Re: Phase I Environmental Site Assessment  
AR Site Selection-CCIC McClellan Site  
McClellan Boulevard  
Arkadelphia, Clark County, Arkansas  
Terracon Project No. 35247088

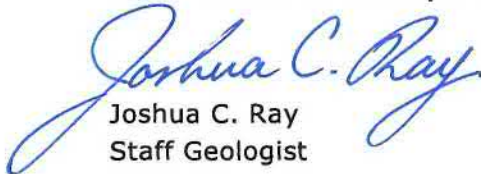

Dear Ms. Short:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced subject property (hereinafter known as the 'site'). This assessment was performed in accordance with Terracon Proposal P35247088 dated March 21, 2024.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide other environmental, geotechnical, construction materials, and facilities services on a wide variety of projects locally, regionally, and nationally. For more detailed information on all of Terracon's services please visit our website at [www.terracon.com](http://www.terracon.com). If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

**Terracon Consultants, Inc.**

APPENDIX D Environmental Database Information

APPENDIX E Credentials

APPENDIX F Description of Terms and Acronyms

## EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal P35247088 dated March 21, 2024, and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. The ESA was conducted under the supervision or responsible charge of C. Rand Raglin, Environmental Professional. Josh Ray performed the site reconnaissance on April 15, 2024.

### Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

### Site Description and Use

The site is an approximate 4.5-acre parcel of land (parcel #01-05472-00) located along the south side of McClellan Blvd, Arkadelphia, Clark County, Arkansas. The site is vacant pasture and woods.

### Historical Information

The site has apparently been pastureland and woods dating back to at least the 1950s. The area surrounding the site was mostly vacant land until commercial/industrial development of the area began in the 1980s. Recognized environmental conditions (RECs) were not identified based on review of readily available historical information.

### Records Review

The site was not identified in regulatory records review. Several facilities in the site vicinity were listed in the database report; however, these facility listings do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

### Site Reconnaissance

During the site reconnaissance, Terracon observed the site to be vacant land. Terracon did not identify RECs based on the site reconnaissance.

## Adjoining Properties

The site is adjoined by the following:

- North- McClellan Blvd. followed by vacant, grassed land
- East- Undeveloped, wooded land followed by Siplast Liquid Resin Roofing/Waterproofing
- South- Field developed with solar panels
- West- Arkadelphia Water Utility Storage/office building, followed by Clark County building (35 McClellan)

## Significant Data Gaps

Significant data gaps (SDGs) were not identified for this ESA.

## Additional Services

As requested by the client, the following additional services were performed:

- Wetland Records Review

Terracon's desktop review of topographic map and National Wetland Inventory (NWI) map resources identified the presence of a riverine area along the east site boundary. Please note that there may be wetlands not identified on the resources reviewed. This Limited Wetland Review does not constitute a formal determination and/or delineation of a potentially jurisdictional wetland, which requires (among other procedures) a formal field investigation including hand-dug soil stations with vegetation and hydrologic indicators identification, as set forth in *1987 Corps of Engineers Wetland Delineation Manual* and further amended by the applicable *Regional Supplements to the Corps of Engineers Wetland Delineation Manual*.

To obtain a formal determination from the USACE regarding jurisdictional status, a wetland/waters of the U.S. delineation could be conducted by a wetland scientist and submitted to the USACE (or in certain geographies the participating state agency) for a jurisdictional determination. Note that the USACE is not required to respond to determination requests within a particular timeframe unless the submittal also includes a permit application.

- Historic Properties/Archaeological Resources Review

Three previous archeological investigations are located intersecting the project area and within the search radius. Based on our desktop research, no previously recorded historic resources are located within the project area.

Section 106 of the National Historic Preservation Act (NHPA) applies to projects with a federal nexus. Terracon understands that there is no federal involvement in the project at this time. If a federal nexus is identified, the completion of a cultural resources survey would be a potential requirement for meeting Section 106 obligations. If the project were to trigger compliance with Section 106 of the National Historic Preservation Act of 1966, as amended, by needing a federal permit, license, money, or approval, or if compliance with other applicable state or local cultural resource laws was required, then consultation with the State Historic Preservation Office (SHPO) and other consulting/interested parties would be required. A cultural resources survey could also be performed regardless of nexus to further assess the site for potential cultural resources.

## Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E1527-21 at CCIC McClellan Site, located along the south side of McClellan Blvd, Arkadelphia, Clark County, Arkansas, the site. Recognized Environmental Conditions (RECs), Controlled RECs (CRECs) and/or Significant Data Gaps (SDGs) were not identified in connection with the site.

## Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon did not identify RECs, CRECs, or SDGs in connection with the site. As such, no additional investigation is warranted at this time.

# 1.0 INTRODUCTION

## 1.1 Site Description

Site Name	AR Site Selection-CCIC McClellan Site
Site Location/Address	Near McClellan Blvd, Arkadelphia, Clark County, Arkansas
Land Area	Parcel #01-05472-00, total approximately 4.5 acres
Site Improvements	None, site is vacant pasture and woods
Anticipated Future Site Use	Develop for industrial use
Reason for the ESA	Lease/Economic Development

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

## 1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal P35247088 dated March 21, 2024, and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. Recognized environmental conditions are defined by ASTM E1527-21 as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." A de minimis condition is not a recognized environmental condition.

This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews (including local government inquiries, as applicable), and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

As requested by the client, the following additional services were performed:

- Wetland Records Review

■ Historic Properties/Archaeological Resources Review

### 1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

### 1.4 Additional Scope Limitations, ASTM Deviations, and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- Historical information was not provided back to 1940 or first developed use. Uses of the site were described as far back as 1959, at which time the site was vacant land. Based on information obtained for this ESA, this is not considered a significant data gap.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances, petroleum products or PFAS compounds may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

## 1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of Economic Development Corporation of Clark County. Use or reliance by any other party is prohibited without the written authorization of Economic Development Corporation of Clark County and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Agreement for Services. The limitation of liability defined in the Agreement for Services is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-21 Section 4.6. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-21.

## 1.6 Client Provided Information

Prior to the site visit, Shelley Short, client’s representative, was asked to provide the following user questionnaire information as described in ASTM E1527-21 Section 6.

### Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client’s Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.			X
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.			X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.			X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X
Obvious Indicators of Releases at the site.			X

Terracon’s consideration of the client provided information did not identify RECs. A copy of the questionnaire is included in Appendix C.

## 2.0 PHYSICAL SETTING

Physical Setting Information		Source
<b>Topography</b>		
Site Elevation	Approximately 230-240 feet above sea level	Arkadelphia, Arkansas, United States Geological Survey (USGS) Topographic Map, Dated 1976 (Appendix A)
Topographic Gradient	Sloping east/southeast	
Closest Surface Water	Unnamed intermittent stream that flows into Waggle Creek, approximately 100 feet east of the site.	
<b>Soil Characteristics</b>		

Physical Setting Information		Source
Soil Type	Houston Clay	Web Soil Survey; United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS); Accessed April 2024.
Description	Houston clays are moderately well drained soils with parent material of clayey marl derived from chalk. Typical profile is clay down to more than 80 inches below ground surface (bgs).	
Geology/Hydrogeology		
Formation	Arkadelphia Marl	Geologic Map of Arkansas, USGS and Arkansas Geological Commission, 1993
Description	Mostly a dark-grey to black marl or marly clay with some limy, gray sandstone, gray sandy clay, sandy limestone, concretionary limestone, and white to brown impure chalk	
Estimated Depth to First Occurrence of Groundwater	Approximately 20-30 feet below grade surface (bgs)	Based on previous Terracon report
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (primarily to the east/southeast).	

\* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### 3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

#### 3.1 Historical Topographic Maps, Aerial Photographs, and Sanborn Maps

Readily available historical USGS topographic maps and selected historical aerial photographs (at approximately 10-to-15-year intervals) were reviewed to evaluate land

development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps and aerial photographs are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn maps were not available for the site.

- Topographic maps: Arkadelphia, Arkansas, published in **1959, 1976, 2014, 2017,** and **2020** (1:24,000)
- Aerial photographs: EDR, **1949, 1958, 1968, 1976, 1983, 1994, 2001, 2006, 2010, 2015,** and **2019** (1"=500')

### Historical Maps and Aerial Photographs

Direction	Description
Site	<p><b>1949-1976:</b> Site consists of undeveloped pastureland with a few trees in east part of site.</p> <p><b>1983-2020:</b> Site consists of undeveloped pastureland with the eastern portion forested.</p>
North	<p><b>1949-1976:</b> Property consists of pastureland and sparse forest.</p> <p><b>1983-2020:</b> McClellan Boulevard with the beyond property consisting of pastureland and sparse forest to the northwest with an apparent large industrial facility containing the current Hostess Brands manufacturing plant by 1983 and parking lot to the northeast.</p>
East	<p><b>1949-1976:</b> Property consists of pastureland.</p> <p><b>1983-2020:</b> Property consists of an intermittent stream with commercial/ industrial buildings beyond containing the current Siplast Inc./Gum Springs Resin Plant as early as 1983.</p>
South	<p><b>1949-1976:</b> Property consists of pastureland.</p> <p><b>1983-2020:</b> Property consists of pastureland with a commercial building further to the southwest by 1983.</p>
West	<p><b>1949-2006:</b> Property consists of pastureland with Highway 67 beyond.</p> <p><b>2010-2019:</b> Property consists of a commercial facility, current-day Clark County Training Center, and another commercial building with a paved parking lot beyond currently containing the Clark County Child Care Facility.</p>

### 3.2 Historical City Directories

The city directories used in this study were made available through EDR (selected years reviewed: 1995-2020) and were reviewed at approximate five-year intervals, if readily available. City directories were not available prior to 1995. The current street address for the site was identified as Near McClellan Boulevard.

#### Historical City Directories

Direction	Description
Site	No listings (1995-2020)
North/Northeast	<p><b><u>1 Scroll Drive</u></b>            No listings (1995-2000)            Manpower Scroll Technologies (2005)            First Staff Inc and Scroll Technologies (2010)            Danfoss Scroll Technologies, Praxair, and Scroll Technologies (2014-2017)            Danfoss Scroll Technologies (2020)</p>
East	<p><b><u>151 McClellan Boulevard</u></b>            No listings (1995-2017)            Gum Springs Driver License (2020)</p> <p><b><u>125 Technology Drive</u></b>            CM Vending Co Inc (2000)            Pettit Jean Poultry (2010)            Hillstern Farms (2017)</p>
South	<p><b><u>3094 US-67</u></b>            No listings (1995)            Various residential listings, none of environmental concern (2000-2020)</p>
West	<p><b><u>35 McClellan Boulevard</u></b>            Hot Metals Technologies (1995-2000)            No listings (2005-2010)            Siplast-commercial roofing and waterproofing (2014-2017)            No listings (2020)</p>

### 3.3 Site Ownership

Based on a review of information obtained from the Clark County Assessor’s online records available at <https://www.actdatascout.com/RealProperty/Arkansas/Clark>, the

current site owner is the Clark County Industrial Council. In addition, previous owners identified included Landau and M&P.

### 3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. The client provided the following title information for review:

- Limited Title Search for Parcel # 01-05472-000, dated February 26, 2024, prepared by First National Title Company. The title is vested in Clark County Industrial Council Inc. An easement for Arkla Energy Resources was identified. There were no outstanding liens or judgments identified.

### 3.5 Environmental Liens and Activity and Use Limitations

The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.6 Interviews Regarding Current and Historical Site Uses

The following individual was interviewed regarding the current and historical use of the site.

#### Interviews

Interviewer	Name / Phone #	Title	Date/Time
Joshua C. Ray	Shelley Short / (501)-944-0228	CEO of Economic Development Corporation of Clark County	April 23, 2024 / 3:30 p.m.

Terracon interviewed Ms. Shelley Short, CEO of Economic Development Corporation of Clark County, via phone call after the site reconnaissance. Ms. Short indicated that they have been familiar with the site for approximately 1.5 years and that no current operations take place on the site.

Ms. Short indicated that she was not aware of the following.

- Pending environmental litigation;
- Threatened environmental litigation;
- Past environmental litigation;
- Possible violations of environmental laws;
- Possible environmental liability;
- Any potential environmental concerns.

### **3.7 Prior Report Review**

Terracon requested the client provide any previous environmental reports they are aware of for the site. Previous reports were not provided by the client to Terracon for review.

## **4.0 RECORDS REVIEW**

Regulatory database information was provided by EDR, a contract information services company in a report dated April 1, 2024. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient, and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### **4.1 Federal and State/Tribal Databases**

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

### Federal Databases

Database	Description	Distance (miles)	Listings
CERCLIS	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	0
CERCLIS / NFRAP	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0
IC / EC	Institutional Control/Engineering Control	Site	0
NPL	National Priorities List	1	0
NPL (Delisted)	National Priorities Delisted List	0.5	0
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1	0
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	1
RCRA Non-CORRACTS/ TSD	RCRA Non-Corrective Action Activity	0.5	0

### State/Tribal Databases

Database	Description	Distance (miles)	Listings
Brownfields	Brownfields Sites	0.5	0
IC	Institutional Control	Site	0
LTANK	Leaking Underground Storage Tanks	0.5	0
SHWS	State Hazardous Waste Site	1	0
SWF/LF	Solid Waste Facilities/Landfills	0.5	0
SWID	Solid Waste Illegal Dumps	0.5	0

Database	Description	Distance (miles)	Listings
UST/AST	Underground Storage Tanks/Aboveground Storage Tanks	Site and adjoining properties	0
VCP	Voluntary Cleanup Program	0.5	0

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report in Appendix D.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

#### Listed Facilities

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Findings Summary
Siplast Liquid Resin 35 McClellan	Approximately 200 feet west / up-gradient	HW GEN	Not a REC, see discussion below
Scroll Technologies/Danfoss LLC One Scroll Drive	Approximately 750 feet northeast / cross-gradient	PFAS ECHO, AIRS, Asbestos, HW Generator, NLR, Permits	Not a REC, based on gradient and distance from the site
Drumco of Arkansas 142 Technology Drive	Approximately 850 feet ESE / Cross to downgradient	AIRS, ENF, HW GEN, PERMITS, RCRA-LQG	Not a REC, based on distance and gradient relative to site

#### Siplast Liquid Resin

Based on address information, Siplast previously operated approximately 200 feet west of the site. (Siplast currently operates at a facility to the east of the site.) The facility was a liquid resin/liquid waterproofing and acrylic business. The facility was listed as a generator of hazardous waste. This facility is no longer in operation at this location as this location is currently occupied by Clark County. There were no reported spills/releases associated with the facility listing at this address. Based on Terracon’s review of the EDR provided data, there were no compliance violations, formal

enforcement actions, or informal enforcement actions Based on regulatory status, the facility listing is not considered a REC for the site.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report did not list facilities in the unmapped section.

## 4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Arkansas Department of Health /David.McKinnon@arkansas.gov	Mr. McKinnon report the department is unaware of records of environmental concerns pertaining to the site.
Gum Springs Fire Department- 150 Reynolds Rd / 870 246- 8130	At the issuance of this report, a response had not been received from the Fire Department.

## 4.3 Local Area Knowledge

Terracon reviewed the National Pipeline Mapping System (NPMS) website at <https://pvnpm.phmsa.dot.gov/PublicViewer/>, which did not identify natural gas or hazardous liquid pipelines, on or adjoining the site.

Terracon also reviewed the ADEQ website <https://arkansasdeq.maps.arcgis.com> to assess whether the site or adjoining properties were identified in regulatory listings. Regulated facility listings were not identified on the site. The Siplast Liquid Resin facility, Scroll Technologies facility, and Drumco of Arkansas facility appeared in the regulatory database as well and are further discussed in section 4.1.

# 5.0 SITE RECONNAISSANCE

## 5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

### General Site Information

Site Reconnaissance				
Field Personnel	Josh Ray			
Reconnaissance Date	April 15, 2024			
Weather Conditions	Cloudy; 70°F			
Site Contact/Title	Shelley Short / CEO EDC of Clark County

### 5.2 Overview of Current Site Occupants

There are no current occupants.

### 5.3 Overview of Current Site Operations

There are no current operations.

### 5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

#### Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and	Emergency generators	
	Elevators	

Category	Item or Feature	Observed or Identified
Equipment	Air compressors	
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Aboveground Chemical or Waste Storage	Aboveground storage tanks
Drums, barrels, and/or containers $\geq$ 5 gallons		
MSDS or SDS		
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins, and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	
Electrical	Transformers and/or capacitors	

Category	Item or Feature	Observed or Identified
Transformers/ PCBs	Other equipment	
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Leachate and/or waste seeps	
	Trash, debris, and/or other waste materials	
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent, or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	

None of the above-mentioned features were observed during the site reconnaissance; as such, no RECs were identified.

## 6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

### Adjoining Properties

Direction	Description
North	McClellan Blvd. followed by vacant, grassed land
East	Undeveloped, wooded land followed by Siplast Liquid Resin Roofing/Waterproofing

Direction	Description
South	Field developed with solar panels
West	Arkadelphia Water Utility Storage/office building, followed by Clark County building (35 McClellan)

Siplast Liquid Resin was identified in the regulatory review portion of this report and is further discussed in section 4.1.

## 7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, the following additional services were conducted.

### 7.1 Limited Wetland Records Review

The U.S. Army Corps of Engineers (USACE) regulates jurisdictional wetlands and other waters of the U.S. under Section 10 of the Rivers and Harbors Act and Section 404 of the Clean Water Act. Terracon conducted a limited desktop review of the site to identify areas mapped by the resources below as potentially exhibiting characteristics of wetlands and/or other waterbodies that may be subject to regulation under the USACE. This review may not identify state/locally-designated wetlands. This desktop review is not a thorough review of wetlands and may not identify all resources present.

Terracon reviewed the following resources to identify areas mapped as indicating the potential presence of jurisdictional waters of the U.S., including wetlands, on the site:

- #### ■ Topographic Map

The United States Geologic Survey (USGS) 7.5-Minute Topographic Map of the subject site was reviewed to identify drainages or other potential waters of the U.S. within the project site. A portion of the Topographic Quadrangle can be seen as Exhibit 1 in Appendix A. Based on the USGS map, it appears a stream is depicted near the east site boundary.

- #### ■ National Wetland Inventory Map

National Wetland Inventory (NWI) data for the project site was reviewed to identify potential wetland areas. NWI data for the project site was published by the U.S. Department of the Interior’s Fish and Wildlife Service and depicts possible wetland areas based on stereoscopic analysis of high-altitude aerial photographs. The review of the NWI data identified a Riverine, Intermittent, Streambed, Seasonally Flooded (R4SBC) water body mapped along the east site boundary. The NWI map data for the project area can be seen as Exhibit 3 in Appendix A.

Terracon's desktop review of the above resources identified the presence of a riverine area along the east site boundary. Please note that there may be wetlands not identified on the resources reviewed. This Limited Wetland Review does not constitute a formal determination and/or delineation of a potentially jurisdictional wetland, which requires (among other procedures) a formal field investigation including hand-dug soil stations with vegetation and hydrologic indicators identification, as set forth in *1987 Corps of Engineers Wetland Delineation Manual* and further amended by the applicable *Regional Supplements to the Corps of Engineers Wetland Delineation Manual*.

To obtain a formal determination from the USACE regarding jurisdictional status, a wetland/waters of the U.S. delineation could be conducted by a wetland scientist and submitted to the USACE (or in certain geographies the participating state agency) for a jurisdictional determination. Note that the USACE is not required to respond to determination requests within a particular timeframe unless the submittal also includes a permit application.

## 7.2 Historic Properties/Archaeological Resources Review

A limited literature and agency file review was conducted to identify publicly available records of known occurrence of cultural resources on the site. Note that records pertaining to location of cultural resources are often restricted and not available to the public. Absence of records does not guarantee absence of cultural resources; it may be that a survey for the site has not previously been completed or that such records are not publicly available. This review is limited and does not constitute a site investigation by an archeologist or historian or concurrence from the State Historic Preservation Office (SHPO).

The review included the National Register of Historic Places for publicly available information. Cultural resources or structures of historical significance were not documented on or adjoining the site based on review of National Register of Historic (NRHP) GIS ([www.nps.gov/](http://www.nps.gov/)).

Background research was conducted on April 9th, by Edgar Vazquez, M.A., using the Automated Management of Archeological Site Data in Arkansas (AMASDA) Online, an online GIS database depicting previously recorded cultural resources in Arkansas. Based on the background research results:

Three previous archeological investigations (AMASDA No. 166, 7012, and 7172) occurred within project area and search radius; no resources were documented within the study area during these investigations. Two previously recorded cultural resources (3CL0481 and 3CL0263) are documented within a 0.25-mile search radius. In addition to checking the AMASDA Online, historic USGS topographic maps and historic aerials were examined to determine if the remains of historic-age resources were likely to be present in the project area. Based on the aerial images and topographic maps, the study area has been historically undeveloped and heavily forested.

## Results

Three previous archeological investigations are located intersecting the project area and within the search radius. Based on our desktop research, no previously recorded historic resources are located within the project area.

Section 106 of the National Historic Preservation Act (NHPA) applies to projects with a federal nexus. Terracon understands that there is no federal involvement in the project at this time. If a federal nexus is identified, the completion of a cultural resources survey would be a potential requirement for meeting Section 106 obligations. If the project were to trigger compliance with Section 106 of the National Historic Preservation Act of 1966, as amended, by needing a federal permit, license, money, or approval, or if compliance with other applicable state or local cultural resource laws was required, then consultation with the State Historic Preservation Office (SHPO) and other consulting/interested parties would be required. A cultural resources survey could also be performed regardless of nexus to further assess the site for potential cultural resources.

## 8.0 DECLARATION

I, C. Rand Raglin, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

---

C. Rand Raglin

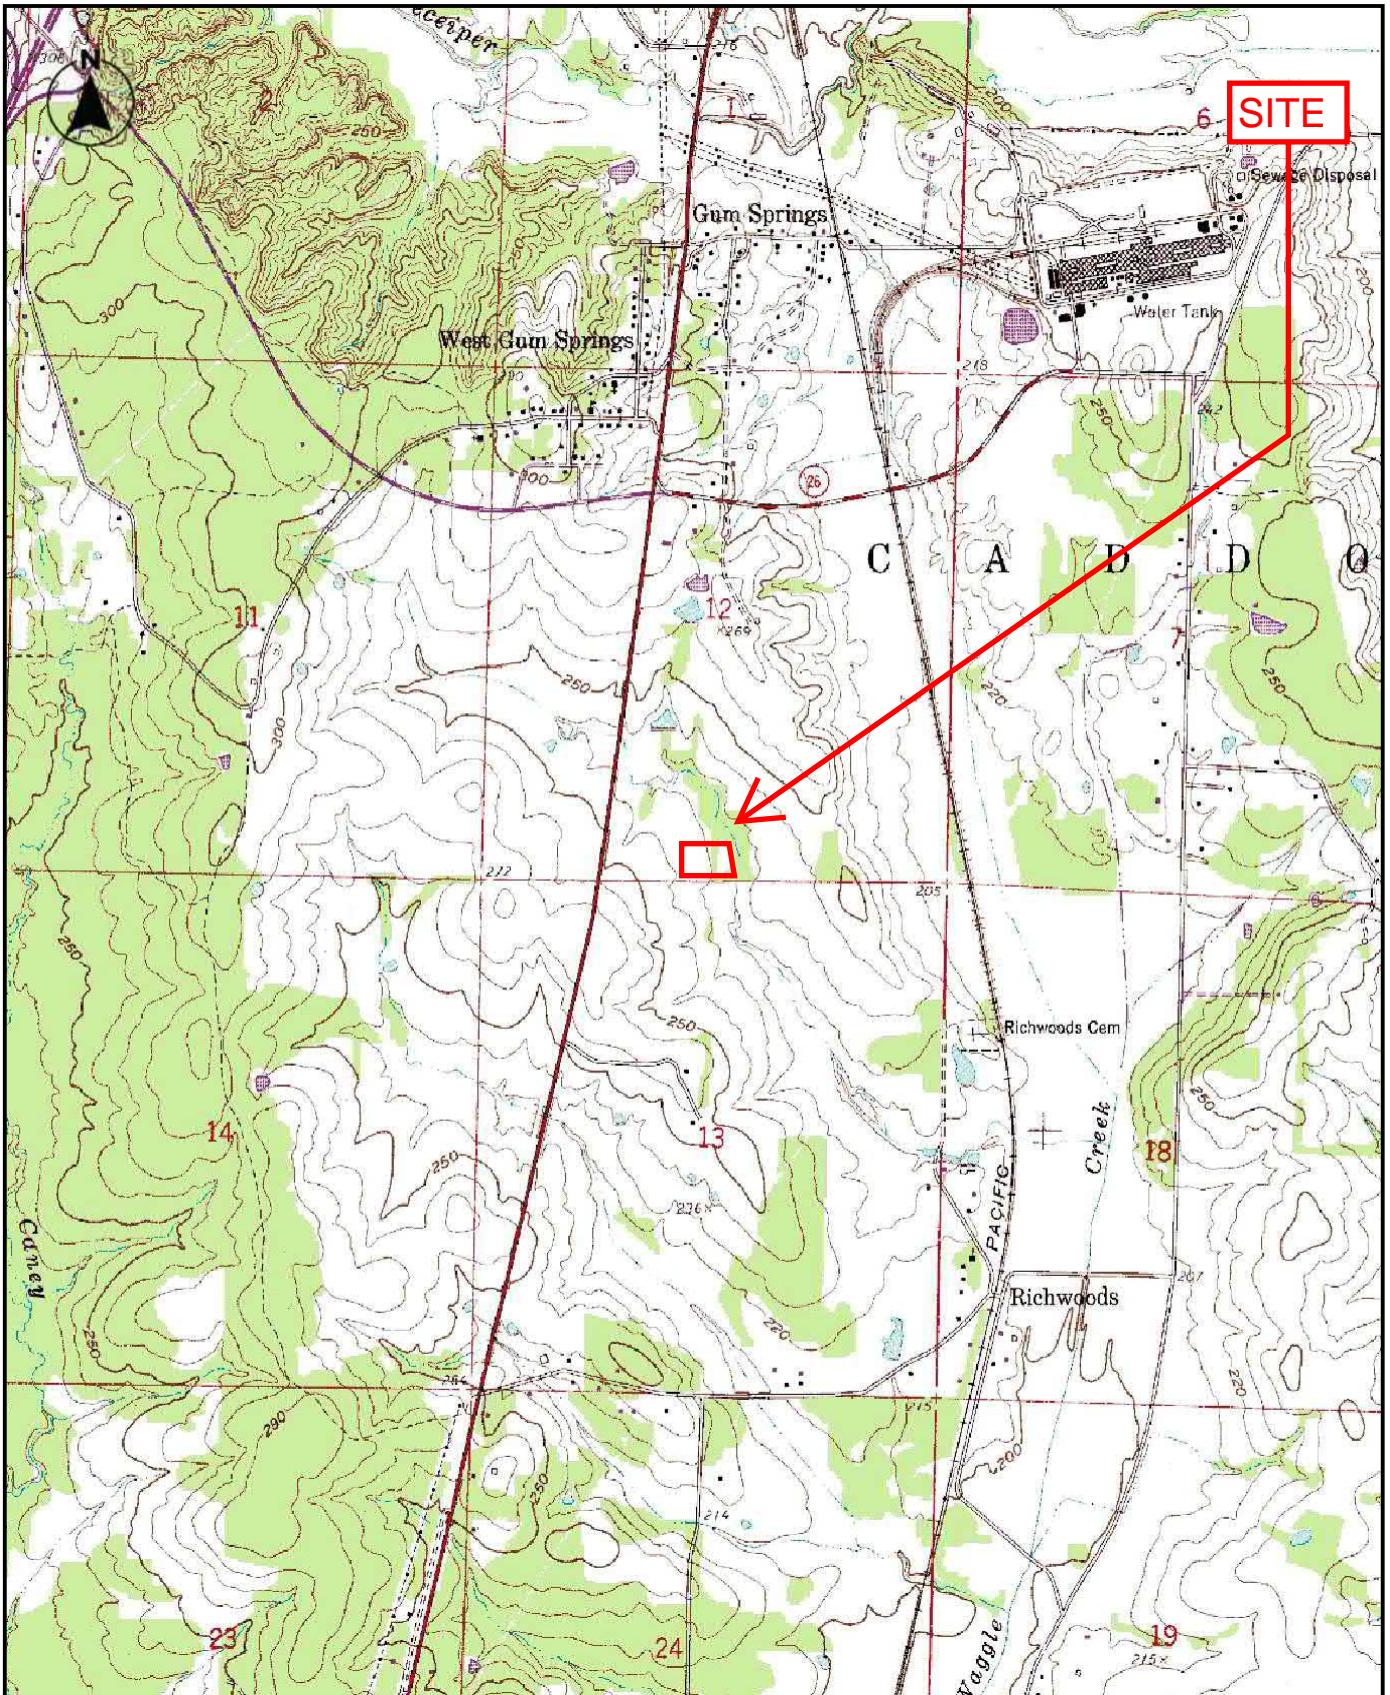

Due Diligence Manager

<b>ASTM User Questionnaire</b>			
To qualify for one of the <i>Landowner Liability Protections (LLPs)</i> offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the " <i>Brownfields Amendments</i> "), the user must respond to the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The <i>user</i> should provide the following information to the <i>environmental professional</i> . Failure to conduct these inquiries could result in a determination that " <i>all appropriate inquiries</i> " is not complete.			
1) Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the site under federal, tribal, state, or local law (40 CFR 312.25)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)			
2) Did a search of land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded against the site under federal, tribal, state, or local law (40 CFR 312.26)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)			
3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below)			
4) Do you have actual knowledge of a lower purchase price because contamination is known or believed to be present at the site (40 CFR 312.29)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> Not applicable (If yes or Not applicable, explain below)			
5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)? For example, (a.) Do you know the past uses of the site? (b.) Do you know of specific chemicals that are present or once were present at the site? (c.) Do you know of spills or other chemical releases that have taken place at the site? (d.) Do you know of any environmental cleanups that have taken place at the site? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below)			
6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of releases at the site (40 CFR 312.31)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below)			
<u>Comments or explanations:</u>

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Bryant, AR 72022  
Contact: Cole Rodman

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

**Certification #** 8859-4EDB-A52B  
**PO #** 35247088  
**Project** Arkadelphia Site Sections

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 8859-4EDB-A52B

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Terracon (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

### Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. # EXECUTIVE SUMMARY

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

## RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

## RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

**Hazardous Waste Summary:**

Waste Code: D001  
Waste Description: Ignitable Waste

Waste Code: D002  
Waste Description: Corrosive Waste

Waste Code: D006  
Waste Description: Cadmium

Waste Code: D007  
Waste Description: Chromium

Waste Code: D008  
Waste Description: Lead

Waste Code: D009  
Waste Description: Mercury

Waste Code: D035  
Waste Description: Methyl Ethyl Ketone

Waste Code: F001  
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing:  
Tetrachloroethylene, Trichlorethylene, Methylene Chloride,  
1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated  
Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing  
Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of  
One Or More Of The Above Halogenated Solvents Or Those Solvents Listed  
In F002, F004, And F005; And Still Bottoms From The Recovery Of These

Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002  
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003  
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005  
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U032  
Waste Description: Calcium Chromate (Or) Chromic Acid H2cro4, Calcium Salt

Waste Code: U080  
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U188  
Waste Description: Phenol

Waste Code: U220  
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U239  
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

UTM Y (Meters):	3767438.0
Elevation:	232 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	15633358 ARKADELPHIA, AR
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
05019C0350E	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
05019C0328E	FEMA FIRM Flood data
05019C0329E	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: Houston

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
2	20 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
3	31 inches	72 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 2

Soil Component Name: Terouge

Soil Surface Texture: silty clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6
2	22 inches	72 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.6

### Soil Map ID: 3

Soil Component Name: Kipling

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 36 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 4.5
2	24 inches	44 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 4.5
3	44 inches	72 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 4.5
4	5 inches	24 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 4.5

### Soil Map ID: 4

Soil Component Name: Oktibbeha

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: US Fish & Wildlife Service

Telephone: 703-358-2171

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX E  
CREDENTIALS

# Quin Baber, P.G.

## ENVIRONMENTAL DEPARTMENT MANAGER

### PROFESSIONAL EXPERIENCE

Mr. Baber is presently the Department Manager of Environmental Services for the Terracon Consultants, Inc. office located in Little Rock, Arkansas. Mr. Baber is responsible for management and technical supervision of a wide range of environmental services. Mr. Baber has extensive experience in extent of contamination studies, remediation of contaminated sites, site assessments, underground storage tank studies, geologic and hydrogeologic studies and regulatory compliance and permitting.

Mr. Baber has over thirty nine years experience as a Professional Geologist. He also has extensive experience in Solid Waste, Hazardous Waste and Brownfields services. Mr. Baber served on the Governor's Water Quality Standard Committee and the Water Well construction sub-committee to develop regulations and guidelines for the installation of production and monitoring wells in the State of Arkansas. In addition Mr. Baber has served as a commissioner for the Arkansas Geological Commission and the Board of Registration Registration for Professional Geologist in Arkansas. Mr. Baber was recently appointed by the Governor for his second term as a commissioner for the Arkansas Geological Commission.

### PROJECT EXPERIENCE

#### SOLID WASTE

Mr. Baber has acted as Project Manager for numerous solid waste sites. Activities include Site Selection, Permitting, Subtitle "D" Upgrades, development and approval of work plans, conducting site investigations and hydrogeological characterizations, geophysical investigations, dye trace studies, aquifer testing, statistical interpretation of groundwater data, assistance with risk assessment development, regulatory negotiations, and final report preparation and approval.

#### Hazardous Waste Site Investigations

During his present and previous employment, Mr. Baber served as a Project Manager and performed site characterization work at a wood treating facility undergoing remedial activities. These activities included participation in drilling and soil sampling, monitoring well and piezometer installation, slurry wall QA/QC, evaluation of remediation technologies, design of recovery well systems, and aerial photography interpretation. Mr. Baber served as the project Manager over the first Brownsfield project completed in Arkansas. Mr. Baber has worked as Project Manager on several Super Fund Sites from initial investigation through the remediation and closure of the sites. Mr. Baber has performed the planning and implementation of several RCRA Facility Investigations (RFI) Workplans. Mr. Baber has performed a wide range of tasks associated with these projects such as, soil sampling, drilling and sampling of monitoring wells, collection and logging of soils and rock core samples, surface and subsurface geophysical investigations, collection of groundwater and surface water samples, planning and oversight of the removal and disposal of hazardous materials. In addition, Mr. Baber has conducted numerous Limited Site Investigations for the Arkansas Department of Environmental Quality Hazardous Waste Division associated with the Elective Sites Cleanup Program.

#### Stormwater/NPDES

He has also developed Storm Water Pollution Prevention Plans for several major industries. In addition, Mr. Baber filled out and submitted NPDES permits to regulatory agencies and directed sampling events for storm water runoff including sampling of SARA Chapter 3 chemicals. During his professional career, Mr. Baber has assisted industries in bringing them into compliance with EPA and ADEQ regulations.

#### Mining Operations

Mr. Baber served as project manager for mining operations involving bauxite, lignite, and kaolin clays. Tasks included overseeing contractor during excavation activities, setting up and coordinating laboratory activities for raw ore analysis and physical properties testing of finished product. He directed surveying activities relative to mining operations, coordinating reclamation activities and developed Safety Plan for mining operations. Mr. Baber was also responsible for pretreatment and release of mine water

# Quin Baber, P.G. (continued)

## **Regulated Storage Tanks**

During his professional career, Mr. Baber has performed numerous Phase I and II Site Assessments on properties with or which formerly had underground storage tanks. Mr. Baber has installed vapor and groundwater monitoring systems, conducted Initial Response Reporting (IRR), performed Initial Site Characterizations (ISC), performed risk based corrective action (RBCA), prepared corrective action plans, conducted groundwater and soil remediation activities and prepared Petroleum Storage Tank Trust Fund reports and applications.

## **Military Department of Arkansas – North Little Rock, Arkansas**

Mr. Baber manages multiple projects on-going for the Military Department of Arkansas (MDA). These projects include: Hydrogeologic Investigations associated with firing ranges, installation of water sampling stations to sample the drinking water supply at the base, Military Munitions Training for MDA employees, Evasive Species Studies, Fish and Waterfowl Studies, Integrated Cultural Resources Management Plan and FONSI updates, Fire Fuel Data Base Model and GIS upgrades.

## **Coal Fire Power Plants**

Mr. Baber has served as project manager on numerous coal fire power plants. These projects include: Hydrogeologic Investigations associated with ash disposal units and ash ponds, preparation of permits for coal ash landfill disposal units, engineering design and bid specifications for coal ash landfills, construction quality assurance associated with the construction of coal ash landfills, installation of a slurry wall and grout curtain, fatal flaw analysis, groundwater sampling, statistical analysis, and reporting, environmental compliance (ie. stormwater pollution prevention plans, wetlands delineation and air permitting etc.) and regulatory negotiations.

## **Expert Witness**

During his career, Mr. Baber has appeared in numerous administrative hearings, and various levels of legal proceedings. He has been accepted as an expert witness in solid waste management, remediation and hydrogeology.

## **REPRESENTATIVE SOLID WASTE PROJECTS**

**AEP John W. Turk Power Plant Class 3N Landfill** – Served as Project Manager overseeing the Hydrogeological Investigation associated with the solid waste permit application and preparation of the overall solid waste permit application.

**Saline County Class I Landfill** – Project Manager involved in hydrogeological studies dealing with potential impacts from the solid waste facility to groundwater. This work included fate and transport of landfill leachate, landfill gas and off site sources. In addition the project included performing vadose zone monitoring, aquifer testing, and designing and installing groundwater monitoring network to evaluate potential impacts to the environment.

**City of Fort Smith Class I Landfill** – Certifying Geologist associated with the installation of groundwater monitoring wells. Performed groundwater sampling and statistical analysis and reporting.

**AEP NE Coal Power Plant** – Ologah, OK – Project Manager and Certifying Geologist overseeing the hydrogeologic site characterization and engineering design and permitting submittals for a vertical expansion of PSO's coal combustion ash landfill. Groundwater monitoring well construction and monitoring system were included within the permitting submittal. Mr. Baber also oversaw the installation of the SCB (slag-cement-bentonite) slurry cut-off wall through the overburden soils, followed by a single line of grout curtain injected into the upper portions of the weathered limestone bedrock as per the following documents. This project involved the construction of an approximately 2200 foot long slurry wall followed by a 1400 foot long grout curtain. The following information summarizes the construction sequence associated with the construction of the slurry wall and grout curtain:

**Waste Management Ozark Ridge Landfill** - Project Manager and Certifying Geologist for the existing groundwater monitoring system that was designed, installed, and is periodically upgraded by Terracon.

## **Military Department of Arkansas – North Little Rock, Arkansas**

Mr. Baber manages multiple projects on-going for the Military Department of Arkansas (MDA). These projects include: Hydrogeologic Investigations associated with firing ranges, installation of water sampling stations to sample the drinking water supply at the base, Military Munitions Training for MDA employees, Evasive Species Studies, Fish and Waterfowl Studies, Integrated Cultural Resources Management Plan and FONSI updates, Fire Fuel Data Base Model and GIS upgrades.

## **REPRESENTATIVE BROWNFIELDS PROJECTS**

**City of Texarkana, Texas Brownfields Assessment Grant** - Project Manager for the City of Texarkana, Texas Brownfields Assessment Grant. Assisted the City in development of a Public Involvement Plan, and planning and hosting public involvement sessions, senior review for Environmental Site Assessments, assist with ACRES reporting and budgeting

**Southwest Arkansas Planning and Development District Brownfields Assessment Grant** - Project Manager for the SWAPDD Brownfields Assessment Grant. Assisted the District in development of their Brownfields inventory, assisted in planning and hosting public involvement sessions, senior review for Environmental Site Assessments, assist with reporting and budgeting.

# Charles Rand Raglin

## LITTLE ROCK DUE DILIGENCE MANAGER

### PROFESSIONAL EXPERIENCE

Rand is the environmental due diligence manager in Terracon's Little Rock, Arkansas office. He is an Environmental Professional (EP) with more than twenty-five years of experience in the environmental industry. Rand supervises up to seven staff level employees in the department. Rand has been involved in the preparation of hundreds of Phase I Environmental Site Assessments (ESAs) and Phase II ESAs on a variety of sites including industrial, commercial, retail, agricultural, and telecommunications related facilities in several states. Rand's duties include business development, management, and supervision of due diligence projects throughout the Midwest.

Rand has managed national contracts for Phase I ESA services in multiple states including two large telecommunication clients, development companies, and lending institutions. He has also developed and managed numerous Phase I ESA portfolios for local clients. Additional project experience includes Phase I and Phase II Brownfield Projects, remediation oversight, asbestos and lead-based paint inspections, underground storage tank removals, petroleum pipeline release investigations, lab packing services, NEPA, and natural resource evaluations.

### PROJECT EXPERIENCE

#### COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION, AND LIABILITY ACT – SAUGET, ILLINOIS

Evaluated the liability for potential purchaser of a site that was surrounded by an active superfund site.

#### RISK ASSESSMENT – FENTON, MISSOURI

Performed wipe and soil sampling to assess potential risk for lead exposure.

#### REMEDATION CONSTRUCTION OVERSIGHT

Performed oversight of petroleum-impacted soils during a redevelopment project on a former automobile dealership property.

#### REMEDATION DESIGN – SAINT LOUIS, MISSOURI

Performed oversight of removal of two heating oil tanks formerly in operation at a commercial site in the city of Saint Louis.

#### DUE DILIGENCE SERVICES-RETAIL/COMMERCIAL

Project management, field assessment, and report preparation for numerous Phase I ESAs, Phase II ESAs, and Limited Site Investigations (LSIs) predominantly in Arkansas, Missouri, Kansas, Iowa, and Illinois. Properties assessed range from undeveloped sites to active industrial facilities. Provide senior level review of these reports and mentor staff undergoing training in assessment processes.

### EDUCATION

Bachelor of Science, Biological Sciences, 1996, Southern Illinois University

Associate of Arts, 1993, John A. Logan College – Carterville, Illinois

### CERTIFICATIONS

40 Hour OSHA Hazardous Waste Operations Training

Wetland Delineation Training Completion

### WORK HISTORY

Terracon, Inc., Due Diligence Manager, January 2008-Present

Terracon, Inc., Project Manager, November 2000- January 2008

Terracon, Inc., Environmental Scientist, May 1998 - 2000

St. Francois County Health Center Environmental Public Health Specialist - 1997 – 1998

## **PROJECT EXPERIENCE (continued)**

### **DUE DILIGENCE SERVICES-TELECOMMUNICATIONS**

Managed numerous Phase I ESAs, Transaction Screens, NEPA Screen Surveys, and Desktop Reviews for two telecommunications company build-outs in the St. Louis Region. Conducted NEPA Reviews for existing and proposed communications towers in multiple states. Responsible for field work, contact with federal, state, and local government agencies, coordination of Cultural Resource Investigation for historical preservation clearance, and report writing and review.

### **ASBESTOS SAMPLING SERVICES-COMMERCIAL/RETAIL, EDUCATIONAL FACILITIES**

Managed NESHAP, AHERA, and asbestos inspections in numerous residential, educational, commercial and industrial facilities in Missouri and Illinois. Duties include proposal preparation, project assignment, inspection services, and report writing.

### **WETLANDS/404 AND 401 PERMITTING-RETAIL COMMERCIAL DEVELOPMENT**

Conducted numerous wetland delineations in Missouri and Illinois. Projects included the proposed development of a wind farm in northeast Illinois. The wind farm project included approximately 130 turbine locations spread across approximately 22,000-acres located in northeast Illinois. Rand has also conducted wetland delineations for several big box store projects and a proposed pipeline river crossing located in St. Louis area.

Rand's experience also includes preparation of documentation for submittal to the U.S. Army Corps of Engineers and Illinois Environmental Protection Agency for Wetland and Water Quality permitting.

### **BIOLOGICAL ASSESSMENT-RETAIL COMMERCIAL DEVELOPMENT**

Coordinated habitat and species surveys for two endangered snake species on a site proposed for development in southern Illinois. Completed Species Conservation Plan and Incidental Take Application for submittal to the Illinois Department of Natural Resources.

# Joshua C. Ray

## STAFF GEOLOGIST

### PROFESSIONAL EXPERIENCE

Joshua is a staff geologist in Terracon's Little Rock, Arkansas location. Joshua assists in the environmental department with phase one environmental site assessments, limited site investigations, drilling observation and sample collection, and asbestos inspections.

### PROJECT EXPERIENCE

#### Osceola Brownfields – Osceola, Arkansas

Joshua assisted in the site investigation regarding a former clothing manufacturer in Osceola, Arkansas. The project included drilling and developing wells, soil sampling, and groundwater sampling.

**Professional Services Completed:** February, 2022

**Construction Completed:** February, 2022

#### Groundwater Monitoring Well Installation and Decommissioning – Various Sites, Arkansas

Lithologic logging and groundwater monitoring well construction in accordance with ASTM D 5092-90 Design and Installation of Groundwater Monitoring Wells in Aquifers and EPA Handbook of Suggested Practices for Design and Installation of Groundwater Monitoring Wells. Groundwater monitoring well decommissioning in accordance with the Arkansas Water Well Construction Commission Regulations for decommissioning of groundwater wells.

#### Phase I Environmental Site Assessments (ESAs) – Various Sites, Arkansas

Conducted ESAs, as due diligence practices, in order to identify environmental liabilities for property transactions, to identify certain baseline environmental conditions, to identify potential site contamination, to assist in regulatory compliance, and as an initial step in site remediation. Phase 1 ESAs involve evaluation and reporting of information collected through record reviews, site visits, and interviews. Conducted ESAs for such companies as Chipotle, Chic-fil-a, and On The Border.

#### Asbestos, Lead, and Mold Services – Various Sites, AR:

Provided asbestos-containing building materials, lead based paint, and mold surveys in Arkansas.

### EDUCATION

Bachelor of Science, Environmental Geology, University of Arkansas at Little Rock, 2021

### CERTIFICATIONS

40-Hour HAZWOPER

Nuclear Density Gauge Safety Training

Absbestos Inspector Initial Training

### AFFILIATIONS

Geological Society of America

Sigma Gamma Epsilon Earth Science Honor Society

Terracon Consultants, Inc., Staff Geologist, 2022-Present

Terracon Consultants, Inc., Materials Technician, 2021-2022

APPENDIX F  
DESCRIPTION OF TERMS AND ACRONYMS

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g., California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally Exempt Small Quantity Generators
CFR	Code of Federal Regulations
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-21 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-21 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
pCi/L	picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave"). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/ TSDs	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/ TSDs	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
REC	Recognized Environmental Conditions are defined by ASTM E1527-21 as 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small Quantity Generator
SWF/LF	State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C 2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-21, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	State and/or Tribal facilities included as Voluntary Cleanup Program sites.
VOC	Volatile Organic Compound
Wetlands	<p>Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The <u>Corps of Engineers Wetlands Delineation Manual</u> (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present.</p> <p>The federal Clean Water Act which regulates “waters of the US,” also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.</p>
