EXECUTIVE SUMMARY

The purpose of this document is to report the findings of a Phase I Environmental Site Assessment (ESA) conducted for a site known as the Hope Highway 32 Industrial Site, with six lots totaling 378 acres, located just east of the Hope Municipal Airport, Arkansas off of Arkansas State Highway 32, Hope, Hempstead County, Arkansas (hereafter “the Property”). The Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard Practice E1527-13, and consisted of a records review of reasonably ascertainable environmental and historical record sources, a site reconnaissance, interviews with key site managers, occupants, local governmental agencies and/or other persons with knowledge of the Property. The site visit was conducted on November 14, 2017 by Burgess & Niple, Inc. (B&N) Environmental Professional Ms. Krista N. Carter. Ms. Carter is the principal author of this report. The report was reviewed by Mr. David Walker. The User of this Phase I ESA is American Electric Power (AEP).

Findings of this Phase I ESA are summarized as follows:

- The Property, currently vacant and pastureland, consists of a total of 378 acres, split into six separate lots. The Property is accessed by U.S. 278 West and State Highway 32 North. During World War II (WWII), it was utilized by the military. Utilities currently provided on the site include electric, water, sanitary sewer, and telecommunications/fiber optics.
- The Property is currently vacant. There are three structures located on the 162-acre lot, south of State Highway 32 North. These structures are a dilapidated barn, an old residential well house, and a chlorine storage building owned by Hope Water & Light. Several light industrial properties are adjacent to the north, west, south, and east.
- The three structures present include a dilapidated barn, an old residential well house, and a chlorine storage building owned by Hope Water & Light. The interior of the dilapidated barn and the old residential well house were littered with unknown substance containers with staining on the dirt floor of the barn.
- The U.S. Environmental Protection Agency (EPA) Freedom of Information Act (FOIA) request for the records for the property to the north, Grace Sierra, located at 3713 Highway 32, will not be available until late December. This is beyond reasonably

ascertainable information and is not included as part of this assessment. If information becomes available that is pertinent to possible impacts to the Property, an addendum letter with those files will be issued to the User.

B&N has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 for the Property. Any exceptions to, or deletions from, this practice are described in **Section 1.4** of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property except for the following:

- Oil staining in the dilapidated barn indicates a possible release. Further remediation of this area is warranted to ensure no impacted soil remains on the Property during development.
- Multiple substance containers and household trash was observed in the former well house and dilapidated barn. These items must be cleaned up.
- Until U.S. EPA records for the northern adjacent parcel are reviewed, it is unknown if any impacts to the Property are present. If pertinent information becomes available after the submittal of this report, an addendum letter with summaries of impacts will be submitted to the User.

1.0 INTRODUCTION

1.1 Purpose

The purpose of this document is to report the findings of a Phase I Environmental Site Assessment (ESA) conducted for a site known as the Hope Highway 32 Industrial Site, with six lots totaling 378 acres, located just east of the Hope Municipal Airport off of Arkansas State Highway 32, Hope, Hempstead County, Arkansas (hereafter “the Property”). The Property, currently vacant and pastureland, consists of a total of 378 acres that is split into six separate lots. The Property is accessed by U.S. 278 West and State Highway 32 North. During World War II (WWII), it was utilized by the military. Utilities currently provided on the site include electric, water, sanitary sewer, and telecommunications/fiber optics. A site visit was conducted on November 14, 2017 by Burgess & Niple, Inc. (B&N) Environmental Professional Ms. Krista N. Carter. Ms. Carter was the principal author of this Phase I ESA report. The User of this Phase I ESA is American Electric Power (AEP).

1.2 Detailed Scope of Services

This Phase I ESA was prepared in accordance with the format and procedures outlined by the American Society for Testing and Materials (ASTM) in its Standard Practice E1527-13. Completion of a Phase I ESA generally includes a site visit, a review of reasonably ascertainable environmental and historical record sources, and interviews with Property owners, occupants, local agency representatives, and/or other persons with knowledge of the Property. This Phase I ESA did not include subsurface investigations, soil or water testing of any kind or of any type of environmental media, or identification and evaluation of asbestos-containing building materials; radon; lead-based paint; lead in drinking water; wetlands; regulatory compliance; cultural and historic resources; industrial hygiene; health and safety; ecological resources; endangered species; indoor air quality; biological agents; and mold.

1.3 Significant Assumptions

No significant assumptions were made for purposes of conducting the Phase I ESA for the Property. All findings from the previous Phase I ESA are noted throughout the report.

1.4 Limitations and Exceptions

The Phase I ESA, conducted by B&N for the Property, represents the environmental condition of the Property as of November 14, 2017. Statements contained in this report do not apply to changes in Property use or associated changes in the environmental condition of the Property after this date.

1.5 Special Terms and Conditions

Performance of the Phase I ESA for the site did not include a detailed inspection of adjacent or nearby properties, except as can be viewed from public right-of-ways and reasonably ascertainable regulatory files, if applicable.

1.6 User Reliance

This Phase I ESA report was prepared for the exclusive use of AEP (hereafter, the User). Reliance may be extended to other parties with authorization from the User and express written consent of B&N. Reliance on this report by others without User authorization and express written consent of B&N is at their sole risk.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

Property location, ownership, and legal description information are summarized in **Table 1** below.

Table 1
Property Location, Ownership, and Legal Description

Address	U.S. 278 West and State Highway 32 North
Political Jurisdiction	Hempstead County
Owner	Hope Water & Light
Parcel Nos.	None provided
Total Acreage	378
Zoning	None – Outside of zoning restrictions

A site location map is provided in **Appendix A**. Parcel records were not provided by the User.

2.2 Site and Vicinity Characteristics

The 378-acre Property is located in a rural area with some industrial properties, approximately 5.5 miles north of Hope, Arkansas, in an area with slightly rolling hills. The site has previously been vacant land and pasture. During WWII, the Property was utilized by the military.

2.3 Current Use of the Property

The Property is currently vacant. There are three structures located on the 162-acre lot, south of State Highway 32 North. These structures are a dilapidated barn, an old residential well house, and a chlorine storage building owned by Hope Water & Light. Several light industrial properties are adjacent to the north, west, south, and east.

2.4 Structures; Roads; Utilities, and Other Improvements

Property structures, access, utilities, and other improvements are summarized in **Table 2** below. A site plan is included in **Appendix B**.

Table 2
Property Improvements and Utilities

Structures	Three structures are present - a dilapidated barn, an old residential well house, and a chlorine storage building owned by Hope Water & Light
Roads	U.S. 278 West and State Highway 32 North
Water	Hope Water & Light
Sewer	Hope Water & Light
Storm Water Drainage	Natural drainage
Electric	Hope Water & Light
Gas	CenterPoint Energy
Other Improvements	Wells located in the area providing potable water; Rail line operated by Union Pacific.

2.5 Current Uses of Adjacent Properties

Current uses of adjacent properties are summarized in **Table 3** below:

Table 3
Current Adjacent Property Uses

North	Some industrial and vacant/wooded/pastureland
South	Agricultural/pastureland
East	Residential and industrial
West	Commercial/Hope Municipal Airport

3.0 USER PROVIDED INFORMATION

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the User must conduct the inquiries as provided on the User Questionnaire as required by 40 Code of Federal Regulations (CFR) 312.25, 312.28, 312.29, 312.30, and 312.31. A User Questionnaire was completed by Mr. Steve Saum, Hope Water & Light General Manager. A copy of the completed User Questionnaire is included as **Appendix C**.

3.1 Title Records

No title records were provided by the User for this Phase I ESA.

3.2 Environmental Liens or Activity and Use Limitations

The User indicated they are not aware of any environmental liens or Activity Use Limitations (AULs) for the Property.

3.3 Specialized Knowledge

Hope Water & Light are the owners of the Property. The land is currently used for pasture or hay growth, it does not contain any business dealing with chemicals.

3.4 Valuation Reduction for Environmental Issues

The purchase price is comparable to the fair market value of the surrounding properties.

3.5 Commonly Known or Reasonably Ascertainable Information

3.5.1 Past Uses of the Property

The User reported the past uses of the Property as pastureland.

3.5.2 Current and Past Use of Chemicals on the Property

The User reported no knowledge of current or past use of chemicals on the Property.

3.5.3 Spills or Other Chemical Releases on the Property

The User reported they are not aware of any spills or other chemical releases on the Property.

3.5.4 Environmental Cleanups on the Property

The User reported they are not aware of any environmental cleanups on the Property.

3.6 Presence of Contamination

Based on the User's knowledge and experience related to the Property, they were not aware of any obvious indicators that point to the presence or likely presence of releases at the Property.

3.7 Owner, Property Manager, and Occupant Information

The current owner and property manager of the Property is the Hope Water & Light. There are currently no occupants of the Property.

3.8 Reason for Performing Phase I

The Phase I ESA was performed at the request of AEP to help the Authority market the undeveloped portions of the Property to future industrial companies.

3.9 Other

The User provided no other information regarding the Property.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

A search of standard and additional environmental record sources was conducted for the Property by Environmental data Resources, Inc. (EDR) using approximate minimum search distances as described by ASTM E1527-13 as follows:

Standard Environmental Record Sources (where available)	Approximate Minimum Search Distance miles (kilometers)
Federal NPL site list	1.0 (1.6)
Federal Delisted NPL site list	0.5 (0.8)
Federal CERCLIS list	0.5 (0.8)
Federal CERCLIS NFRAP site list	0.5 (0.8)
Federal RCRA CORRACTS facilities list	1.0 (1.6)
Federal RCRA non-CORRACTS TSD facilities list	0.5 (0.8)
Federal RCRA generators list	Property and adjoining properties
Federal institutional control/engineering control registries	Property only
Federal ERNS list	Property only
State and tribal lists of hazardous waste sites identified for investigation or remediation:	
State and tribal-equivalent NPL	1.0 (1.6)
State and tribal-equivalent CERCLIS	0.5 (0.8)
State and tribal landfill and/or solid waste disposal site lists	0.5 (0.8)
State and tribal leaking storage tank lists	0.5 (0.8)
State and tribal registered storage tank lists	Property and adjoining properties
State and tribal institutional control/engineering control registries	Property only
State and tribal voluntary cleanup sites	0.5 (0.8)
State and tribal Brownfield sites	0.5 (0.8)

NPL = National Priority (Superfund) List; CERCLIS = Comprehensive Environmental Response, Compensation and Liability Information System; NFRAP = No Further Remedial Action Planned; RCRA = Resource Conservation and Recovery Act; TSD = Treatment, Storage, or Disposal; ERNS = Federal Emergency Response and Notification System.

Search results for the Property are summarized below in **Table 4**. Search results for surrounding properties located within the approximate minimum search distance are summarized in **Table 5** following. A copy of the full database report is provided in **Appendix D**.

Table 4
Environmental Records Search Results for the Property

Business Name	Address	Distance Relative to Property (mi)	Record Source	Description
Hope Water & Light (Well No. 1)	110 Temple Drive	0.031 S	Tier 2	Tier 2 listings are facilities which store or manufacture hazardous materials and submit a chemical inventory report. This listing is for a well listed as water supply and the chemical is chlorine.

Table 5
**Environmental Records Search Results
for Surrounding Properties**

Business Name	Address	Distance/ Direction Relative to Property	Record Source	Description
Hope Water & Light (Storage Building No. 1)	3569 Highway 32 North	0.12/ENE	TIER 2	Tier 2 listings are facilities which store or manufacture hazardous materials and submit a chemical inventory report. This listing is for a well listed as water supply (old Well No. 5) and the chemical is chlorine.
New Millennium Building Systems, LLC	3565 Hwy 32 North Oakhaven Ind.	0.14/ENE	RCRA-CESQG	This site is listed as a RCRA CESQG in 2011. These types of facilities generate 100 kg or less per calendar month. They have been reporting since 1999. Informal enforcements are listed.
New Millennium Building, LLC	3565 Hwy 32 North	0.14/ENE	TIER 2	Tier 2 listings are facilities which store or manufacture hazardous materials and submit a chemical inventory report. This listing is for liquid oxygen, carbon dioxide, argon, and paint.
Grace Sierra	3713 Highway 32 North	0.23/WSW	SEMS	This site is not on the NPL and is not listed as a federal facility. No other information is available.
Multiple Ranges		0.86/WSW	UXO	The southwestern Proving Grounds were

Business Name	Address	Distance/ Direction Relative to Property	Record Source	Description
				located in this area. Unexploded Ordnances are possible in this area. This area was used to test munitions between 1942 and 1945 for WWII. The total area of the site is estimated to be 5 miles wide and 19 miles long.

RCRA = Resource Conservation and Recovery Act; CESQG = Conditionally Exempt Small Quantity Generator;
UXO = Unexploded Ordnances

4.2 Local Agency Records

File review requests were made to the following local agencies with potential information regarding spills, releases, or other incidents at the Property that may have involved hazardous substances or petroleum products. Review results are summarized below in **Table 6**.

Table 6
Local Agency Record Review Results

Agency	Contact	Request Date	Response Date
Fire Dept.	Hope Fire Department - firechief@hopearkansas.net	10/17/17	10/17/2017 - No Records for Property
USTs and EPA	Arkansas Department of Environmental Quality - E-Mail winthrop@adeq.state.ar.us	10/17/17	10/17/2017 - No Records for Property
U.S. EPA	Online FOIA request https://foiaonline.regulations.gov/foia/action/public/home	10/17/17	11/21/2017 - No Records for Property, adjacent records available for review after 12/29.

USTs = underground storage tanks; EPA = Environmental Protection Agency; FOIA = Freedom of Information Act

U.S. Environmental Protection Agency (EPA) Records Reviewed:

Copies of correspondence received from local agencies are included in **Appendix E**.

4.3 Other Records

No other environmental databases or other record sources were reviewed for this Phase I ESA.

4.4 Physical Setting Sources

4.4.1 U.S. Geological Survey (USGS) Topographic Maps

The Property is depicted on both the 2017 USGS 7.5-minute series quadrangle for Hope, Arkansas and Sheppard, Arkansas (see **Appendix A**). Average elevation across the property is 350 to 400 feet above mean sea level (amsl).

4.4.2 Physiographic, Geological, Hydrogeological, and Topographic Conditions

The sources were reviewed for information regarding physiographic, geological, hydrogeological, and topographic conditions on the Property and environs:

According to the *Arkansas Geological Survey Physiographic Regions*, the Property is located within the West Gulf Coastal Plain, which is a south sloping plain of gently rolling hills and can be divided into two areas based on the age of the rocks. The area in orange consists of Tertiary clays, sands and silts with lignite deposits and Quaternary gravels, and sands and clays. The area in green consists of Cretaceous sand, clay, gravel, marl, limestone, and chalk and Quaternary sand and gravel.

According to the *Arkansas Geological Survey Aquifers*, much of Arkansas' groundwater comes from Quaternary deposits of sand and gravel in the Mississippi River Embayment. Irrigation wells, with depths ranging from 100 to 200 feet, commonly produce 1,000 to 2,000 gallons per minute (gpm). Although usable for irrigation and some domestic uses, the high iron content of Quaternary aquifers makes the water generally unsuitable for human consumption in many areas. The deeper aquifers, which underlie the majority of the Gulf Coastal Plain, supply most domestic and municipal needs in this part of the State.

The Sparta/Memphis aquifer is located in the middle part of the Claiborne Group (also Eocene in age). The Sparta is used in southern Arkansas and Memphis in the northeastern Arkansas. The top of this major aquifer typically occurs at depths of 200 to 600 feet, and in

some areas as deep as 1,000 feet. Individual wells may produce up to 1,200 gpm. Most communities in southern and eastern Arkansas use this aquifer as their source of supply. Other deeper units that are also used for public supplies include the Carrizo and Wilcox (Eocene) and the Nacatoch (Cretaceous), however these deeper formations may often contain saline water and therefore the area of usefulness is limited.

Topography in the vicinity of the Property is gently rolling with some flat areas.

According U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS), soil types mapped for the Property are summarized in **Table 7** below.

Table 7
Soil Types

Soil Unit Name	Map Abbreviation	Characteristics
Houston clay, 1 to 3 percent slopes	12	The Houston component makes up 95 percent of the map unit. Slopes are 1 to 3 percent. This component is on Blackland Prairie interfluves. The parent material consists of clayey marine deposits. Depth to a root restrictive layer, bedrock, paralithic, is 48 to 72 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is very high. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 60 inches during January, February, and March. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria.
Houston clay, 3 to 8 percent slopes, eroded	13	The Houston component makes up 100 percent of the map unit. Slopes are 3 to 8 percent. This component is on Blackland Prairie interfluves. The parent material consists of clayey marine deposits. Depth to a root restrictive layer, bedrock, paralithic, is 48 to 72 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is very high. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 60 inches during January, February, and March. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 4e. This soil does not meet hydric criteria.

Soil Unit Name	Map Abbreviation	Characteristics
Kipling silty clay loam, 3 to 8 percent slopes, eroded	15	The Kipling component makes up 100 percent of the map unit. Slopes are 3 to 8 percent. This component is on Blackland Prairie interfluvies. The parent material consists of cretaceous clayey marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is high. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 14 inches during January, February, and March. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4e. This soil does not meet hydric criteria.
Mayhew silty clay loam, 0 to 2 percent slopes	1	The Mayhew component makes up 90 percent of the map unit. Slopes are 0 to 2 percent. This component is on Western Coastal Plain and Blackland Prairie stream terraces. The parent material consists of clayey marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is high. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 6 inches during January, February, and March. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3w. This soil meets hydric criteria.
Sacul fine sandy loam, 3 to 8 percent slopes	5	The Sacul component makes up 90 percent of the map unit. Slopes are 3 to 8 percent. This component is on interfluvies on coastal plains. The parent material consists of clayey marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 34 inches during January, February, March, April, and December. Organic matter content in the surface horizon is about 2 percent. This component is in the F133BY003TX Clayey Upland ecological site. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 4e. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.
Una silty clay loam, occasionally flooded	2	The Una component makes up 90 percent of the map unit. Slopes are 0 to 1 percent. This component is on Blackland Prairie flood plains. The parent material consists of clayey alluvium. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is high. This soil is occasionally flooded. It is not ponded. A seasonal zone of water saturation is at 9 inches during January, February, March, April, November, and December. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3w. This soil meets hydric criteria.

4.5 Historical Use Information on the Property

4.5.1 Aerial Photographs

Aerial photographs for the years 1949, 1989, 1994, 2000, 2009, 2010, 2013, and 2015 were obtained for review from EDR. Observations regarding the Property and surroundings are summarized below in **Table 8** for each photograph year.

Table 8
Historical Aerial Photograph Observations

Photo Year	Observations
1949	The Property appears to be relatively vacant with some structures that appear to be residential. There are no other industrial structures visible. Possible military activity is to the north of State Highway 32 North. Hope Municipal Airport is visible to the west.
1989	The resolution of the 1989 aerial photographs are poor and distinct observations cannot be made. Some possible development is visible to the north of State Highway 32 North.
1994	The Property appears to be vacant agricultural/pastureland. Some structures are visible on the 162-acre lot and the 72-acre lot. Some development is visible to the north of State Highway 32 North.
2000	The resolution of the 2000 aerial photographs are poor and distinct observations cannot be made. Some additional development is visible to the north of State Highway 32 North and to the west near the rail spur.
2009/2010	The Property appears to be vacant agricultural/pastureland. Some structures are visible on the 162-acre lot and the 72-acre lot. The water tower is visible on the 26-acre lot. The visible surrounding development appears mostly as it does today. Large areas of land to the west appear to be used for trailer storage.
2013/2015	The Property and surrounding area appear mostly as it does today.

Copies of historical aerial photos reviewed are provided in **Appendix F**.

4.5.2 Sanborn® Fire Insurance Maps

Sanborn maps are generally obtained as part of the environmental database review from EDR. Coverage is generally limited to urban areas. As such, no Sanborn® maps were available for this site.

4.5.3 Local Street Directories

City Directories for the years 1999, 2003, 2008, and 2013 were obtained for review from EDR. City Directory review results show that none of the listings were for the Property. The City Directory search was performed for streets within the Property and joining cross streets. City Directory review results are included in **Appendix G**.

4.5.4 Prior Assessments

One prior environmental assessment was provided for the Property. **Appendix H** contains the previous environmental assessment. The following summarizes the document.

Environmental Site Assessment, Phase I for Industrial Park (Oakhaven Area) Hempstead County, Arkansas, Hope Water and Light Commission, June 8, 1995, Huntingdon Engineering & Environmental, Inc.

- Review of historical information revealed the site was formerly owned by the U.S. Government and was part of the Southwestern Arkansas Proving Grounds. Private landowners acquired the Property from the U.S. Government.
- There are no petroleum storage tank facilities listed or observed in the immediate vicinity of the site.
- Site buildings were inspected from the outside. The water pump station contained chloride gas, for adding chlorine to the drinking water.

Recommendations:

The Southwestern Proving Grounds could have some hazardous materials or pose hazardous conditions on the site. Information gathered and reviewed show these activities took place mostly north of the site. It was Huntingdon's opinion, a Phase II ESA would be costly and would not guarantee the location of any hazardous conditions for the site.

4.5.5 Other Historical Sources

No additional historical record sources were discovered or reviewed during conduct of this Phase I ESA.

4.6 Historical Use Information on Adjoining Properties

Relevant observations regarding historical uses of adjoining properties are noted above in the descriptions of historical records reviewed for the Property.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

A site reconnaissance of the Property was conducted by Ms. Krista N. Carter of B&N on November 14, 2017. Site photographs depicting conditions during the site reconnaissance are provided in **Appendix I**.

Limiting conditions noted were no access to the entirety of each lot.

5.2 General Site Setting

5.2.1 Current Uses of the Property

The Property is currently vacant. There are three structures located on the 162-acre lot, south of State Highway 32 North. These structures are a dilapidated barn, an old residential well house, and a chlorine storage building owned by Hope Water & Light. Several light industrial properties are adjacent to the north, west, south, and east.

5.2.2 Past Uses of the Property

The Property was once used by the U.S. Government as a military base and part of an area known as the Southwestern Proving Grounds. After WWII, the government sold the land to private sellers.

5.2.3 Current Uses of Adjoining Properties

Current uses of adjacent properties are summarized in **Table 3** (see **Section 2.5**).

5.2.4 Past Uses of Adjoining Properties

Past uses of adjoining properties include vacant, agricultural, and pastureland after WWII. Prior to that, the area was used by the U.S. Government as a military base and part of an area known as the Southwestern Proving Grounds. After 1945, the area became developed with industrial properties.

5.2.5 Current and Past Uses in the Surrounding Area

The surrounding area is mostly forested, pastureland, agricultural, or vacant land, with some rural residential properties. Past uses include use by the U.S. Government as a military base and part of an area known as the Southwestern Proving Grounds. Today, the northern portion of the area is mostly industrial.

5.2.6 General Description of Structures

There were no residential or commercial structures on the Property. Three structures are present, a dilapidated barn, an old residential well house, and a chlorine storage building owned by Hope Water & Light.

5.2.7 Roads

Access to the Property is provided from U.S. 278 West and State Highway 32 North.

5.2.8 Potable Water Supply and Sewage Disposal System

Potable water and sanitary sewer are provided to the site by Hope Water & Light. Storm water sewer is not at the site and occurs through natural drainage.

5.3 Exterior Observations

5.3.1 Chemical Products and Wastes Stored Outside

There were no hazardous substances, petroleum products, drummed wastes, or other chemical products and/or product containers observed on the Property.

5.3.2 Aboveground Storage Tanks (ASTs)

There were no observed or reported ASTs or evidence of former AST locations on the Property.

5.3.3 Underground Storage Tanks (USTs)

There were no observed or reported USTs or evidence of former UST locations on the Property.

5.3.4 Odors

No unusual odors were noted during the site walkover.

5.3.5 Pools of Liquid

No pools of liquid were observed on the exterior of the Property during the site walkover.

5.3.6 Drums

There were no observed or reported drums or evidence of former drum locations on the Property.

5.3.7 Substance Containers (Identified and Unidentified)

There were no observed or reported substance containers or evidence of former substance container locations on the Property.

5.3.8 Polychlorinated Biphenyls (PCBs)

There were no transformers, capacitors or other major electrical equipment, or former locations of these, observed or reported on the Property.

5.3.9 Pits, Ponds, or Lagoons

One pond was observed on the 72-acre lot. This pond was reported to be manmade and is used to water the cattle.

5.3.10 Stained Soil or Pavement

No significant areas of stained soil or pavement were observed on the exterior of the Property during the site walkover except for inside the dilapidated barn on the 162-acre lot. There was significant staining on the soil floor from possible former oil storage.

5.3.11 Stressed Vegetation

No areas of stressed vegetation were observed on the Property during the site walkover.

5.3.12 Solid Waste

No solid waste disposal methods were observed on the Property.

5.3.13 Wastewater

There were no process wastewater discharges and/or treatment facilities with exterior components or discharges observed on the Property.

5.3.14 Wells

Two potable water wells were observed on the Property. Both wells were located on the 162-acre lot. One well was located in a vacant well house just northeast of the dilapidated barn. It is unknown how old the well is. The second well is located north of the dilapidated barn and is located in a well house. This well is part of the potable water well network for the area.

5.3.15 Storm Water

Storm water is handled by ditches and channels located on site. New development may require additional storm water provisions.

5.4 Interior Observation

There are no structures currently on the property except for three structures including a dilapidated barn, an old residential well house, and a chlorine storage building owned by

Hope Water & Light. The interior of the dilapidated barn and the old residential well house were littered with unknown substance containers with staining on the dirt floor of the barn.

5.4.1 Other Observations

No other interior observations pertaining to hazardous substances or petroleum products were noted.

6.0 INTERVIEWS

The following persons were interviewed for information regarding current and past operations, and uses of hazardous substances and petroleum products on the Property during conduct of this Phase I ESA.

Table 9
Phase I ESA Interviewees

Name	Title	Affiliation	Interviewed By/Date
Steve Saum	General Manager	Hope Water & Light	Krista N. Carter/November 14, 2017
Steve Harris	President	Hempstead County Economic Development Corp.	Krista N. Carter/November 14, 2017

6.1 Interview with Key Site Manager

Both Mr. Saum and Mr. Harris were interviewed prior to visiting the site. Mr. Harris accompanied Ms. Carter during the site visit. Both Mr. Saum and Mr. Harris stated they were unaware of any hazardous or petroleum releases at the site. Mr. Saum stated chlorine storage was present in the potable water well house. They were not aware of any other chemical storage on the Property.

6.2 Interviews with Occupants

There are currently no occupants of the site.

6.3 Interviews with Local Government Officials

All interviews with local and governmental officials are summarized in **Section 4.2**.

6.4 Interviews with Others (Past Owners, Operators, and/or Occupants)

No past owners or occupants were interviewed for this Phase I.

7.0 FINDINGS

A Phase I ESA was conducted for a site known as the Hope Highway 32 Industrial Site, with six lots totaling 378 acres, located just east of the Hope Municipal off of Arkansas State Highway 32, Hope, Hempstead County, Arkansas in accordance with the standards set forth in ASTM Standard Practice E1527-13. Conduct of the Phase I ESA in accordance with these standards has revealed the following:

- The Property, currently vacant and pastureland, consists of a total of 378 acres that is split into six separate lots. The Property is accessed by U.S. 278 West and State Highway 32 North. During WWII, it was utilized by the military. Utilities currently provided on the site include electric, water, sanitary sewer, and telecommunications/fiber optics.
- The Property is currently vacant. There are three structures located on the 162-acre lot, south of State Highway 32 North. These structures are a dilapidated barn, an old residential well house, and a chlorine storage building owned by Hope Water & Light. Several light industrial are adjacent to the north, west, south, and east.
- The three structures present included a dilapidated barn, an old residential well house, and a chlorine storage building owned by Hope Water & Light. The interior of the dilapidated barn and the old residential well house were littered with unknown substance containers with staining on the dirt floor of the barn.
- The U.S. EPA, the Freedom of Information Act (FOIA) request for the records for the property to the north, Grace Sierra located at 3713 Highway 32 will not be available until late December. This is beyond reasonably ascertainable information and is not included as part of this assessment. If information becomes available that is pertinent to possible impacts to the Property, an addendum letter with those files will be issues to the User.

8.0 OPINION

According to ASTM Practice E1527-13, the goal of this process is to establish and identify recognized environmental conditions (RECs). RECs are defined as follows:

Recognized Environmental Conditions (RECs)—the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not RECs.

Historical Recognized Environmental Condition (HRECs)—a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

Controlled Recognized Environmental Condition (CRECs) —a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

The Environmental Professional's opinions regarding findings of the Phase I ESA conducted for a site known as the Hope Highway 32 Industrial Site, with six lots totaling 378 acres, located just east of the Hope Municipal Airport off of Arkansas State Highway 32, Hope, Hempstead County, Arkansas are:

- This assessment has revealed no evidence of RECs in connection with the Property except for the following:
 - o Oil staining in the dilapidated barn indicates a possible release. Further remediation of this area is warranted to ensure no impacted soil remains on the Property during development.

- o Multiple substance containers and household trash was observed in the former well house and dilapidated barn. These items must be cleaned up.
- o Until U.S. EPA records for the northern adjacent parcel are reviewed, it is unknown if any impacts to the Property are present. If pertinent information becomes available after the submittal of this report, an addendum letter with summaries of impacts will be submitted to the User.

9.0 DATA GAPS

No significant data gaps which may affect the Environmental Professional's ability to identify RECs were encountered during this Phase I ESA other than the following:

- No review of U.S. EPA Records available for northern adjacent property.
- No aerials available for review between 1949 and 1989.

10.0 CONCLUSIONS

B&N has performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 for a site known as the Hope Highway 32 Industrial Site, with six lots totaling 378 acres, located just east of the Hope Municipal Airport off of Arkansas State Highway 32, Hope, Hempstead County, Arkansas. Any exceptions to, or deletions from, this practice are described in **Section 1.4** of this report.

This assessment has revealed no evidence of RECs in connection with the Property except for the following:

- Oil staining in the dilapidated barn indicates a possible release. Further remediation of this area is warranted to ensure no impacted soil remains on the Property during development.
- Multiple substance containers and household trash was observed in the former well house and dilapidated barn. These items must be cleaned up.
- Until U.S. EPA records for the northern adjacent parcel are reviewed, it is unknown if any impacts to the Property are present. If pertinent information becomes available after the submittal of this report, an addendum letter with summaries of impacts will be submitted to the User.

11.0 DEVIATIONS

Any exceptions to, or deviations from ASTM Standard Practice E1527-13 in the conduct of this Phase I ESA are described in **Section 1.4** of this report.

12.0 ADDITIONAL SERVICES

No investigation of Non-Scope Considerations as defined in ASTM Standard Practice E1527-13, Section 13 or other additional services were provided pursuant to this Phase I ESA.

13.0 REFERENCES

References for site-specific information obtained from published sources and summarized in this report for the Property are noted in the text or included as footnotes throughout the report.

14.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

I, Krista N. Carter declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312. I have the specific qualifications based on education, training, and experience to assess a Property of the nature, history, and setting of the Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312, and the Annotations.

Krista N. Carter
Environmental Professional

15.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Ms. Carter joined B&N in January 2012. She has been conducting Phase I ESAs for over 17 years. Her experience during the years of her environmental consulting career includes ASTM and Voluntary Action Program (VAP) Phase I and Phase II Property Assessments for industrial to small and large retail facilities, as well as private residential and large vacant tracts of land. She has conducted Phase II subsurface investigations and contamination remediation at UST facilities, industrial sites, and landfills. She holds an Associates of Arts in Environmental Technology from Columbus State Community College. Ms. Carter meets the ASTM definition of an Environmental Professional.

User Questionnaire

Introduction

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that “all appropriate inquiries” is not complete.

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

No liens were found.

2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi).

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

No AULs were found.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Hope Water and Light are the owners of the property. The land is currently used for pasture or hay growth, it does not contain any business dealing with chemicals.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

The purchase price is comparable to the fair market value of the surrounding properties.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

a. Do you know the past uses of the *property*?

Pasture land.

b. Do you know of specific chemicals that are present or once were present at the *property*?

None

c. Do you know of spills or other chemical releases that have taken place at the *property*?

None

d. Do you know of any environmental cleanups that have taken place at the *property*?

None

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/11/2017 has revealed that there is 1 SEMS site within approximately 0.75 miles of the target property.

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

EXECUTIVE SUMMARY

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-CESQG site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/31/2015 has revealed that there is 1 FUDS site within approximately 1.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SOUTHWESTERN PROV GR		WSW 1/2 - 1 (0.869 mi.)	C12	108

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2014 has revealed that there is 1 TRIS site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NEW MILLENNIUM BUILD	3565 HWY 32 N	ENE 1/8 - 1/4 (0.148 mi.)	A6	102

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 12/31/2009 has revealed that there is 1 SSTS site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
HOPE AGRI PRODUCTS,	3713 HWY 32	WSW 1/8 - 1/4 (0.238 mi.)	B8	103

EXECUTIVE SUMMARY

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 11/18/2016 has revealed that there are 3 ICIS sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

W.W.R. TECHNOLOGIES,	149 NORTH INDUSTRIAL	NNE 1/8 - 1/4 (0.223 mi.)	7	102

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there is 1 US AIRS site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NEW MILLENIUM BUILDING	3565 HWY 32 NORTH OA	ENE 1/8 - 1/4 (0.148 mi.)	A4	23

Database: US AIRS (AFS), Date of Government Version: 10/12/2016

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/23/2017 has revealed that there are 4 FINDS sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Arkansas Permit Data System (PDS) is a system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

CRITERIA AIR POLLUTANT MAJOR

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United

States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AIR MAJOR

HAZARDOUS WASTE BIENNIAL REPORTER

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

Environmental Interest/Information System

Arkansas Permit Data System (PDS) is a system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Description: Located near Hope, Arkansas, the 50,077-acre site is approximately 5 miles wide (east-west) and 19 miles long (north-south). It is under about 230 ownerships. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.

Current Program:

History:

Not reported
The proving ground was used to test munitions between January 1942 and September 1945. Current land usage includes an industrial park, an airport, a wildlife reserve, forestland, grazing land, and cropland. Southwestern Proving Grounds is sparsely populated, with housing units throughout. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: N/A
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 10/05/2017
Number of Days to Update: 98	Next Scheduled EDR Contact: 01/15/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: N/A

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/11/2017	Source: EPA
Date Data Arrived at EDR: 07/28/2017	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2017	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/26/2017	Telephone: 214-665-6444
Date Made Active in Reports: 10/06/2017	Last EDR Contact: 09/26/2017

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/26/2017	Telephone: 214-665-6444
Date Made Active in Reports: 10/06/2017	Last EDR Contact: 09/26/2017
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/08/2018

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

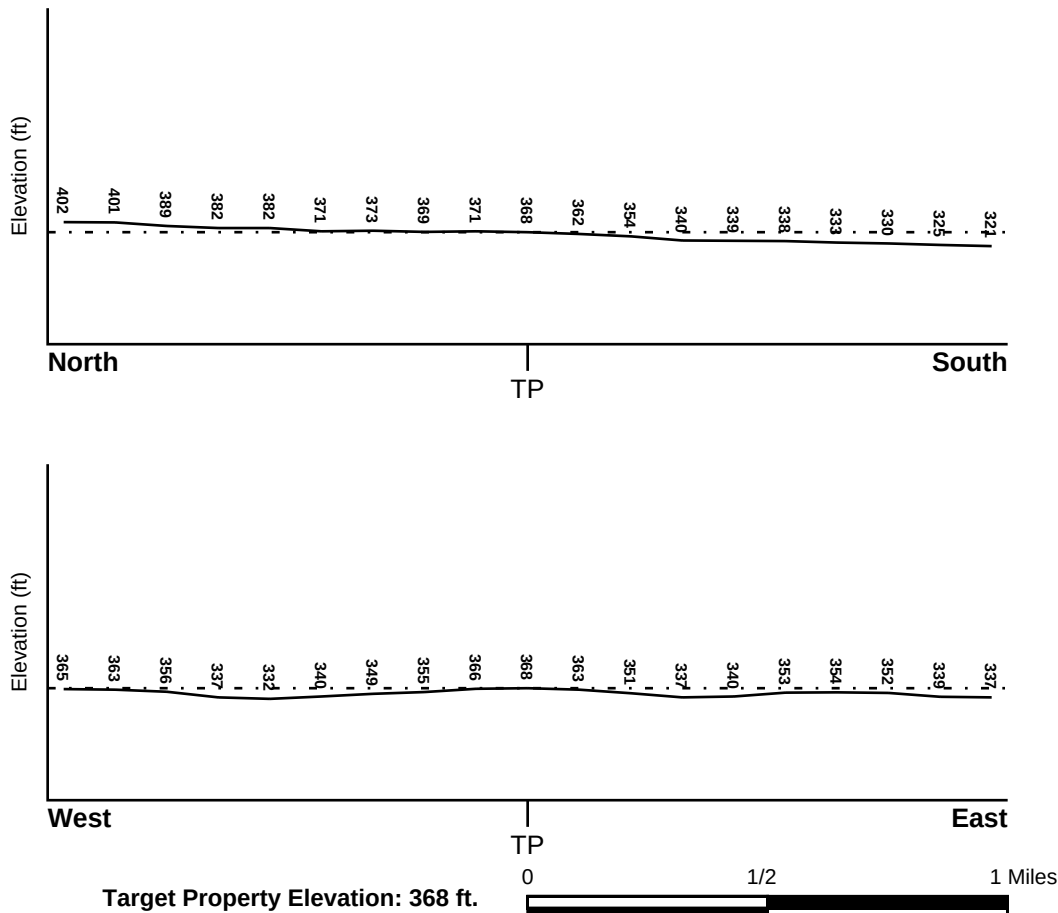

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
05057C0350C	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
05057C0355C	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SHEPPARD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>
Not Reported	<u>FROM TP</u>	<u>GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Mesozoic

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: SUMTER

Soil Surface Texture: silty clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 20 inches

Depth to Bedrock Max: > 40 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	10 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.06	Max: 8.40 Min: 6.60
2	10 inches	21 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 2.00 Min: 0.06	Max: 8.40 Min: 7.40
3	21 inches	28 inches	channery - silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 2.00 Min: 0.06	Max: 8.40 Min: 7.40
4	28 inches	60 inches	weathered bedrock	Not reported	Not reported	Max: 0.01 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
clay
silty clay loam

Surficial Soil Types: silt loam
clay
silty clay loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: clay
silty clay
silty clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Subject: Information Request

Burgess & Niple, Inc. (B&N) is submitting this letter as a Freedom of Information Act (FOIA) request to obtain copies of, or review publicly available files for a property located in Hope, Arkansas, Hempstead County near the Hope Municipal Airport and is known as Hope Highway 32 Industrial Park. A map has been provided for the properties of interest. There are no specific addresses for these sites.

Please let me know ASAP if additional information is needed. The Properties are owned by Hope Water and Light.

Our request to obtain or review files related to this property includes any and all documents (internal correspondence, letters, reports, notes, recommendations, and other material) that your office may have concerning the above referenced site. B&N is particularly interested in information related to the use, storage, or disposal of hazardous substances and/or petroleum products; the presence of underground storage tanks (USTs) and leaking underground storage tanks (LUSTs); and issues associated with hazardous waste as well as water well information.

Please address any correspondence concerning this request to the following:

- Krista N. Carter
Burgess & Niple, Inc.
5085 Reed Road
Columbus, OH 43220
Phone: (614) 459-7272, Ext. 1286; Fax: (614) 451-1385
Email: krista.carter@burgessniple.com

Thank you in advance for your assistance in locating available information for this site.

Respectfully submitted,

Krista N. Carter ♦ Environmental Scientist

Good Morning!

I am sending you the requested files for Hope Water & Light facility ID #29001649. You can view the inspections by going to our website (<https://www.adeq.state.ar.us>) under RST division and view some of the information on our database. If I can be of any further assistance feel free to let me know.

Sincerely,

Diane Taylor

VII. DESCRIPTION OF UNDERGROUND STORAGE TANKS

(Complete for each tank at this location.)

	Tank Nbr	Tank Nbr	Tank Nbr	Tank Nbr	Tank Nbr
1. Status of Tank	1				
Currently in Use	✓				
Temporarily Out of Use (Complete Section IX)					
Permanently Out of Use (Complete Section IX)					
Recently Installed					
2. Date of Installation (mm/dd/yyyy) (Estimate if unknown)	11-15-98				
3. Estimated Total Capacity (Gallons)	4.1				
4. Material of Construction (Mark all that apply)					
Asphalt coated or bare steel	✓				
Epoxy coated steel					
Composite (steel w/ fiberglass exterior)					
Fiberglass reinforced plastic					
Concrete					
Interior lining					
Excavation liner					
Double walled					
Polyethylene tank jacket					
Unknown					
Other, please specify					
Has tank been repaired? (If yes, give date of last repair)					
5. Substance Stored					
Empty	✓				
Diesel	✓				
Kerosene					
Gasoline	✓				
Used oil					
New oil					
Hazardous Substance — CERCLA Name					
CAS Number					
Mixture, please specify					
Unknown					
Other, please specify					
6. Release Detection (Mark all that apply)					
Date Installed	981128				
Manual tank gauging (Applies only to tanks 2,000 gallons or less)					
Precision tank tightness testing					
Monthly inventory controls					
Automatic tank gauging	✓				
Vapor monitoring					
Groundwater monitoring					
Interstitial monitoring / double walled tank					
Unknown					
Other, please specify					

VII. DESCRIPTION OF UNDERGROUND STORAGE TANKS (CONTINUED)

	Tank Nbr	Tank Nbr	Tank Nbr	Tank Nbr	Tank Nbr
7. Corrosion Protection (Mark all that apply)					
Date installed					
External coating:					
..... Asphalt coating	✓				
..... Dielectric coating (e.g., epoxy resin)					
..... Fiberglass reinforced plastic					
Internal lining (e.g., epoxy resin)					
Cathodic protection system	✓				
Electrical isolation					
Unknown					
Other, please specify					
8. Spill and Overfill Prevention (Mark all that apply)					
Spill catchment basin	✓				
Auto overfill device:					
..... Shutoff valve	✓				
..... Flow restrictor valve					
..... High level alarm					
Unknown					
Other, please specify					

VIII. DESCRIPTION OF PIPING (Complete for each tank at this location.)

1. Material of Construction (Mark all that apply)					
Bare steel					
Galvanized steel					
Fiberglass reinforced plastic					
Copper					
Double walled	✓				
Secondary containment					
Unknown					
Other, please specify	✓				
2. Type					
Suction: check valve directly under pump					
Suction: check valve at tank					
Pressure	✓				
Gravity feed					
Unknown					
Other, please specify					
Has piping been repaired? (If yes, give date of last repair)					
3. Release Detection (Mark all that apply)					
Vapor monitoring					
Groundwater monitoring					
Precision line tightness testing					
Automatic line leak detector	✓				
Interstitial monitoring					
Unknown					
Other, please specify					

VIII. DESCRIPTION OF PIPING (CONTINUED)

	Tank Nbr	Tank Nbr	Tank Nbr	Tank Nbr	Tank Nbr
4. Corrosion Protection (Mark all that apply)					
Coated / wrapped					
Fiberglass reinforced plastic					
Cathodic protection system					
Electrical isolation					
Unknown					
<u>ENVIRON</u> Other, please specify ☒					

IX. TANKS TEMPORARILY OR PERMANENTLY OUT OF USE, OR CHANGE IN SERVICE OF TANKS

1. Temporarily Out of Use Tanks					
Date product was removed from tank (y/m/d)					
2. Permanently Out of Use Tanks					
Date product was removed from tank (y/m/d)					
Date tank removed from ground (y/m/d)					
Date tank filled with inert solid material (sand, concrete, etc.) (y/m/d)					
Date of change in service (y/m/d)					
3. Site Assessment Completed					
Estimated date of action (y/m/d)					
Evidence of a leak detected					

X. CERTIFICATION OF COMPLIANCE

Tank Warranty Validation Card

Please complete this form to validate your sti-P₃® warranty. This card must be completely and accurately filled out and returned to STI within 90 days after the tank is installed, or within 90 days after the tank is shipped from the manufacturer, whichever comes first. Follow cathodic protection testing requirements found in the sti-P₃® Installation Instructions.

RETURN TO: STEEL TANK INSTITUTE, 570 OAKWOOD ROAD, LAKE ZURICH, ILLINOIS 60047

sti-P₃® Label # 248057 Manufacturer Name HALL TANK CO

Date of Shipment 9 / 10 / 98 Date of Installation 9 / 10 / 98

ADDRESS # 1 TANK INSTALLED LOCATION

TANK TYPE

☐ Flow-through process tank or oil/water separator
☐ Heating oil storage tank for a furnace or emergency generator
☐ Emergency overflow or spill protection tank; NOT a tank for the PERMANENT storage of petroleum products
☐ PERMANENT UNDERGROUND STORAGE TANK FOR PETROLEUM OR OTHER PRODUCTS
☐ Aboveground tank

☐ Tank on or above a basement floor
☐ Truck tank
☐ Tank storing heated product

PRODUCT STORED

☐ Wastewater or water
☐ Heating Oil (petroleum #1, #2, #4 or #5 heavy or #6)
☒ Diesel fuel for powering motor vehicles
☐ Diesel fuel for heating purposes on premises
☐ Kerosene for powering motor vehicles
☐ Kerosene for heating purposes on premises
☐ Crude Oil
☐ Waste Oil
☐ Leaded Gasoline

☐ Premium Unleaded Gasoline
☐ Mid Grade Unleaded Gasoline
☒ Regular Unleaded Gasoline
☐ Methanol Blended Gasoline
☐ AVGAS
☐ Caustic (s)
☐ Jet Fuel
☐ Fertilizers
☐ Plastic Resins
☐ Other substances; please identify

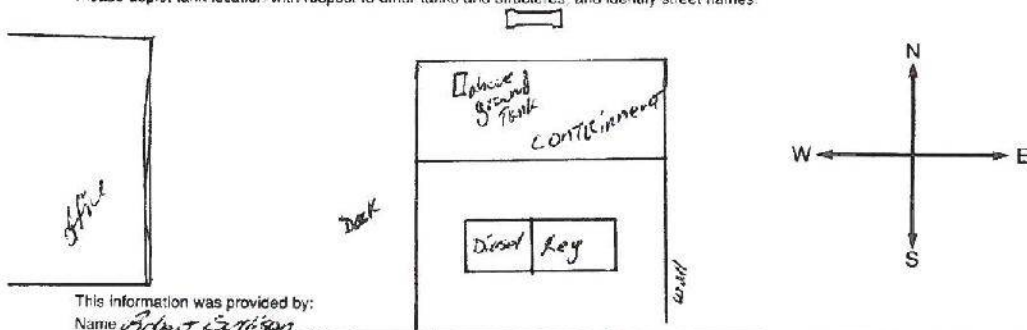

Please indicate in what setting this tank will be used: ☐ Other

☐ Private Residence ☐ Gas Station ☐ Jobber ☐ Car Dealer ☐ Hospital ☐ Marina ☐ Fleet Owner ☒ Utility Site
☐ Farm/Nursery ☐ Convenience Store ☐ Quick Lube ☐ Government ☐ School ☐ Airport ☐ Industrial Site

Would you like to be contacted by Veri-Tank for a quotation on on-site monitoring of the cathodic protection system on your sti-P₃® tank?

☐ Yes ☒ No

Please depict tank location with respect to other tanks and structures, and identify street names.

DESCRIPTION	READING	RESULTS
Tank #1 Unleaded/ Diesel	-912 mV	Meets Criteria

This cathodic protection installation satisfies the Environmental Protection Agency (EPA) Federal Regulations (CFR) 280 & 281 and the NACE Standard RP-0285-2002-04-06.

A negative voltage of at least -850 mV must be measured between the steel structure and a copper/copper sulfate electrode contacting the electrolyte for use of structure-to-soil potential measurements.

Referring to the above readings, the structure-to-soil measurements are more negative than the -850 mV indicating cathodic protection in accordance with the criteria.

To: Carter, Krista
Subject: FOIA Request EPA-R6-2018-000635 Submitted

This message is to confirm your request submission to the FOIAonline application: [View Request](#). Request information is as follows:

- Tracking Number: EPA-R6-2018-000635
- Requester Name: Krista N. Carter
- Date Submitted: 10/17/2017
- Request Status: Submitted
- Description: Burgess & Niple, Inc. (B&N) is submitting this letter as a Freedom of Information Act (FOIA) request to obtain copies of, or review publicly available files for a property located in Hope, Arkansas, Hempstead County near the Hope Municipal Airport and is known as Hope Highway 32 Industrial Park. A map has been provided for the properties of interest. There are no specific addresses for these sites. Please let me know ASAP if additional information is needed. The Properties are owned by Hope Water and Light. Our request to obtain or review files related to this property includes any and all documents (internal correspondence, letters, reports, notes, recommendations, and other material) that your office may have concerning the above referenced site. B&N is particularly interested in information related to the use, storage, or disposal of hazardous substances and/or petroleum products; the presence of underground storage tanks (USTs) and leaking underground storage tanks (LUSTs); and issues associated with hazardous waste as well as water well information. Please address any correspondence concerning this request to the following: · Krista N. Carter Burgess & Niple, Inc. 5085 Reed Road Columbus, OH 43220 Phone: (614) 459-7272, Ext. 1286; Fax: (614) 451-1385 Email: krista.carter@burgessniple.com Thank you in advance for your assistance in locating available information for this site.

Subject: Follow-up Needed for FOIA Request: EPA-R6-2018-000635

10/17/2017 06:17 PM
FOIA Request: EPA-R6-2018-000635

Dear Ms. Carter:

The EPA Region 6 office received your FOIA Request: EPA-R6-2018-000635 in which you requested to obtain copies of, or review publicly available files for a property located in Hope, Arkansas, Hempstead County near the Hope Municipal Airport and is known as Hope Highway 32 Industrial Park. A map was provided for the properties of interest. There are no specific addresses for these sites. The Properties are owned by Hope Water and Light.

Your current fee commitment is inadequate to complete your FOIA request. Please let us know your decision on increasing the fee commitment to a total of \$55 dollars.

We will assume you are voluntarily withdrawing your FOIA request if we do not receive a response before October 31, 2017.

Sincerely,

Nancy Ho

EPA Region 6 FOIA Team

Subject: Your Freedom-of-Information Act Request # EPA-R6-2018-000635 - Hope Highway 32 Industrial Park

Ms. Carter,

This e-mail is a follow-up to a voicemail left for you today. EPA Region 6 is in receipt of your subject FOIA request, and would like to obtain clarification.

We have located records under the site name Grace Sierra (ARN000607506) located at 3713 HWY 32 North Hope, Arkansas 71801 which appears to be in the vicinity of the area referenced in the request. Will you please confirm if you would like to receive these records? Would you be agreeable to an extension until Friday, December 29, 2017, to allow for time to process your request. Would you also be agreeable to receiving rolling responses every 30 days.

Justification:

The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records involved in your request. (5 USC 552(a)(6)(B)(iii)(II))

Will you please confirm if you would like public available information only, or would you like a denial log of withheld information. If we locate any CBI, would you like to have it substantiated? Please note that the substantiation process can take up to a year to finalize, and can result in additional cost to you.

In the meanwhile, if you would like to modify or narrow your request so that it may be processed sooner; or if you no longer wish us to continue processing or if you have any questions about this request or disagreements with the extension deadline, please inform me before November 6, 2017.

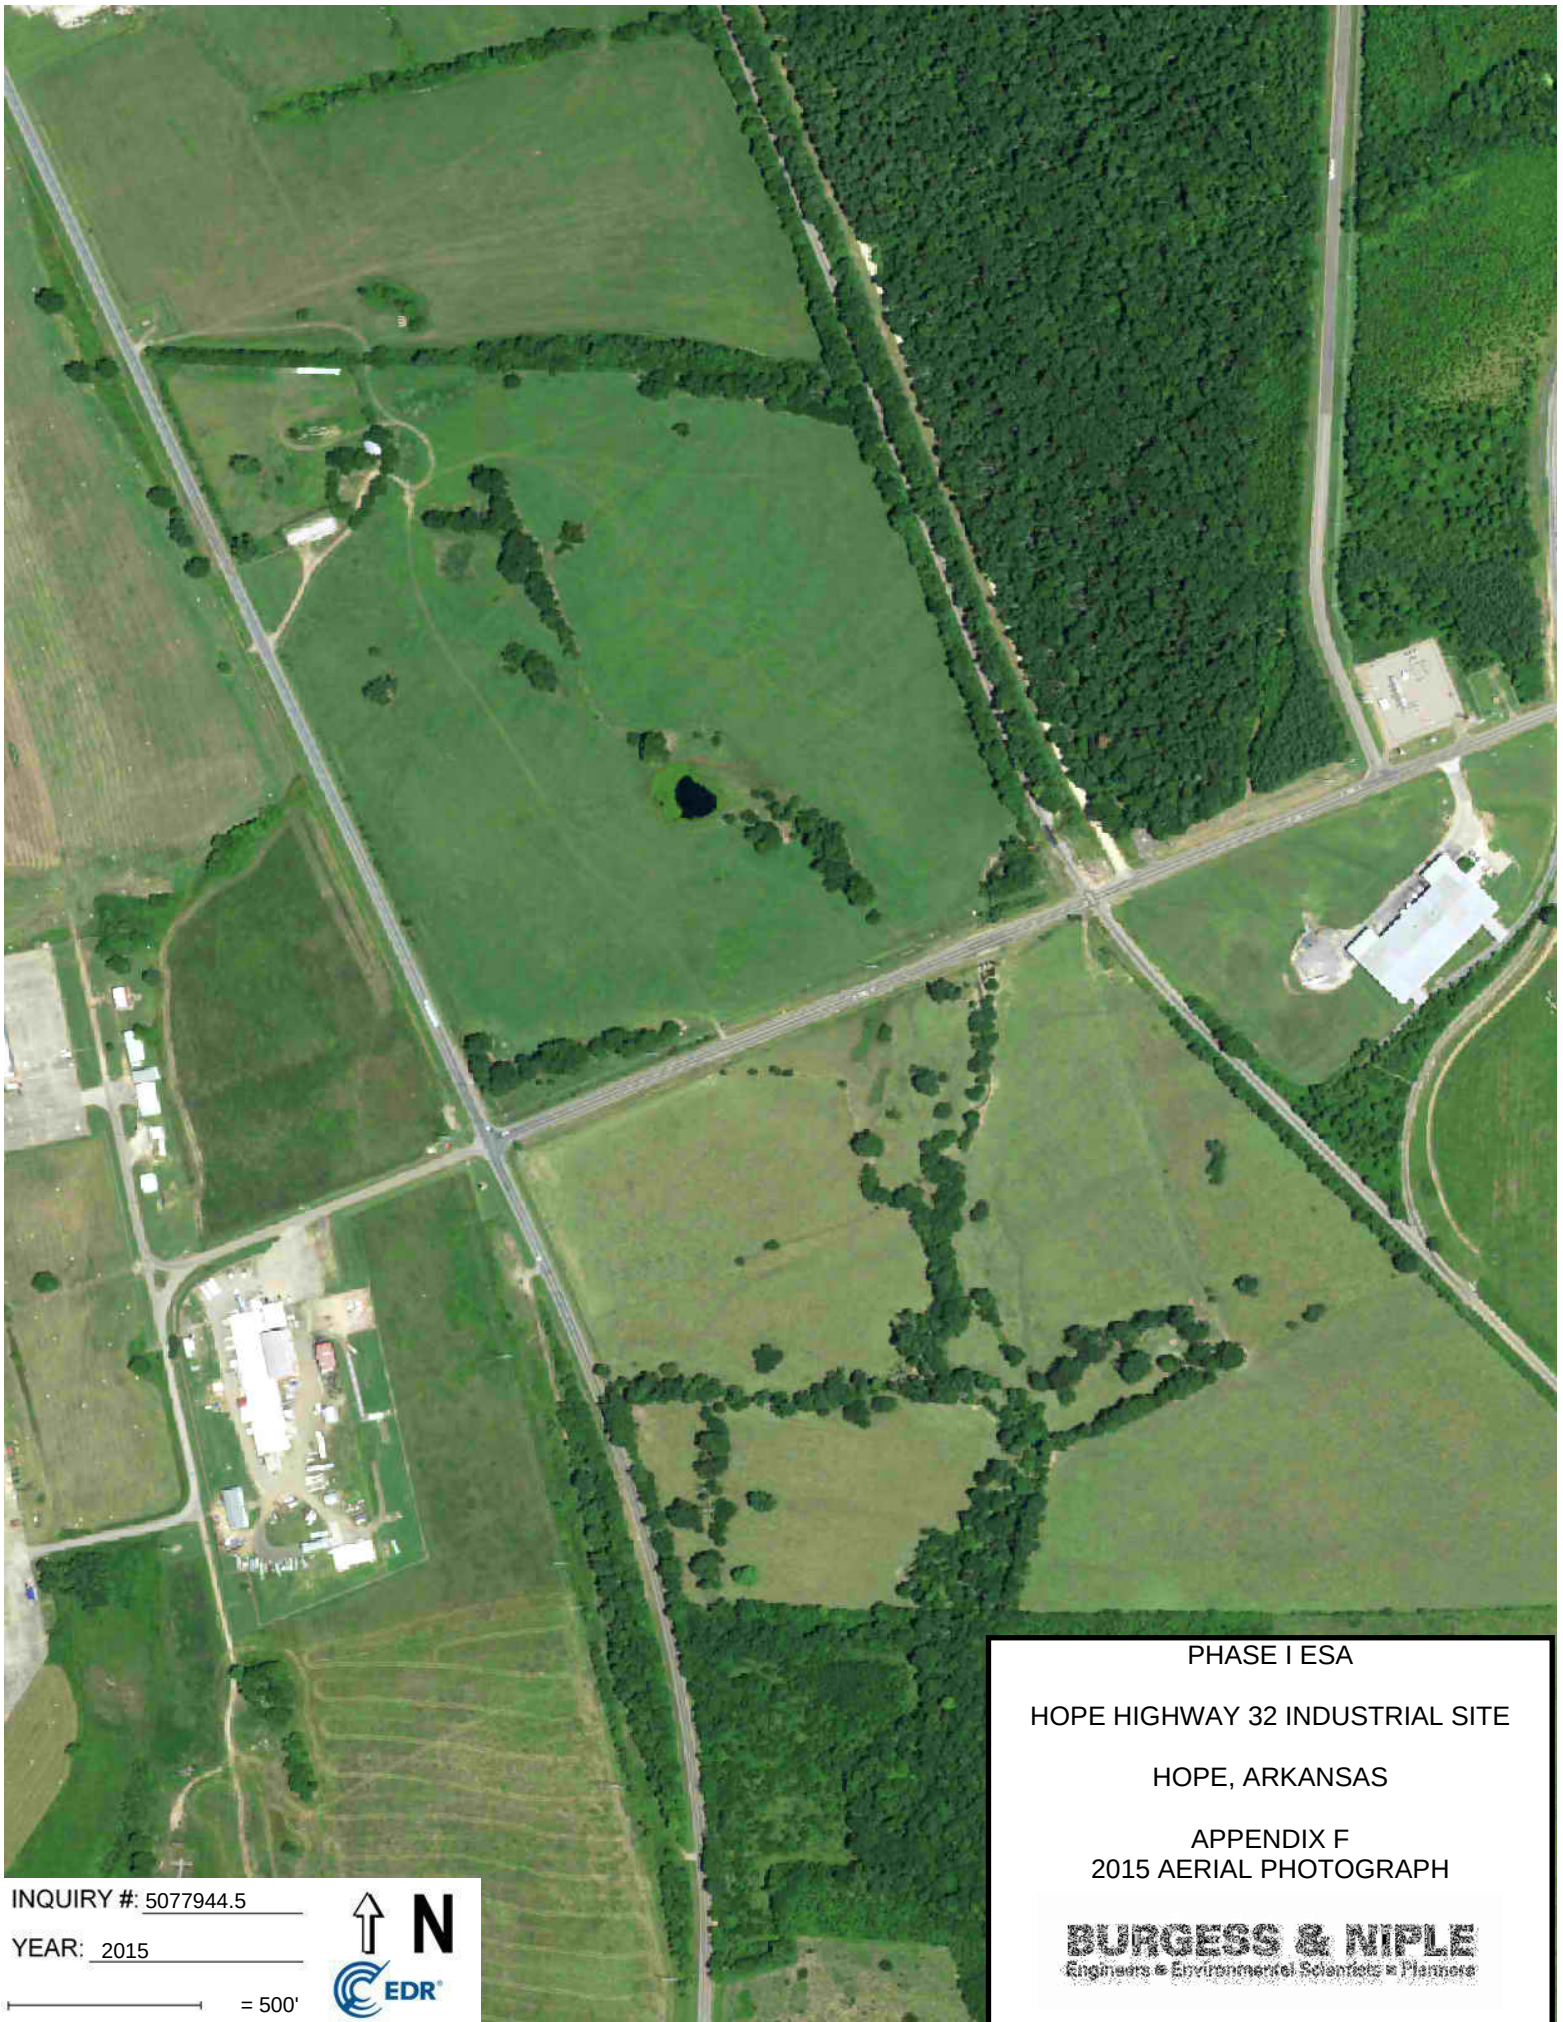

Additionally, you may seek dispute resolution services from EPA's FOIA Public Liaison at hq.foia@epa.gov or (202) 566-1667, or from the Office of Government Information Services (OGIS). You may contact OGIS in any of the following ways: by mail, Office of Government Information Services, National Archives and Records Administration, Room 2510, 8610 Adelphi Road, College Park, MD 20740-6001; email, ogis@nara.gov; telephone, (202) 741-5770 or (877) 684-6448; or fax, (202) 741-5769.

Thank you

Diana Ortiz

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Gentlemen:

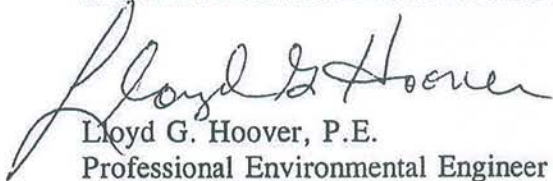

Submitted herewith is the report for an Environmental Site Assessment, Phase I conducted at the above-referenced site. This study was performed in accordance with Huntingdon's agreement with Hope Water and Light Commission.

Information accumulated for this assessment will be retained with your project file. The report and information in your file is considered confidential and will not be released without your authorization.

We appreciate the opportunity to perform these services for Hope Water and Light Commission. Please contact me if you have questions regarding this information.

Sincerely,

HUNTINGDON/SOUTHWESTERN LABORATORIES, INC.

Lloyd G. Hoover, P.E.
Professional Environmental Engineer

Huntingdon

ENVIRONMENTAL SITE ASSESSMENT OF INDUSTRIAL PARK (OAKHAVEN AREA) HEMPSTEAD COUNTY, ARKANSAS

EXECUTIVE SUMMARY

In accordance with our agreement in April, 1995, Huntingdon Engineering & Environmental, Inc. (HEE) performed an ESA of the above-referenced property (hereinafter, the site) for Hope Water and Light Commission. The scope of service, objectives, extent and limitations of the services and this report are described in more detail in the text of the report.

The site is in the Oakhaven area in Hempstead County, Arkansas on both sides of Arkansas Highway 32 and east of Arkansas Highway 4.

Review of historical information revealed the site was formerly owned by the United States government. It was part of the southwestern Arkansas Proving Grounds. Private landowners acquired the property from the U. S. Government.

There were no PST facilities observed or listed within the immediate vicinity of the site. Based upon this there does not appear to be an environmental concern from PSTs.

The site and buildings were visually inspected from the outside. Since buildings, except dwellings, appear to have been built after 1978, no asbestos containing material is expected to exist in the Industrial buildings. No disposed ACM materials were observed on the site. The water pump station contained chloride gas, probably for adding chlorine to the drinking water.

Based upon the results of the Phase I assessment, Huntingdon presents the following:

- The Southwestern Arkansas Proving Ground could have caused some hazardous material or condition to exist on the site. Information presented in the text of this report indicate training took place mostly north of the subject property. It is Huntingdon's opinion an ESA Phase II would be costly and would not guarantee the

Huntingdon

location of any hazardous waste or conditions on the site. With this information available and with the procedure called for in the text of the report, Huntingdon does not see an immediate need for a Phase II Environmental Site Assessment.

Huntingdon

ENVIRONMENTAL SITE ASSESSMENT OF INDUSTRIAL PARK (OAKHAVEN AREA) HEMPSTEAD COUNTY, ARKANSAS

1.0 INTRODUCTION AND SCOPE OF SERVICE

In accordance with our proposal and the executed agreement in April, 1995 Huntingdon Engineering & Environmental, Inc. (HEE) performed an ESA Phase I of the above-referenced property (hereinafter, the site) for Hope Water and Light Commission.

This report is an instrument of service of Huntingdon and includes limited research, a review of specified and reasonably ascertainable listings and a site reconnaissance to identify "recognized environmental conditions" in general accordance with acceptable practices. This ESA may reflect additional or reduced services or service enhancements requested or authorized by the Client. "Recognized environmental conditions" are defined as "the presence or likely presence of any hazardous substances or petroleum products on a site under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property." Huntingdon's ESA was performed in accordance with generally accepted practices of the profession undertaken in similar studies at the same time and in the same geographical area, and Huntingdon observed that degree of care and skill generally exercised by the profession under similar circumstances and conditions.

This study and report has been prepared on behalf of and for the exclusive use of Hope Water and Light Commission solely for his use and reliance in the environmental assessment of this site. Hope Water and Light Commission is the only party to which Huntingdon has explained the risks involved and which has been involved in the shaping of the scope of services needed to satisfactorily manage those risks, if any, from Hope Water and Light Commission's point of view. Accordingly, reliance on this report by any other part may involve assumptions whose extent and nature lead to a distorted meaning and impact of the findings and opinions related herein. Huntingdon's findings and opinions related in this report may not be relied upon by any party except Hope Water and Light Commission. With the consent of Hope

Huntingdon

Water and Light Commission and Huntingdon, Huntingdon may be available to contract with other parties to develop findings and opinions related specifically to such other parties' unique risk management concerns related to the site.

2.0 OBJECTIVES AND LIMITATIONS OF ASSESSMENT

Huntingdon has endeavored to meet what it believes is the applicable standard of care for the services performed and, in doing so, is obliged to advise Hope Water and Light Commission of ESA limitations. Huntingdon believes that providing information about limitations is essential to help clients identify and thereby manage risks. These risks can be mitigated -- but not eliminated -- through additional research. Huntingdon will, upon request, advise Hope Water and Light Commission of the additional research opportunities available and associated costs.

This ESA did not include any inquiry with respect to radon, methane, lead-based paint, lead in drinking water, formaldehyde, endangered species, wetlands, subsurface investigation activities or other services or potential conditions or features not specifically identified and discussed herein. In those instances where additional services or service enhancements are included in the report as requested or authorized by the client, specific limitations attendant to those services are presented in the text of the report.

The findings and opinions conveyed via this ESA report are based upon information obtained at a particular date from a variety of sources enumerated herein, and which Huntingdon believes are reliable. Nonetheless, Huntingdon cannot and does not warranty the authenticity or reliability of the information sources it has relied upon.

This report represents Huntingdon's service to Hope Water and Light Commission as of the report date. In that regard, the report constitutes Huntingdon's final document, and the text of the report may not be altered in any manner after final issuance of the same. Opinions relative to environmental conditions given in this report are based upon information derived from the most recent site reconnaissance date and from other activities described herein. Hope Water and Light Commission is herewith advised that the conditions observed by Huntingdon

Huntingdon

are subject to change. Certain indicators of the presence of hazardous materials may have been latent or not present at the time of the most recent site reconnaissance and may have subsequently become observable. In similar manner, the research effort conducted for a Phase I ESA is limited. Accordingly, it is possible that Huntingdon's research, while fully appropriate for a Phase I ESA and in compliance with the scope of service, may not include other important information sources. Assuming such sources exist, their information could not have been considered in the formulation of our findings and conclusions.

This report is not a comprehensive site characterization or regulatory compliance audit and should not be construed as such. The opinions presented in this report are based upon findings derived from a site reconnaissance, a review of specified records and sources and comments made by interviewees. Specifically, Huntingdon does not and cannot represent that the site contains no hazardous or toxic materials, products, or other latent conditions beyond that observed by Huntingdon during its site assessment. Further, the services herein shall in no way be construed, designed or intended to be relied upon as legal interpretation or advice.

3.0 SITE DESCRIPTION

The site is located east of the junction of Arkansas Highway 4 and Arkansas Highway 32. The site lies south and north of Arkansas Highway 32. Missouri Pacific Railroad crosses the property in a general north-south direction. A railroad spur connects with the main track just south of Funder America, Inc. The spur crosses Highway 32 and services industry on the north side of Highway 32 as well as Funder America, Inc. A more detailed description of the property is provided later in this text but the site consists mostly of pastureland to the west, plowed fields to the southeast and a pasture area to the northeast. A legal description, by Webb's Surveying, of the property is found in the appendix.

4.0 RECORDS REVIEW

4.1 Historical Use Information

Historical use information for the site and adjoining properties was obtained from reviewing reasonably ascertainable historical sources such as aerial photographs, city directories, courthouse records, and additional sources listed below. Uses of the site are referenced from

Huntingdon

the present back over fifty (50) years ago using reasonably ascertainable standard historical sources.

4.1.1 Ownership Information

Brief ownership description follow for various years.

<u>Grantor - Grantee</u>	<u>Book & Page</u>
U.S.A. to M.S. Bates	203-76
U.S.A. to Herman Stoy	199-127
U.S.A. to Hempstead County (for roads)	210-178
U.S.A. to City of Hope	210-509
Beulah Stoy to Genevieve Biorseth	232-95
M.S. Bates to Ernest May et al	248-652
Genevieve Biorseth to Ernest May et al	266-125
M.S. Bates to Ernest May et al	266-123
City of Hope to Ernest May et al	363-437
Ernest May et al to Hope Water & Light Commission	619-206
Hope Water & Light Commission to Funder America, Inc.	623-301

Ownership sometimes leads to possible business that could have produced hazardous waste. A more detailed, descriptive ownership was observed but did not alter the basis for the research, thus, the detailed ownership is not presented.

4.1.2 Historical Interviews

Interviews with persons familiar with the site were conducted to obtain information pertinent to the environmental evaluation of the site.

Interviewee: Mr. David Fincher

Mr. Fincher stated he has been an employee of Hope Water and Light for nine (9) years. He has been aware of this site for that period of time. Mr. Fincher is not aware of any hazardous spills that have occurred on the site. Mr. Fincher does not know of any hazardous waste that may exist or have been disposed of on the site.

Mr. Fincher indicates the transformers observed on the power lines do not contain any PCB's. He indicated Scott, an individual client on the site, manufactured potting soil and Hope Agra

Huntingdon

manufactured potting soil. He indicated Funder America utilized laminated plywood or particle board. He knows of no hazardous waste these industries might produce. Mr. Fincher had no knowledge of any lagoons on the project. He stated there may be some cattle ponds on the site.

The substation being constructed would transmit up to 115,000 volts on the high side and 13,800 volts on the low side. He believes the site was mostly farm land development.

The interviewer noticed activity on the site. Mr. Fincher indicated the construction work was the laying of a sewer line and a water line. He was not aware of any UST's on the site but did not know if existing plants had UST's. The large power line along Arkansas Highway 32 is a 115,000 volt line.

Interviewee: Mr. Buddy Wesson

Mr. Wesson is with Temple-Inland. He has been in the area for about one year. His company is building a large plant about 1/2 mile north of the subject site. Mr. Wesson does not know of any hazardous conditions or spills which may exist or have occurred on the site. He stated the area was a second World War Training base. The base was about 50,000 acres. He noted the government returned the land for civilian use. He is presently leasing the old Ernest May residence for a temporary office complex.

Mr. Wesson indicated at least one little pond existed on the subject property. He also noted the site had received about 4½" of rain the last month or so.

Interviewees: Mr. Ernest May and Mr. Galen May

Mr. Ernest May has been aware of the site for about 35 years. Mr. Ernest May preferred the interviewer to ask questions to his son, Mr. Galen May.

Mr. Galen May came to the Texarkana area around 1949 or 1950. Other than diesel fuel that may have dropped on the ground while filling farming equipment, Mr. May knows of no hazardous spills. He stated the area was a military proving ground. He stated the gunnery

Huntingdon

positions existed north of the subject property. He stated there were no oil field refineries or oil wells he was aware of. He knew of an old septic tank in the pasture at the southeast corner of the intersection of Highway 4 and Highway 32. It was part of the old airport west of Arkansas Highway 4.

Mr. May had a 4 inch diameter 170 foot deep water well on his old house location. Mr. Ernest May indicated a 2 inch well by the house was capped off. Mr. Galen May said there may be another 4 inch water well on the north part of the property. Mr. May noted there were several Hope Water and Light wells about 1,100 feet deep in the area.

Other than small containers of one to five gallons, Mr. May said the subject site was not used to store pesticides.

4.2 Physical Setting Information

4.2.1 Topography

The site is generally rolling land. Large elevation changes did not occur on the site. The elevation changes that occur were not steep changes. A creek traverses the property north-south. It is generally west of the railroad track south of Arkansas Highway 32 and east of the railroad track north of Arkansas Highway 32. Two other drainage areas appear mostly on the south side of State Highway 32.

4.2.2 Site Geology

Geologic Code:	uKa
ERA	Mesozoic
SYSTEM	Cretaceous
SERIES	Navarro Group

4.2.3 Regional Groundwater Conditions

The general groundwater flow for this area is towards the south.

Huntingdon

4.3 Regulatory Review

The purpose of the records review is to obtain and review reasonably ascertainable records that will help identify recognized environmental conditions in connection with the site. Information requested and not received within 20 days after the report date will not be incorporated into this report. The approximately minimum search distance (MSD) for the site vicinity review is noted under each database listed below. Regulatory data for facilities with recognized environmental conditions is within the appendices of this report. Remaining regulatory support data will be maintained with the Huntingdon project file.

4.3.1 Federal Database Information

Federal NPL Site List

The NPL was reviewed to identify CERCLIS facilities within the area around the site. No NPL was located in the 1 mile radius.

Federal CERCLIS List

The EPA CERCLIS database identifies facilities that have potential releases of hazardous substances as reported under CERCLIS, Section 103 or private citizens. RCRA-permitted facilities do not appear on this database, but NPL facilities are typically listed. No CERCLIS facilities were found in a 1/2 mile radius.

Federal RCRA List for TSD, adjoining for generators and transporters)

Facilities listed in the RCR database are designated as hazardous waste treatment, storage, and disposal (TSD) facilities, hazardous waste generators or hazardous waste transporters. RCRA TSD facilities or RCRA Violator/RAATS facilities in the areas around the property are listed in the appendix. No adjoining RCRA generators or transporters were identified during this review. No RCRIS small quantity generator was located within a 1/4 mile radius. No large quantity generators were located within the 1/4 mile radius.

Federal EPA National Priorities Sites Listing

The facilities on the National EPA Priorities List in the area is listed in the appendix. None were located in a 1 mile radius.

Huntingdon

State Solid Waste Disposal Facility Listings

No State Solid Waste Disposal facilities were identified within the search radius.

State Registered Leaking PST/UST Listings

State Registered Leaking PST/UST facilities were identified in the area. Identified facilities with potential recognized environmental conditions are listed in the appendix. Based upon the distance from the site, these facilities do not appear to present an environmental concern to the site at this time. No UST was located in the 1/2 mile radius.

State Registered PST/UST Listings

State Registered PST/UST facilities were identified within the area search. A list is shown in the appendix. None appear within a 1/4 mile of subject site.

5.0 SITE RECONNAISSANCE

The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the site to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles.

The site and adjoining properties were visually observed on May 24, 1995 by Huntingdon Environmental Professional Engineer, Lloyd G. Hoover, P.E. The purpose of the reconnaissance was to note visual or olfactory evidence of recognized environmental conditions. Additionally, reconnaissance of adjoining properties was performed to identify land use and associated potential recognized environmental conditions.

5.1 Site Observations

5.1.1 Site Overview

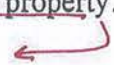

Access to this property is off State Highway 4 and State Highway 32. Beginning on the west side of the property a creek runs north/south and contains water. A low ponded area next to State Highway 32 with mud and water exists. The west side is bounded by State Highway 4. West of Highway 4 Hope Airport exists. The west side of subject property is mostly pasture land. The southwest corner is partly wooded with pasture area. The terrain is rolling land.

Huntingdon

The northwest area has a drainage ditch thirty feet north of Highway 32. It appears to drain to the creek. A residence with a barn is located 50 to 100 feet east of Highway 4. The dwelling is now being used as a temporary office.

Funder America is located at 3754 on Highway 32. It is surrounded by pasture and fields. A parking lot surrounds the building. Several stacks of old railroad ties are found along the spur that services Funder America. The south side of the property is wooded, especially along the creek line along the south boundary.

Three barns were noted on the south side of Highway 32 going east. A cattle pen was noted in the north side as you go east on Highway 32. This is on the subject site. Further east on Highway 4 Hope Industrial Park is located. Hope Concrete exists at the entrance of the IP road. This is not on the subject site. ^{Bortens}~~Bortens~~ is being constructed. It is surrounded with mostly pasture land. There is activity going on in the Park. Supplies were being stored. This area is not on the subject site.

An elevated water tower, substation, power plant and storage yard were noted just off State Highway 32. These areas were not on the subject site. Homestead County Road #275 dead ends at the Hope Agri products plant. This is the westerly line of tract 3. A power line runs the length of the road back to the plant. ~~As noted a water tower is on the north side of Highway 32 just before you get to County Road 275. This is part of subject property.~~ A pasture with drainage ditch is found on the east side of County Road 275. 

5.1.2 Description of Specific Site Features

Topographic Observations

The surface drainage on the site appears to flow to the south. The land is rolling.

Odors

Odors were noted on subject site.

Huntingdon

Drums and Other Containers

No hazard material containers were observed on the site visit.

PCBs

Transformers were noticed on one power pole on the subject site. Information supplied indicated no PCB's were in the transformers.

Drains and Sumps

No oil drains or sump areas were observed during the site visit other than normal runoff water drainage areas.

Pits, Ponds or Lagoons

A cattle pond was observed on the property. A low area that contained water (mud hole) was noted.

Wells

Three water wells exist on the site. These are private water wells not in use.

5.2 Adjoining Property Observations

Adjoining properties were visually examined from public access right-of-ways to make a cursory assessment of the current land use and its potential for recognized environmental conditions which may have impact on the site. Reconnaissance of adjoining properties was performed by viewing land use from legal boundaries or by walking upon the adjoining properties that were legally accessible. Adjoining development to the site is as follows:

- North:** CSI and Southwest Shavings Broiler Mix near Highway 4 about 1/4 mile north of property. Temple-Inland Construction, wooded area about 1/2 mile northeast of Railroad Scotts Co., Hope Water & Light substation, and two deep wells.
- South:** Pasture area, creek with trees.
- East:** Commercial building east of side of tract 3 property.
- West:** Highway 4, Hope Airport.

Huntingdon

5.3 ACM

The buildings were not inspected for ACM. The house was not observed from the inside. It did not contain asbestos shingles.

6.0 RECOMMENDATIONS

Huntingdon does not recommend a Phase II ESA at this time. However, during or before construction on this site specific areas should be observed for any latent contaminants.

APPENDIX A LEGAL DESCRIPTION

TRACT 1:

A part of the NE1/4, NE1/4 of Section 11, and parts of the following tracts in Section 12; part of the NW1/4, and part of the SW1/4, NE1/4, and part of the N1/2, NW1/4, SW1/4, and part of the N1/2, NW1/4, SE1/4, and part of the NE1/4, SE1/4; and all of the N1/2, NE1/4, SW1/4, all in T-12-S, R-25-W, Hempstead County, Arkansas, and being more particularly described as follows:

Commence at a 1/2" rod found for the SW corner of the NW1/4 of Section 12, T-12-S, R-25-W and run thence N 2°49'49"E 2106.55 feet along west line of Section 12 to the POINT OF BEGINNING, said point being on the easterly R/W of State Highway no. 4, run thence S 23°19'37"E 2098.25 feet along the said easterly R/W to a point, continuing with the R/W run thence along a curve to the right with a delta angle of 11°24'27" having a radius of 4444.04 feet and a arc length of 884.80 feet, with a chord bearing and distance of S 17°37'23"E 883.34 feet, to a 1/2" rod set, leaving the R/W of State Highway no. 4 run thence S 89°09'28"E 1394.37 feet to a 1/2" rod set, run thence S 88°09'25"E 1318.10 feet to a 1/2" rod set for the SE corner of the N1/2 of the NW1/4, SE1/4 of Section 12, run thence S 2°57'06"W 664.32 feet to a 1/2" rod set for the SW corner of the NE1/4, SE1/4 of Section 12, run thence S 88°07'59"E 846.80 feet to a 1/2" rod set on the westerly R/W of the Missouri-Pacific Railroad (now the Union-Pacific Railroad), run thence N 43°52'55"W 3171.90 feet along the said westerly R/W of the railroad to a point, continuing along the westerly R/W of the railroad run thence along a curve to the right with a delta angle of 23°42'17" having a radius of 2018.84 feet and a arc length of 835.24 feet, with a chord bearing and distance of N 32°01'46"W 829.30 feet, to a point, run thence N 20°10'38"W 1162.78 feet along the Union-Pacific Railroad R/W to a 1/2" rod set at the intersection of the said railroad R/W and the north line of Section 12, run thence N 88°16'19"W 1848.05 feet along the north line of Section 12 to a 1/2" rod set on the easterly R/W of State Highway no. 4, run thence S 23°19'37"E 668.52 feet along the said easterly R/W of State Highway no. 4 back to the POINT OF BEGINNING, containing 165.634 acres more or less.

TRACT 2:

A part of the SE1/4, SE1/4 of Section 1, and part of the NE1/4 of Section 12, and a part of the E1/2 of the NW1/4 of Section 12, and a part of the N1/2, NW1/4, SE1/4 of Section 12, and a part of the NE1/4, SE1/4 of Section 12, all in T-12-S, R-25-W, Hempstead County, Arkansas, and a part of the fractional S1/2 of the SW1/4 of Section 6, and part of the NE1/4, NW1/4 of Section 7, as well as all of the fractional W1/2 of the NW1/4 of Section 7, all in T-12-S, R-24-W, Hempstead County, Arkansas, and being more particularly described as follows:

Commence at an axle found for the SW corner of Section 6, T-12-S, R-24-W, said axle being near the northwesterly corner of an existing stock shed, and run thence S 2°56'33"W 116.49 feet to a point in the center of State Highway no. 32, run thence S 69°00'49"W 387.17 feet along the center of the said State Highway no. 32 to a cotton spindle set for the POINT OF BEGINNING, leaving the highway run thence N 20°59'11"W 475.00 feet to a 1/2" rod set, run thence N 69°00'49"E 1125.32 feet parallel to Highway no. 32 to a 1/2" rod set, run thence S 20°59'11"E 475.00 feet to a cotton spindle set in the center of State Highway no. 32, run thence N 69°00'49"E 1888.30 feet along the centerline of State Highway no. 32 to a cotton spindle set in the center of the said highway, leaving the highway run thence S 2°54'45"W 935.55 feet generally with an old fence to a 1/2" pipe found on the north side of a cross-tie corner post, said point being the SE corner of the SW1/4 of Section 6, T-12-S, R-24-W, run thence N 87°22'27"W 1003.64 feet also generally with an existin fence and with the south line of Section 6 to a 1/2" rod set, leaving the section line run thence S 2°53'11"W 210.00 feet to a 1/2" rod set, run thence N 87°22'27"W 315.00 feet to a 1/2" rod set on the east line of the fractional W1/2, NW1/4, Section 7, T-12-S, R-24-W, run thence S 2°53'11"W 2460.08 feet along that said east line of the fractional W1/2, NW1/4 to a 1/2" rod set for the SE corner of the same, run thence N 88°31'49"W 1085.56 feet along a fence and the south line of the fractional W1/2, NW1/4 of Section 7 to a 1/2" rod set for the SW corner of the same, run thence S 2°56'33"W 1235.37 feet along the Range Line to a 1/2" rod set for the SE corner of the NE1/4, SE1/4 of Section 12, T-12-S, R-25-W, run thence N 88°07'59"W 328.08 feet along the south line of the said NE1/4, SE1/4 to a 1/2" rod set on the easterly R/W of the Missouri-Pacific Railroad (now the Union-Pacific Railroad), run thence N 43°52'55"W 3274.54 feet along the easterly R/W of the Union-Pacific Railroad to a point, run thence along a curve to the right with a delta angle of 23°42'17" having a radius of 1918.84 feet and a arc length of 793.87 feet, with a chord bearing and distance of N 32°01'46"W 788.22 feet, to a point on the easterly R/W of the said railroad, run thence N 20°10'38"W 1122.57 feet along the said railroad R/W to a 1/2" rod set at the intersection of the easterly R/W of the Union-Pacific Railroad with the north line of Section 12, T-12-S, R-25-W, run thence S 88°16'19"E 65.52 feet along the north line of Section 12 to a railroad spike set in the center of the West Patrol Road, run thence S 20°10'38"E 1048.77 feet along the center of the said West Patrol Road to a point, run thence along a curve to the left with a delta angle of 08°35'45" having a radius of 1883.67 feet and a arc length of 282.60 feet, with a chord bearing and distance of S 24°28'28"E 282.33 feet, along the center of the said road to a point, run thence S 28°46'23"E 202.83 feet along the center of the said road to a cotton spindle set at the intersection of the center of the West Patrol Road and the center of State Highway no. 32, run thence N 69°00'49"E 2779.69 feet along the center of State Highway no. 32 back to the POINT OF BEGINNING, containing 245.318 acres more or less.

TRACT 3:

A part of the SE1/4, NW1/4, and part of the SW1/4, NE1/4, and a part of the NW1/4, SE1/4, and part of the NE1/4, SE1/4 all in Section 6, T-12-S, R-24-W, Hempstead County, Arkansas, and being more particularly described as follows:

Commence at a 2" pipe found for the center of Section 6 and run thence S 87°24'36"E 171.29 feet to a railroad spike set in the center of West Diagonal Road for the POINT OF BEGINNING, run thence S 50°48'41"E 1739.59 feet along the center of West Diagonal Road to a railroad spike found at the intersection of the centerline of West Diagonal Road and the centerline of State Highway no. 32, run thence N 69°00'49"E 319.79 feet along the centerline of State Highway no. 32 to a cotton spindle set, leaving the said highway run thence N 36°32'16"W 1415.03 feet along a fence to a 3/8" rod found at a fence corner, run thence N 68°53'30"E 58.69 feet along a fence to a 1/2" rod set in the said fence, leaving the fence run thence N 44°34'30"W 730.00 feet to a 1/2" rod set, run thence S 46°59'33"W 763.67 feet to a railroad spike set in the center of West Diagonal Road, said point being opposite an existing fence corner which runs N 27°18' E away from said road, run thence S 50°48'41"E 273.00 feet along the center of West Diagonal Road back to the POINT OF BEGINNING, containing 26.128 acres more or less.

APPENDIX C ENVIRONMENTAL RISK MANAGEMENT DATA

REVIEW OF ENVIRONMENTAL RECORDS MAINTAINED BY GOVERNMENT AGENCIES AND PRIVATE SOURCES

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The search met the specific requirements of ASTM Standard Practice for Environmental Site Assessments, E-1527-94, including those associated with governmental databases, search distances and data currency. The detailed EDR report, dated 05/23/95, is included as an appendix to this summary report.

The address of the subject property for which the search was intended is:

ARKANSAS HWY 32
HOPE, AR 71801

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the subject property or within the ASTM E-1527-94 search radius around the subject property for the following Databases:

NPL:	National Priority List
RCRIS-TSD:	Resource Conservation and Recovery Information System
State Haz. Waste:	CERCLIS
CERCLIS:	Comprehensive Environmental Response, Compensation, and Liability Information System
CORRACTS:	Corrective Action Report
State LF:	Permit Data System Facilities
LUST:	LUST Notice Information
UST:	RST Owner & Facilities
RAATS:	RCRA Administrative Action Tracking System
RCRIS-SQG:	Resource Conservation and Recovery Information System
RCRIS-LQG:	Resource Conservation and Recovery Information System
HMIRS:	Hazardous Materials Information Reporting System
PADS:	PCB Activity Database System
ERNS:	Emergency Response Notification System
FINDS:	Facility Index System
TRIS:	Toxic Chemical Release Inventory System
NPL Liens:	Federal Superfund Liens
TSCA:	Toxic Substances Control Act

Unmapped (orphan) sites are not considered in the foregoing analysis.

Search Results:

Search results for the subject property and the search radius, are listed below:

Subject Property:

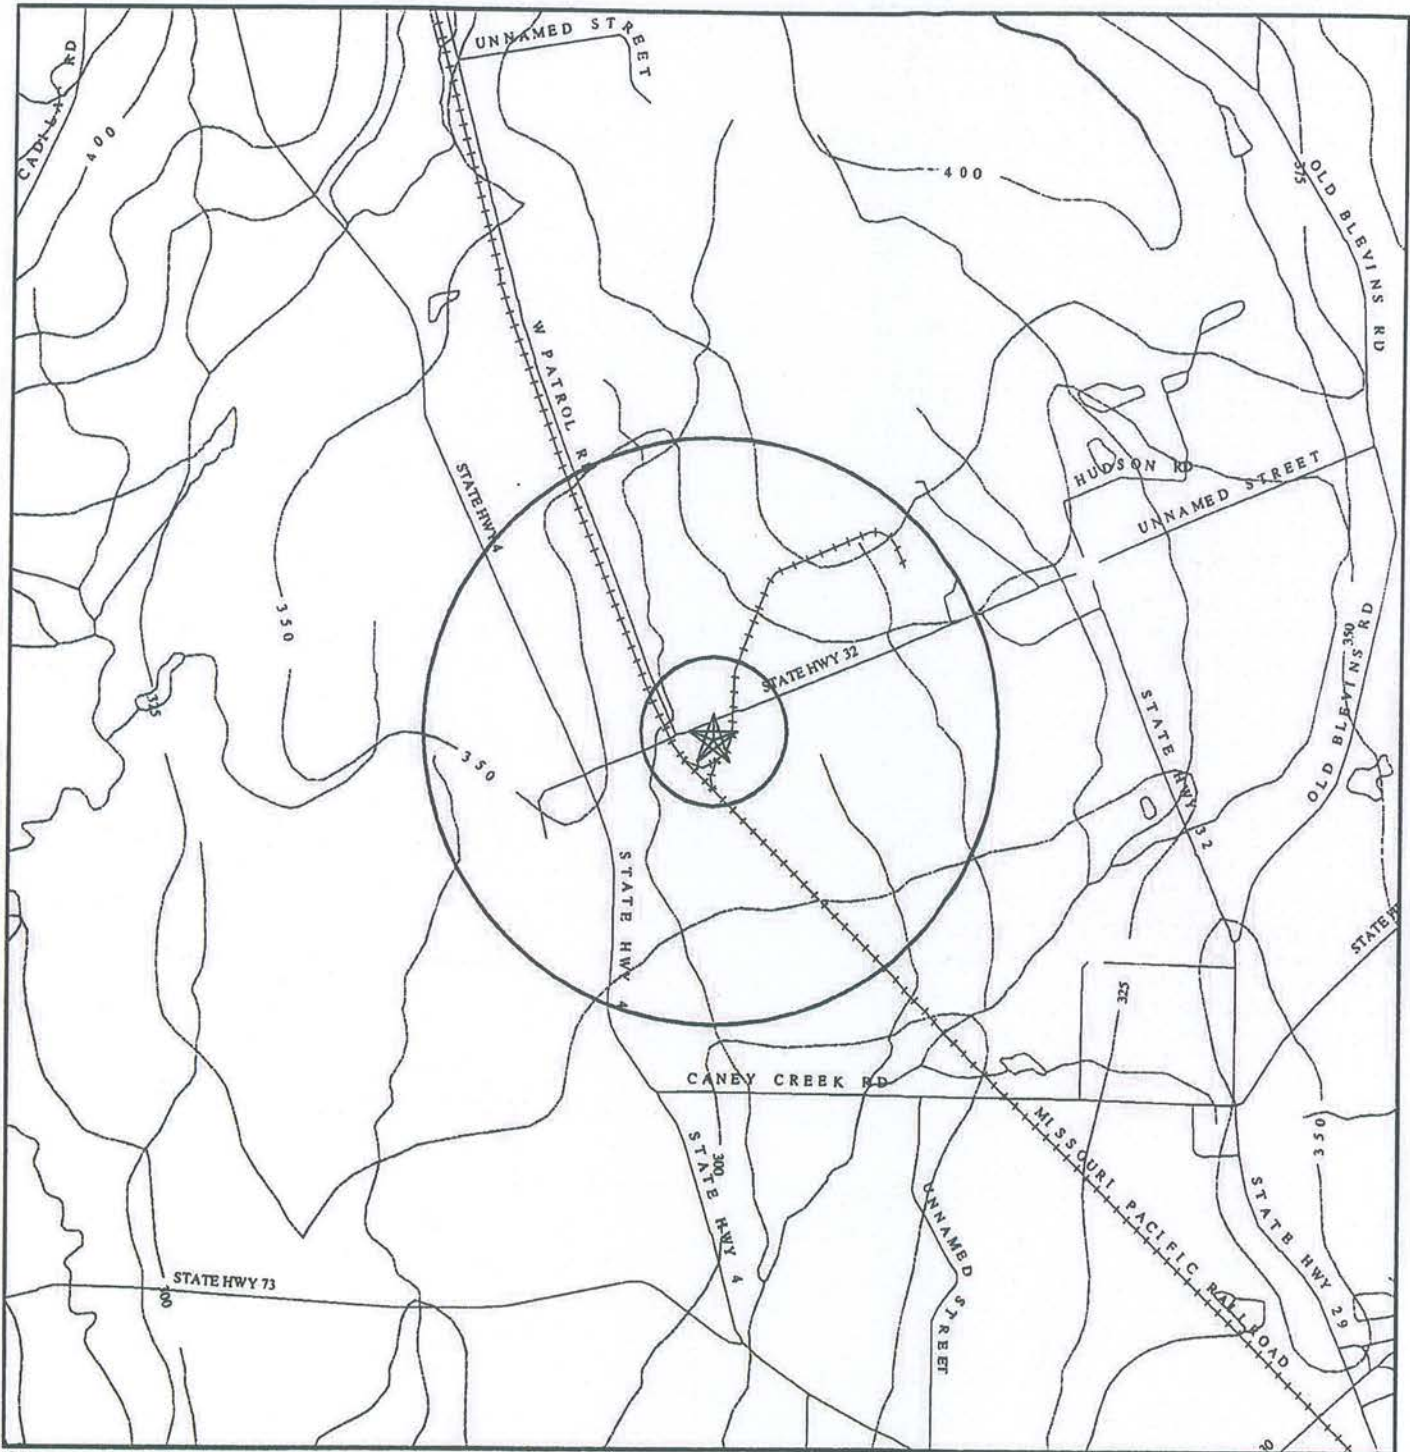

The subject property was not listed in any of the databases searched by EDR.
