D-1 Environmental Professional Resume

Executive Summary

GTS, Inc. (GTS) recently conducted a Phase I Environmental Site Assessment (ESA) of a 44.46-acre recreational property known as Forward Searcy Site 1. The property sits west of Queensway Street and east of Veterans Blvd (formerly Higginson Road), in Searcy, Arkansas. The facility previously included baseball fields, basketball courts, a skateboard park, a dog park, an ultimate frisbee course, plus support buildings. Those structures have recently been razed, and the site is currently an empty field with two paved car parks.

The Phase 1 ESA was prepared for Forward Searcy, Inc., Searcy, Arkansas. The ESA was conducted in general conformance with ASTM Standard E 1527-20 and U.S. Environmental Protection Agency's *Standards and Practices for All Appropriate Inquiries (AAI),* 40 CFR Part 312.

The property was visually inspected on September 25, 2026 for evidence of recognized environmental conditions (RECs)[1]; controlled RECs (CRECs)[2]; and historical RECs (HRECs)[3]. In addition, certain non-ASTM scope ESA items that may also pose business environmental risks were evaluated.

The site was evaluated first-hand by walking around and throughout the 44.4-acre property and noting current ground conditions. Photographs were taken to document the visual site inspection. No RECs were identified on the target property during the site reconnaissance.

As part of the records research, historical aerial photographs, topographic maps, and environmental regulatory databases were examined. Based upon this review, it is evident that the target property was originally open farmland until the SSC was expanded north of Gin Creek in the late 1990s.

The target property was not listed in the standard government environmental database searches. Twelve facilities within one-mile of the target property were listed in the environmental databases.

The database listings are considered routine in nature, associated with standard RCRA waste generator notifications; the registration, use, and permanent closure of petroleum underground storage tanks; leaking storage tank site investigations; RCRA corrective action site closures; air emission monitoring; asbestos abatement permitting, and state Voluntary Cleanup Program sites.

According to available records, no unresolved environmental issues are present at the listed businesses, and the facilities are either closed or currently in compliance with applicable ADEQ and EPA regulations. Thus, the twelve listed facilities are not considered to represent RECs for the target property.

---

[1] REC is defined by ASTM as *'the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment'.*

[2] CREC is defined by ASTM as *'a recognized environmental condition resulting from the past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls'.*

[3] HREC is defined by ASTM as '*a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls'.*

Based upon the findings of the Phase 1 ESA, GTS considers the 44.46-acre undeveloped property located at 1300 Veterans Blvd, Searcy, Arkansas, to be unencumbered by known RECs.

1.0 Introduction

This Phase I Environmental Site Assessment (ESA) was performed by GTS, Inc. (GTS) to identify and evaluate potential Recognized Environmental Conditions (RECs) at a 44.46-acre property known as the Forward Searcy Site 1.

The property sits west of Queensway Street and east of Veterans Blvd (formerly Higginson Road). The target property occupies the land north of Gin Creek and south of the Land "O Frost trucking facility. The property is currently an empty field.

The protocol used for the ESA complies with the requirements of the American Society for Testing and Materials (ASTM) Standard E 1527-20 and the U.S. Environmental Protection Agency's (EPA) *Standards and Practices for All Appropriate Inquiries (AAI),* 40 CFR Part 312.

A REC is defined by ASTM as *'the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment'.*

The above term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

1.1 Purpose and Scope

The purpose of a Phase I ESA is to identify existing or potential RECs that may constitute or result in a violation of applicable environmental laws; impose constraints on operations at the property; require remediation of hazardous substances or petroleum products; affect the value of the property; or require additional action with respect to such conditions.

The client/user is performing this ESA to satisfy one of the requirements to qualify for the ***bona fide prospective purchaser*** limitations on CERCLA liability; that is, to make "*all appropriate inquiry* into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

The scope of the Phase 1 ESA comprises five components:

- Site Reconnaissance
- Environmental Records and Database Searches
- Knowledgeable Person Interviews (if available)
- Environmental Risk Consideration
- Phase 1 ESA Report Preparation

The appendices to the ESA report include a site location plan, site photographs, historical aerial photographs, historical topographic maps, Sanborn Fire Insurance maps, local City Directory abstracts,

and the results of local, state, and federal environmental database search enquiries. This material provides documentation to support the analysis and findings presented in the Phase I ESA Report.

1.2 Authorization and Access

The Phase 1 ESA was authorized by Forward Searcy, Inc., Searcy, Arkansas. Access was unrestricted.

1.3 Warranty for Phase 1 ESA

GTS warrants that the findings and conclusions contained herein were reached in accordance with the methodologies set forth in the applicable ASTM E 1527-20 Standard and EPA AAI rules. These methodologies are described by the standard as representing good commercial and customary practice for conducting a Phase 1 ESA of a parcel of property for the purpose of identifying RECs. However, these findings and conclusions contain all of the limitations inherent to the methodologies which are referred to in the standard and some of which are more specifically set forth below.

1.4 Limitations and Exceptions

The accuracy and completeness of this report are necessarily limited by the following conditions:

a) There is a possibility that, even with proper application of the standard methodologies, there might exist on the target property conditions that could not be identified within the scope of the assessment or which were not reasonably ascertainable from the available information. GTS believes that the information obtained from the records review and the interviews (if and when available) concerning the site is reliable. However, GTS cannot and does not warrant or guarantee that the information provided by these or other sources is accurate or complete. The methodologies of the ESA are not intended to produce all-inclusive or comprehensive results, but rather to provide the client with readily available information regarding the potential presence of RECs relating to the target property.

b) This Phase 1 ESA was non-invasive in nature and sampling of air, water, sediment, and soil was not part of the scope of this assessment. Consequently, opinions and conclusions concerning the possible presence of heavy metals, petroleum hydrocarbons, polychlorinated biphenyls (PCBs), or other regulated hazardous substances at the target property are based on readily available published information, personal interviews, and the site-specific features noted during the site reconnaissance.

1.5 User Reliance

This report is certified to, can be relied upon by, and has been prepared for the exclusive use of Forward Searcy, Inc., Searcy, Arkansas.

The named entity may not convey this report to an affiliate, related entity, subsidiary, lender, title insurer, regulatory or city agency, or current property owners or their agents without obtaining written consent from GTS.

2.0 Site Description

A brief description of the target property is provided below. The site location may be seen outlined on the attached site location plan provided as *Appendix A-1*, and photographs of the significant site features at the time of this study are provided in *Appendix B-1*.

2.1 Site Location

The official address of the property is 1300 Veterans Blvd, Searcy, White County, Arkansas. The rectangular, 44.46-acre property is bounded to the east by Queensway Street and to the west by Veterans Blvd. The north property line separates the site from the Land 'O Frost trucking facility. The south property line separates the site from sports fields and recreational areas farther south.

The target property latitude is 35^{o} 14' 01", and the longitude is 91^{o} 43' 32".

2.2 Site Characteristics

The target property is approximately 44.46-acres in size, and the recreational sports complex is generally flat-lying at an elevation of approximately 240 feet above sea level.

The site is unpaved open grass fields with the exception of the two asphalt parking areas.

No surface water ponds or streams were seen onsite at the time of the site reconnaissance. Gin Creek passes through the southeast corner of the property, flowing southwest away from the target property.

2.3 Current and Previous Land Use

The target property has been used as a sports complex since at least 2001. Prior to this time, the property land-use was primarily agricultural, consistent with the prevailing local and regional land-use at that time (aerial photographs between 1949 and 1994 show the property as undeveloped farmland).

3.0 User Provided Information

3.1 Title Records

Title records were not provided, and a title review is beyond the scope of the Phase I ESA Report.

The target property consists of 44.46 acres described as Lot 1 on the "Final Plat of Searcy Industrial Addition" prepared by Quattlebaum Surveying, LLC. As of this date, tax ID numbers have not been updated to reflect this lot line adjustment. However, the previous White County Tax ID numbers are as follows:

- 016-10678-000
- 016-10678-001
- 016-10682-000
- 016-10682-001
- 016-10675-000

The property is owned by the City of Searcy. The land-use is given as 'EXEMPT (FULL OR PARTIAL)'.

3.2 Specialized Knowledge

GTS has no prior specialized knowledge of the target property.

4.0 Records Review and Database Search

Environmental Data Resources, Inc. (EDR) was subcontracted by GTS to research and provide information from available standard federal and state environmental records and databases regarding the target property and surrounding properties within a one-mile radius of the site. The EDR database search satisfies ASTM Standard E-1527-20 for a government records review to be used in a Phase I ESA.

Regulatory information was obtained and reviewed from the following principal sources:

- Arkansas Department of Environmental Quality (ADEQ)
- U.S. Environmental Protection Agency (EPA)
- National Technical Information Service (NTIS)
- U.S. Coast Guard National Response Center (USCG-NRC)
- U.S. Department of Transportation (USDOT)
- Nuclear Regulatory Commission (NRC)
- U.S. Department of Labor, Mine Safety and Health Administration (MSHA)
- U.S. Geological Survey (USGS)
- Federal Emergency Management Agency (FEMA)
- U.S. Department of Agriculture (USDA) Soil Conservation Service (SCS)
- U.S. Fish and Wildlife Service (USFWS).

The following table lists the databases searched and highlights those databases where facilities within 1-mile, one-half mile, or one-quarter mile of the target property are listed. Please see *Appendix C-4*.

NOTES:

TP = Target Property

NR = Not Requested at this Search Distance

Sites may be listed in more than one database

5.0 Physical Site Setting

The current setting for the target property was characterized during the September 25, 2026 site reconnaissance. To help understand changes to the property over time, historical aerial photographs and USGS topographic maps were reviewed.

Accordingly, twelve aerial photographs (from 1949 to 2023) and eight topographic map sets (from 1935 to 2024) were evaluated. Based on this review, it is evident that the target property was first developed as the SSC in the late 1990s.

The USDA Soil Conservation Service manages the National Cooperative Soil Survey (NCSS) for private land in the United States. According to NCSS, the target property sits mainly on the *Taft* soil component, described as a somewhat poorly drained, partially hydric, silt loam with slow infiltration rates.

Please see *Appendix C-4*, Radius Map, for further details.

6.0 Historical Site Land Use

6.1 Aerial Photographs

To obtain information about the past use of the site and adjacent properties, aerial photographs from 1949, 1960, 1963, 1976, 1984, 1990, 2001, 2006, 2010, 2015, 2019, and 2023 were reviewed for the property.

Unfortunately, the resolution and scale of the available aerial photographs precludes ready identification of site-specific features. Nonetheless, the aerial photographs show that the target property has been used as a public sports facility since at least 2001 (the 1994 photograph shows fields). Please see *Appendix B-2* for copies of the aerial photographs provided by EDR.

6.2 Topographic Maps

Seven historical topographic maps for the area were reviewed, consisting of USGS quadrangle maps for Bald Knob (1935), Kensett (1935, 1967, 1981, 1994, 2014, 2017, 2020, and 2024), Garner (1981, 2014, 2017, 2020, and 2024), Judsonia (1981, 1994, 2014, 2017, 2020, and 2024), and Letona (2014, 2017, 2020, and 2024). Unfortunately, the small scale of the maps prevents useful identification of site-specific features.

Copies of the historical maps are included in *Appendix C-1*.

6.3 Sanborn Fire Insurance Maps

Sanborn Insurance Maps were not available for the target property. Please see *Appendix C-2*.

6.4 City Directory Information

As part of the database searches, local City Directory records were investigated. Street addresses from 1992 to 2024 were provided by Cole Information Services. According to the City Directory records, the target property did not have a formal street address assigned until 2020.

Please see *Appendix C-3* for the City Directory records.

6.5 Data Gaps

No relevant environmental data gaps were identified during the Phase 1 ESA process.

7.0 Site Reconnaissance

GTS conducted a site reconnaissance on September 25, 2026 to evaluate the potential existence of RECs at the property. The site reconnaissance consisted of a visual site inspection accomplished by systematically walking around the perimeter and throughout the property to evaluate the potential presence of RECs.

Typical RECs include petroleum or waste oil underground or aboveground storage tanks, hazardous materials storage areas, hazardous waste storage areas, stained ground, stressed vegetation, and PCB-containing electrical transformers. In addition, the land-use surrounding the property was also noted.

Photographs were taken to document the salient features of the target property, the surrounding properties, adjacent land-use, and the potential presence of RECs, as discussed below.

7.1 Visual Site Inspection (Onsite)

In addition to general observations concerning the physical site conditions, the property was inspected for the following specific features that commonly constitute RECs at commercial or industrial properties.

Underground Storage Tanks (USTs)

No USTs were present on the property during the site inspection.

Aboveground Storage Tanks (ASTs)

No ASTs were present on the property during the site inspection.

Hazardous Material Storage Areas

No hazardous material storage areas were observed at the property during the site inspection.

Hazardous Waste Storage Areas

No hazardous waste storage areas were observed at the property during the site inspection.

PCB-containing Electrical Transformers

The property was inspected for evidence of electrical transformers that might contain PCBs. PCBs were domestically manufactured between 1929 and 1979, when EPA banned the manufacture of PCBs.

Regulation 40 CFR Section 761 states, in part, that an owner of equipment contaminated with PCBs (i.e., transformers containing > 160 parts per million PCBs) is responsible for any environmental liabilities caused by PCB contamination through leakage, fires, etc.

No PCB-containing electrical transformers were found on the property at the time of the site inspection.

Stained Ground

No areas of stained ground indicative of potential chemical releases were seen during the site inspection.

Stressed Vegetation

No areas of stressed vegetation were noted at the time of the site inspection.

Surface Water Drainage and Retention Ponds

The target property is very flat. No surface water drainage channels or retention ponds were seen on the target property at the time of the site inspection. A drainage channel exists just south of the subject property, however precipitation will tend to be captured by the ground vegetation before slowly percolating downward into the underling clay-rich loamy soils.

Dumping Grounds and Landfills

No evidence of dumping grounds or landfills was seen onsite during the site inspection.

Groundwater Wells

Well database searches show that there are no Public Water Supply wells located within one mile of the target property. One USGS well and three state-registered wells are located within one mile of the property. The USGS water well is situated south-southwest of the target property. The well construction details show that the USGS well is drilled to a depth of 52 feet.

The three state registered wells are located northwest of the property. The wells include two shallow (25-feet and 39-feet deep) monitoring wells, and a deeper domestic water supply well drilled to a depth of 180 feet. Please see *Appendix C-4*, Radius Map.

7.2 Visual Site Inspection (Offsite)

GTS also conducted an offsite visual inspection of surrounding properties that were readily accessible from the target property. Land-use in the vicinity of the target property is primarily industrial.

The following table summarizes the offsite REC observations for the target property.

Summary of Offsite REC Observations

OFFSITE ITEMS	NOT OBSERVED	OBSERVED	DISCUSSED
USTs	X		
ASTs	X		
Hazardous Material Storage Areas	X		
Hazardous Waste Storage Areas	X		
PCB-containing Electrical Transformers	X		
Stained Ground	X		
Stressed Vegetation	X		

Surface Water Drainage and Retention Ponds	X		
Dumping Grounds and Landfills	X		
Groundwater Wells	X		

7.3 Knowledgeable Person Interviews

There was no knowledgeable person available for interview at the time of the site reconnaissance.

8.0 Results of Records Review and Database Search

The target property was listed in the standard government environmental database searches only for permitting. Thirty four facilities within one-mile of the target property were also listed in the environmental databases.

The database listings are considered routine in nature, associated with standard RCRA waste generator notifications; the registration, use, and permanent closure of petroleum underground storage tanks; leaking storage tank site investigations; RCRA corrective action site closures; air emission monitoring; asbestos abatement permitting, and state Voluntary Cleanup Program sites.

The following table summarizes the environmental database search results provided by EDR. The summary table excludes RCRA non-generator (NonGen) sites that are no longer regulated (NLR).

Listed Facilities within 1-mile of Target Property

NAME	ADDRESS	DATABASE	FEET

Note: PERMITS = Permit Data System; FINDS = facility index system; ECHO = environmental compliance history information; ICIS – integrated compliance information system; UST = underground storage tank; LTANKS = leaking storage tank locations; RCRA-VSQG = RCRA very small quantity generator; RCRA-SQG = RCRA small quantity generator; RCRA-LQG – RCRA large quantity generator; SEMS-ARCHIVE – Superfund Enterprise Management System; CORRACTS – RCRA corrective action sites

According to available records, no unresolved environmental issues are present at the listed facilities, and they are either closed or reportedly in compliance with applicable ADEQ and EPA regulations. Thus, none of the listed facilities is considered to represent an REC for the target property.

Please see *Appendix C-4*, Radius Map for further details.

9.0 Non-Scope ESA Considerations

The site reconnaissance also investigated the target property for the potential presence of commonly occurring but non-ASTM-scope ESA items such as asbestos containing materials, lead-based paint, radon zone characterization, regulatory compliance, historic and cultural resources, endangered species, wetlands, and floodplains.

These items, if present, may constitute business environmental risks and thus were also evaluated as part of the Phase 1 ESA scope.

9.1 Asbestos-containing Materials (ACM)

Asbestos is a general term applied to a wide variety of naturally occurring fibrous minerals. Because asbestos is strong, incombustible, and corrosion resistant, it was widely used in buildings constructed prior to 1978.

Asbestos is a general term applied to a wide variety of naturally occurring fibrous minerals. Because asbestos is strong, incombustible, and corrosion resistant, it was widely used in buildings constructed prior to 1978.

Asbestos may be present in roofing shingles, ceiling and floor tiles, paper products, friction products, and heat-resistant materials and coatings. These products are referred to as asbestos-containing materials or ACM.

In 1973, EPA banned spray-applied surfacing ACM used for fireproofing and insulation. In 1975, EPA banned installation of asbestos pipe and block insulation. Then, in 1978, EPA banned spray-applied surfacing ACM for purposes not already banned in the 1973 regulation.

When inhaled in sufficient quantities, asbestos fibers can cause serious health problems; asbestos is one of the few substances proven to be a carcinogen.

ACM is unlikely to be present onsite.

9.2 Lead-based Paint (LBP)

The formulation and use of lead-based paint (LBP) was banned by EPA in 1978. EPA requires certified lead abatement contractors to inspect child-occupied facilities (homes, schools) prior to remodeling or demolition.

LBP is unlikely to be present onsite.

9.3 Radon Zone Characterization

Radon is an invisible, odorless, radioactive gas produced by the decay of uranium in rock and soil. Radon gas enters a building through cracks in the foundation and walls. Buildings with basements and concrete slab foundations are more susceptible to elevated radon gas levels. Once inside the building, the radon decay products may become attached to dust particles and inhaled causing damage to lung tissue.

Radon is measured in picocuries per liter of air (pCi/L). The EPA-recommended safe radon level is considered to be 4 pCi/L. EPA classifies recommended radon levels based on three zones:

- Zone 1: indoor average level > 4 pCi/L
- Zone 2: indoor average level > 2 pCi/L and < 4 pCi/L
- Zone 3: indoor average level < 2 pCi/L

The target property is located in White County, Arkansas. The EPA Radon Zone for White County is designated 3 which corresponds to the lowest range of predicted radon concentrations.

Federal air monitoring test results for 19 locations within White County Zip Code 72143 indicate that 100% of first floor living areas displayed radon concentrations of less than 4 pCi/L.

Please see *Appendix C-4*, Radius Map for further details.

9.4 Regulatory Compliance

No regulatory compliance issues were apparent on the property at the time of the site reconnaissance.

9.5 Historic and Cultural Resources

Because of the long history of agricultural and recreational land-use on the target property, it is considered unlikely that any significant historic and cultural resources are present today onsite.

9.6 Endangered Species

Because of the long history of agricultural land-use and recreational land-use on the property, and considering the industrial facilities surrounding the site, there is a *de minimis* likelihood that listed endangered species presently use the limited habitat available at the municipal outdoor sports facility.

9.6 Wetlands

According to USFWS National Wetlands Inventory, there is one wetland feature on the property. Six offsite wetland features are mapped within a quarter mile radius of the target property. The features likely represent former farm ponds. No wetlands were seen onsite during the site reconnaissance.

Please see *Appendix C-4*

9.8 Floodplains

According to FEMA's Flood Insurance Rate Map (FIRM) for the target property Panel 05145C0455E, Effective Date 5/2/12, the western portion of the property is located in Zone X - Area of Minimal Flood Hazard. However, the southeastern 1/3rd of the property is located in Zone AE – Special Flood Hazard Area with 0.1% annual chance of flood risk, and a portion of the southeast corner is in the Floodway.

See *Appendix C-5* (FEMA Flood Zone Map).

10.0 Summary and Conclusions

GTS recently conducted a Phase I ESA of a 44.46-acre recreational property known as the Forward Searcy Site 1. The site sits west of Queensway Street and east of Veterans Blvd, in Searcy, Arkansas. The property is currently vacant land with two paved car parks.

The ESA report was prepared for Forward Searcy, Inc., Searcy, Arkansas. The 44.46-acre recreational-use property was visually inspected on September 25, 2026 for potential evidence of RECs and certain non-ASTM ESA items that may also pose environmental business risks.

The site was evaluated first-hand by walking around and throughout the 44.46-acre sports park property and noting current ground conditions. Photographs were taken to document the visual site inspection. No RECs were identified on the undeveloped property during the site reconnaissance.

As part of the records research, historical aerial photographs, topographic maps, and environmental regulatory databases were examined. Based upon this review, it is evident that the target property was originally open farmland until the sports complex was expanded north of Gin Creek in the late 1990s.

The target property was listed in the standard government environmental database search under FINDS and PERMITS. Thirty-four facilities within one mile of the target property were listed in the environmental databases.

The database listings are considered routine in nature, associated with standard RCRA waste generator notifications; the registration, use, and permanent closure of petroleum underground storage tanks; leaking storage tank site investigations; RCRA corrective action site closures; air emission monitoring; asbestos abatement permitting, and state Voluntary Cleanup Program sites.

According to available records, no unresolved environmental issues are present at the listed businesses, and the facilities are either closed or currently in compliance with applicable ADEQ and EPA regulations. Thus, the thirty-four listed facilities are not considered to represent RECs for the target property.

Based upon the findings of the Phase 1 ESA, GTS considers the 44.46-acre undeveloped property located on the west side of Veterans Blvd, Searcy, Arkansas, to be unencumbered by known RECs.

11.0 Signature of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in 312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the target property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. It should be understood that this signature does not imply certification of the enclosed document, but merely specifies the individual involved in the preparation and review of the data detailed in this report. Appendix E-1 contains the resume of the GTS Environmental Professional responsible for reviewing and issuing this Phase 1 ESA.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GTS Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

PO # 26-19117

Project Searcy Sports Complex

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: C066-4F65-8A43

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

GTS Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.

LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/26/2026 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

MATTHEWS INTERNATION	***501 EAST LINCOLN AVE***	***NW 1/4 - 1/2 (0.318 mi.)***	***27***	***193***

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/07/2026 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

AMPLER SITE (BURGER	***200 EAST BEEBE CAPPS***	***NW 1/2 - 1 (0.756 mi.)***	***34***	***417***

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/07/2026 has revealed that there is 1

RCRA-TSDF site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/07/2026 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/07/2026 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/07/2026 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 06/24/2026 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

WHITE COUNTY MEDICAL		W 1/8 - 1/4 (0.220 mi.)	23	169

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 11/21/2025 has revealed that there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

COCA COLA BOTTLING C	***510 EAST LINCOLN***	***NNW 1/4 - 1/2 (0.380 mi.)***	***G30***	***288***

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as "e-Manifest," will modernize the nations cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 06/07/2026 has revealed that there are 11 E MANIFEST sites within approximately 0.25 miles of the target property.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Arkansas Permit Data System (PDS) is an integrated system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Arkansas Permit Data System (PDS) is an integrated system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Arkansas Permit Data System (PDS) is an integrated system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
The Arkansas Permit Data System (PDS) is an integrated system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Memo: 7/31/2009 DURING A ROUTINE COMPLIANCE INSPECTION, PRODUCT WAS DISCOVERED IN THE ROAD DIESEL SUMP. THE CONTRACTOR FOR THIS FACILITY, TERRY PRICE WAS PRESENT. HE USED FUEL ONLY ABSORBENT PADS AND REMOVED APPROXIMATELY ONE GALLON OF PRODUCT. MR. PRICE PLACED A LOCK ON THE NOZZLE TO PREVENT FUEL DELIVERY UNTIL THE LEAKING METER COULD BE REPLACED. DUE TO HIGH RAIN LEVELS, THE MONITORING WELLS HAD WATER ABOVE THE CAPS. NO PRODUCT WAS OBSERVED WHEN THE CAPS WERE REMOVED, NOR WAS PRODUCT OBSERVED IN ANY OF THE SUMPS. 8/3/2009 MR. PRICE REPLACED THE METER. NO ADDITIONAL PRODUCT WAS NOTED. PHOTOGRAPHS WERE TAKEN. [BISSELL 8/5/2009 3:09:05 PM]. 10/07/2009 RECEIVED SOIL SAMPLE RESULT FROM TERRY PRICE. BASED ON RESULTS, LUST HAS BEEN DENIED. [BISSELL 10/7/2009 10:08:54 AM].

Environmental Interest/Information System:

The Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D006
Waste Description: Cadmium

Waste Code: D008
Waste Description: Lead

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Lust Tank Type 2: Underground Tank
RST Modified Date: Not reported
Leak Damage: Diesel dispenser sump nearly full with diesel.
Memo: DURING ROUTINE COMPLIANCE INSPECTION DISCOVERED THAT THE DIESEL DISPENSER SUMP WAS NEARLY FULL WITH PRODUCT (APPROXIMATELY 20''). NO WATER WAS DISCOVERED IN SUMP. OWNER SHUT OFF DIESEL SYSTEM AND "BAGGED" DIESEL NOZZLES. CONTRACTOR TERRY PRICE NOTIFIED BY OWNER AND WILL REMOVE PRODUCT, FIND SOURCE OF LEAK AND SAMPLE SOIL NEAR DISPENSER. LATER IN DAY(7/20/2012) RECEIVED A CALL FROM TERRY PRICE-HE FOUND LEAKING UNION AND REPAIRED. PRICE WILL NOW SAMPLE SOIL. [BISSELL 7/23/2012 9:56:58 AM].BASED ON SOIL SAMPLE RESULTS LUST IS DENIED. [BISSELL 8/28/2012 2:08:05 PM].

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D038
Waste Description:	Pyridine
Waste Code:	D040
Waste Description:	Trichloroethylene
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl

DANFOSS POWER SOLUTIONS II (Continued) **1000269604**

Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U019
Waste Description: Benzene (I,T)

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U048
Waste Description: O-Chlorophenol (Or) Phenol, 2-Chloro-

Waste Code: U057
Waste Description: Cyclohexanone (I)

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U081
Waste Description: 2,4-Dichlorophenol (Or) Phenol, 2,4-Dichloro-

Waste Code: U082
Waste Description: 2,6-Dichlorophenol (Or) Phenol, 2,6-Dichloro-

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U149
Waste Description: Malononitrile (Or) Propanedinitrile

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U169
Waste Description: Benzene, Nitro- (Or) Nitrobenzene (I,T)

Waste Code: U170

DANFOSS POWER SOLUTIONS II (Continued) **1000269604**

Waste Description: P-Nitrophenol (I,T) (Or) Phenol, 4-Nitro-

Waste Code: U188
Waste Description: Phenol

Waste Code: U196
Waste Description: Pyridine

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U248
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenyl-Butyl)-, & Salts, When Present At Concentrations Of 0.3% Or Less (Or) Warfarin, & Salts, When Present At Concentrations Of 0.3% Or Less

Waste Code: U353
Waste Description: Benzenamine, 4-Methyl- (Or) P-Toluidine

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Arkansas Permit Data System (PDS) is an integrated system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

DANFOSS POWER SOLUTIONS II (Continued) **1000269604**

storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

Version Date:	2024
North Map:	50048226 JUDSONIA, AR
Version Date:	2024

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

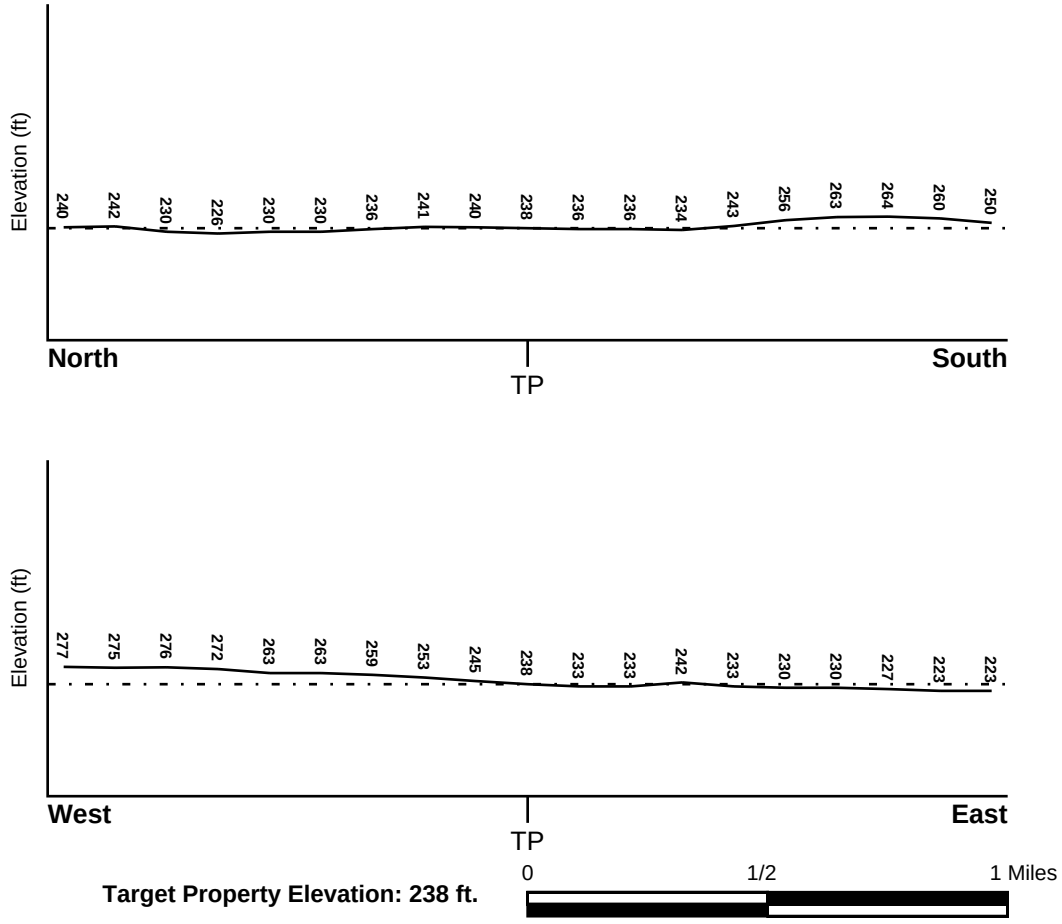

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 238 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
05145C0455E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
KENSETT	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Taft

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 34 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 5.5 Min: 4.5
2	5 inches	20 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 5.5 Min: 4.5
3	20 inches	48 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 5.5 Min: 4.5
4	48 inches	72 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 5.5 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Guthrie

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 23 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	1 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6 Min: 4.5
2	7 inches	24 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6 Min: 4.5
3	24 inches	72 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6 Min: 4.5

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	0 inches	1 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Leadvale

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 0.42	Max: 5.5 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	5 inches	24 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 0.42	Max: 5.5 Min: 4.5
3	24 inches	46 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 0.42	Max: 5.5 Min: 4.5
4	46 inches	72 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 0.42	Max: 5.5 Min: 4.5

Soil Map ID: 4

Soil Component Name: Linker

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 77 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
