, consider the presence of any asphalt or concrete patching that would indicate the possibility of previous underground storage tank removal.
12.	Are there currently, or to the best of your knowledge have there been previously, any flooring, drains or walls located within the facility that are stained by substances other than water or are emitting foul odors? If yes, please explain:	Yes	NO	Unknown	Stains (other than water stains) or foul odors may indicate leaks of hazardous substances. Floor drains located within a building adjacent to hazardous substance storage areas or connected to an onsite disposal system (e.g., septic system) present a potential source of subsurface discharge of contaminants.

-	QUESTION	OWNER	OCCUPANT	RESPONSE	COMMENTS
13.	If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water systems or has the well been designated as contaminated by any government environmental/health agency? If yes, please explain:	Yes	NO	Unknown	If the system is private, it probably has been tested for contamination or evidence that it is free from contamination, and the results of any such tests should be produced by the owner or occupant of the well.
14.	Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property? If yes, please explain:	Yes	No	Unknown	If the answer to this question is "yes," further inquiry is needed.
15.	Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property or any facility located on the property? If yes, please explain:	Yes	NO	Unknown	Consider whether any environmental professionals familiar with hazardous substances or petroleum products have observed or determined the contamin- ation existed on the property.
16.	Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property. If yes, please explain:	Yes	No	Unknown	As part of further inquiry, copies of reasonably ascertainable prior environmental site assessments of the property or any portion therefore should be obtained and examined to determine whether further action or inquiry is necessary in connection with any environmental problems raised by a prior environmental site assessment.
17.	Does the owner or occupant of the property know if any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property? If yes, please explain:	Yes	No	Unknown	This question is to be answered by the owner or occupant based upon their respective actual knowledge and review of reasonably ascertainable records in their possession.
18.	Does the property discharge wastewater on or adjacent to the property into a sanitary sewer system? If yes, please explain:	Yes	UVO	Unknown	The owner and occupant should be asked where the drain traps lead and the purpose of drainage pipes at the facility. Wastewater does not include a reference to domestic sewage or stormwater. Oil/water separators are most often found outside a building under a manhole and require routine servicing to remove oil. Oil/water separators are usually in restaurants, repair garages, and service stations.
19.	To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the property? If yes, please explain:	Yes	ivo	Ünknown	Past waste disposal practices should be examined because these may have resulted in hazardous substances or petroleum products being released on the property. Does the property evidence any mounds or depressions that suggest a disposal site?

١.

20.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs? If yes, please explain:	Yes	No	Unknown	Transformers, elevators and auto lifts are often run by hydraulically controlled systems containing PCBs. If inspection or maintenance records indicate that no releases have occurred or that regular, scheduled maintenance has taken place and the machinery does not appear to be damaged or leaking, no further inquiry is required.
